## Disc User's Guide

AA-ND24Q-RE

**November 1992**

This guide describes how to use the VMS Online Documentation Library discs. It also lists the contents of the discs.

**Revision/Update Information:** This is a revised document.

## Overview of Disc User's Guide

### About these discs

The VMS Online Documentation Library discs contain documentation files designed to be used with Bookreader, an online information access tool provided with DECwindows software.

### Before using the discs

Before you use these discs, make sure you are familiar with the system hardware, including the compact disc drive.

To read the documentation files on these discs, you must have Version 5.3 or higher of the VMS software installed on your system.

### Using Bookreader

Because you can read the documentation files on these discs only with Bookreader, you should be familiar with how to use Bookreader. With DECwindows installed on VMS, invoke Bookreader by choosing the Bookreader menu item from the Applications menu in FileView.

For more information on using Bookreader, see the online document "Using Bookreader" after you install the VMS Online Documentation Library.

### In this booklet

This booklet describes how to:

- load a disc into a protective caddy for an RRD40 or an RRD42 disc drive
- insert a disc and remove it from an RRD40 or an RRD42 disc drive
- mount and control access to a disc
- provide access to the documentation on a disc
- read documentation from a disc

This booklet also contains a list of contents of the discs.

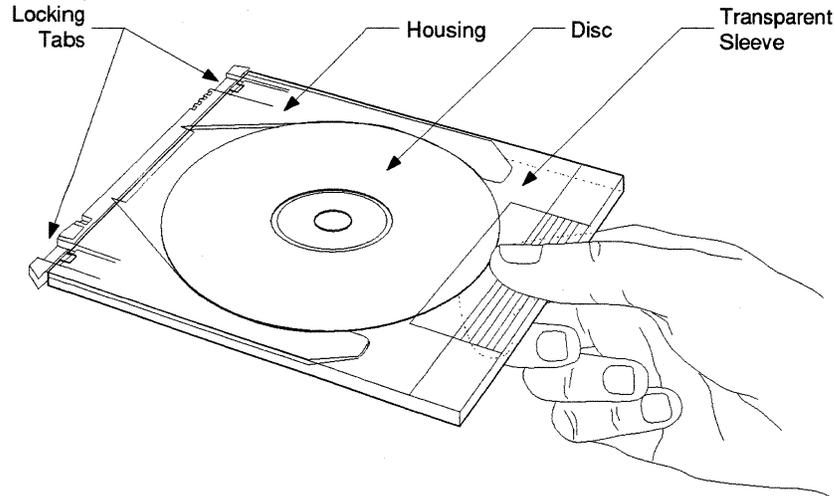

## Loading a Disc into an RRD40 Caddy

---

### Loading a Disc into an RRD40 Caddy

#### Illustration of RRD40 disc caddy

The discs accompanying this booklet must be loaded into caddies before they can be inserted into an RRD40 disc drive. The following illustration shows the components of an RRD40 disc caddy.

ZS-0402-M

#### Loading a disc into an RRD40 caddy

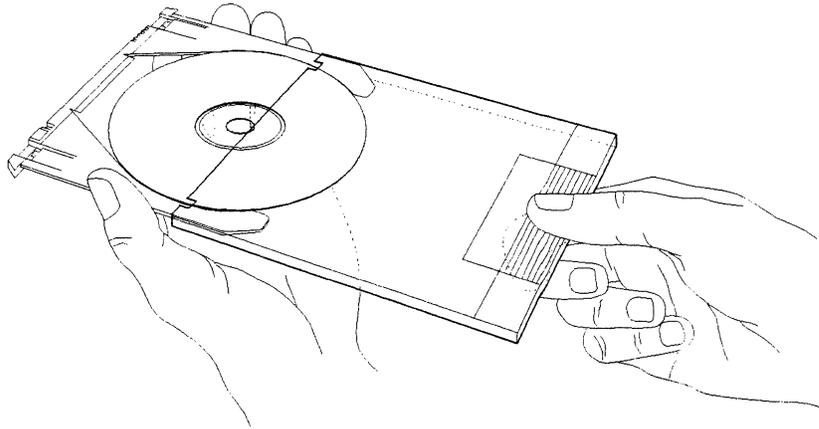

Follow these steps to load a disc into an RRD40 caddy.

Step	Action
1	Hold the caddy as shown in the illustration above. The four notches next to the locking tab should be on the right.
2	Press the locking tabs on the caddy and pull the housing out of the transparent sleeve.
3	Remove the disc from its packaging. Grasp the disc with your free hand by placing your index finger in the center hole of the disc and your thumb on the outer edge of the disc.
4	Place the disc in the caddy housing, making sure that the labeled side faces down.
5	Slide the housing into the transparent sleeve until the locking tabs latch.
<u>Result:</u> The disc is secured in the caddy.	

## Loading a Disc into an RRD40 Caddy

### Illustration of disc being loaded into RRD40 caddy

The following illustration shows how to slide the disc housing into the transparent sleeve.

ZS-0400-M

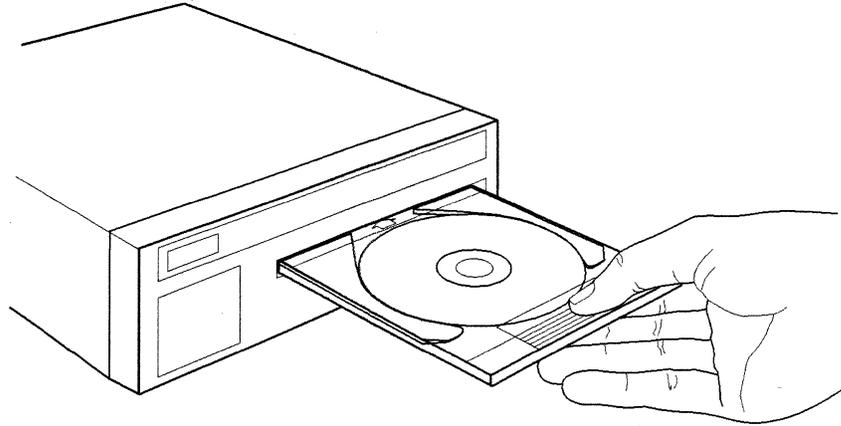

## Inserting and Removing a Disc from an RRD40 Drive

---

### Inserting and Removing a Disc from an RRD40 Drive

#### Illustration of disc, caddy, and RRD40 disc drive

The following illustration shows a disc (in its caddy) and the RRD40 disc drive.

ZS-0395-M

#### Inserting a disc in an RRD40 drive

Follow these steps to insert a disc into the RRD40 disc drive.

Step	Action
1	Insert the caddy into the slot in the drive.
2	Push the caddy in until it stops.
3	Withdraw the caddy.
	<u>Result:</u> The disc remains inside the drive.

#### Removing a disc from an RRD40 drive

Follow these steps to remove a disc from the RRD40 disc drive.

Step	Action
1	Insert an empty caddy into the slot in the drive.
2	Push the caddy in until it stops.
3	Withdraw the caddy.
	<u>Result:</u> The disc is removed from the drive and is secured inside the caddy.

---

### Loading a Disc into an RRD42 Caddy

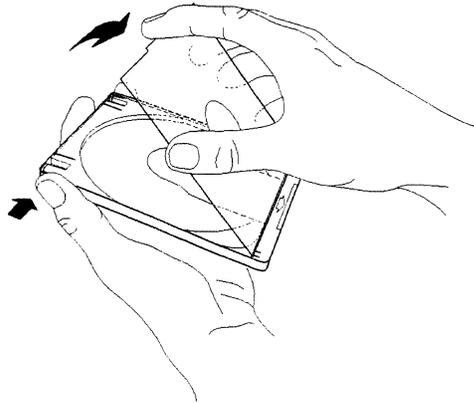

#### Loading a disc into an RRD42 caddy

The discs accompanying this booklet must be loaded into caddies before they can be inserted into an RRD42 disc drive. Follow these steps to load a disc into an RRD42 caddy.

---

Step	Action
1	If a protective film is on the lid of the caddy, remove the film before using the caddy.
2	Press the tabs on both sides of the caddy and lift the lid, as illustrated below

---

ZS-0443-MH

---

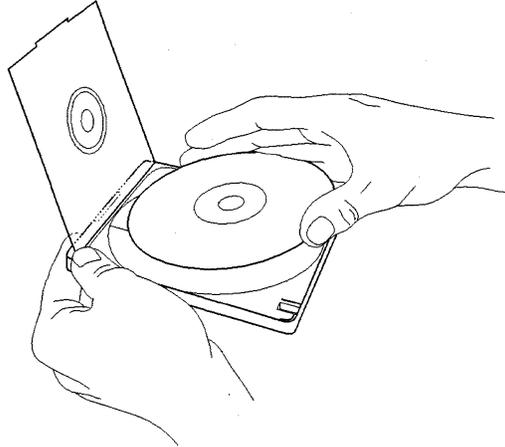

Step	Action
3	Remove the disc from its packaging. Hold the disc by the edges.
4	Place the disc in the caddy, making sure that the labeled side faces up.
5	Close the lid of the caddy by pressing both corners down firmly.

---

## Loading a Disc into an RRD42 Caddy

### Illustration of disc being loaded into RRD42 caddy

The following illustration shows how to place the disc in the RRD42 caddy.

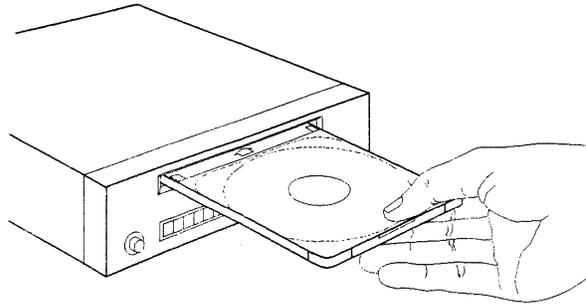

ZS-0444-MH

---

### Inserting and Removing a Disc from an RRD42 Drive

#### Illustration of disc, caddy, and RRD42 disc drive

The following illustration shows a disc (in its caddy) and the RRD42 disc drive.

ZS-0445-MH

#### Inserting a disc into an RRD42 drive

Follow the steps below to insert a disc into an RRD42 disc drive.

Step	Action
1	Insert the caddy into the slot in the drive. The disc label should be facing up.
2	Push the caddy in until it stops.

#### Removing a disc from an RRD42 drive

To remove a disc from an RRD42 disc drive, press the EJECT button on the drive to eject the disc caddy.

If the EJECT button is disabled by software, or the drive does not eject the caddy after you press the EJECT button, refer to the *RRD42 Disc Drive Owner's Manual* for instructions.

## Mounting and Controlling Access to a Disc

---

### Mounting and Controlling Access to a Disc

#### Mounting procedure

To access the files on a VMS Online Documentation Library disc, you must mount the discs. Follow these steps to mount a disc.

Step	Action								
1	Note the volume label for the disc: <table border="1"><thead><tr><th>Disc</th><th>Label</th></tr></thead><tbody><tr><td>1</td><td>CDDOC09NOV21</td></tr><tr><td>2</td><td>CDDOC09NOV22</td></tr><tr><td>3</td><td>CDDOC09NOV23</td></tr></tbody></table>	Disc	Label	1	CDDOC09NOV21	2	CDDOC09NOV22	3	CDDOC09NOV23
Disc	Label								
1	CDDOC09NOV21								
2	CDDOC09NOV22								
3	CDDOC09NOV23								
2	Insert the disc into the drive.								
3	Log into the system manager's account (SYSTEM).								
4	Mount the disc and control user access.								
	<table border="1"><thead><tr><th>If you want to mount a disc...</th><th>Then enter this command...</th></tr></thead><tbody><tr><td>To allow access from multiple users in a VAXcluster</td><td><b>MOUNT/CLUSTER</b> <i>device volume-label</i> <u>Example:</u> \$ MOUNT/CLUSTER DUB0: CDDOC09NOV21</td></tr><tr><td>On a standalone system, or to prevent access from multiple users in a VAXcluster</td><td><b>MOUNT</b> <i>device volume-label</i> <u>Example:</u> \$ MOUNT DUB0: CDDOC09NOV21</td></tr></tbody></table>	If you want to mount a disc...	Then enter this command...	To allow access from multiple users in a VAXcluster	<b>MOUNT/CLUSTER</b> <i>device volume-label</i> <u>Example:</u> \$ MOUNT/CLUSTER DUB0: CDDOC09NOV21	On a standalone system, or to prevent access from multiple users in a VAXcluster	<b>MOUNT</b> <i>device volume-label</i> <u>Example:</u> \$ MOUNT DUB0: CDDOC09NOV21		
If you want to mount a disc...	Then enter this command...								
To allow access from multiple users in a VAXcluster	<b>MOUNT/CLUSTER</b> <i>device volume-label</i> <u>Example:</u> \$ MOUNT/CLUSTER DUB0: CDDOC09NOV21								
On a standalone system, or to prevent access from multiple users in a VAXcluster	<b>MOUNT</b> <i>device volume-label</i> <u>Example:</u> \$ MOUNT DUB0: CDDOC09NOV21								

#### For more information

For information about configuring the disc drive as a served device in a VAXcluster system, see the *VMS VAXcluster Manual*.

---

## Enabling Access to Online Documentation

### Background

The VMS Operating System Software license includes a license for access to any software documentation included on the VMS Online Documentation Library disc.

Online documentation is provided as is and is not covered by other Digital warranties.

### Enabling access to online documentation

Use the following table to determine whether you need to enable access to online documentation.

IF a software product is...	THEN you need to...
Registered by means of a Product Authorization Key (PAK)	Do nothing else; that product's online documentation is accessible.
Not registered (no PAK has been installed)	Execute BOOKBROWSER.COM to access the product's online documentation.

### About BOOKBROWSER.COM

The BOOKBROWSER.COM command procedure registers the Bookbrowser PAK on your system and loads the appropriate information into your system's software license database. Executing BOOKBROWSER.COM provides you with access to all documents contained on this disc at no additional cost.

### Executing BOOKBROWSER.COM

Once you have mounted a disc, execute BOOKBROWSER.COM by entering the following DCL command:

```
$ @device-name:[DECW$BOOK]BOOKBROWSER.COM
```

Substitute the name of your device for *device-name*.

### Providing cluster-wide access to online documentation

Once you have run BOOKBROWSER.COM, you can provide cluster-wide access to the online documentation discs in one of two ways:

- Reboot the cluster
- Invoke the VMS SYSMAN Utility

Both methods load the Bookbrowser PAK into the cluster-wide license database, but the VMS SYSMAN Utility does this without requiring you to reboot the cluster.

## Enabling Access to Online Documentation

### Using the VMS SYSMAN Utility

To load the Bookbrowser PAK into the cluster-wide license database from the VMS SYSMAN Utility, follow these steps:

---

Step	Action
1	Log into the SYSTEM account.
2	Enter the following commands:  \$ RUN SYSS\$SYSTEM:SYSMAN SYSMAN> SET ENVIRONMENT/CLUSTER SYSMAN> DO LICENSE LOAD BOOKBROWSER SYSMAN> EXIT
	<b>Result:</b> The Bookbrowser PAK is loaded into the cluster-wide license database.

---

---

## Reading Books on the Discs

### Creation of library directory

During installation, the DECwindows software automatically creates a library directory for Bookreader on your system disk. The DECwindows software also defines the logical name DECW\$BOOK to refer to this directory. When you invoke Bookreader, it reads the library file in the directory defined by DECW\$BOOK.

### About DECW\$BOOK and DECW\$BOOKSHELF

To read the library files on the VMS Online Documentation Library discs, you must redefine the DECW\$BOOK logical name to refer to the directory [DECW\$BOOK] on the discs.

You can also define the DECW\$BOOKSHELF logical name to direct Bookreader to a file on the disc that contains another structured library.

### Redefining DECW\$BOOK

Use the following command to redefine the DECW\$BOOK logical name to refer to the [DECW\$BOOK] directory on the disc:

```
$ DEFINE/SYSTEM DECW$BOOK device-name:[DECW$BOOK]
```

Substitute the name of your device for *device-name*.

### Defining DECW\$BOOKSHELF

Use the following command to define the DECW\$BOOKSHELF logical name:

```
$ DEFINE/SYSTEM DECW$BOOKSHELF -  
_ $ device-name:[DECW$BOOK]LIBRARY.DECW$BOOKSHELF;
```

Substitute the name of your device for *device-name*.

This definition causes Bookreader to display a library in which documentation is organized into categories. If you would prefer an alphabetical listing of products to be displayed when Bookreader is invoked, use the following command to define the DECW\$BOOKSHELF logical name:

```
$ DEFINE/SYSTEM DECW$BOOKSHELF -  
_ $ device-name1:[DECW$BOOK]DMASTER.DECW$BOOKSHELF;
```

If you do not define DECW\$BOOKSHELF, Bookreader displays the default library defined by DECW\$BOOK.

### Accessing discs simultaneously

To access books on multiple discs, you must define DECW\$BOOK to point to multiple devices and define DECW\$BOOKSHELF to point to the library structure of your choice. Since all bookshelf files are on all discs, you can define DECW\$BOOKSHELF to point to the LIBRARY.DECW\$BOOKSHELF on disc 1.

## Reading Books on the Discs

```
$ DEFINE/SYSTEM DECW$BOOK -  
_ $ device-name1:[DECW$BOOK],device-name2:[DECW$BOOK],-  
_ $ device-name3:[DECW$BOOK]  
  
$ DEFINE/SYSTEM DECW$BOOKSHELF -  
_ $ device-name1:[DECW$BOOK]LIBRARY.DECW$BOOKSHELF;
```

---

### Note

---

While defining DECW\$BOOKSHELF, ensure the filename contains the semicolon as displayed above.

---

### If you invoked Bookreader

If you invoked Bookreader before you defined the logical names above, you must exit from it and invoke it again.

### Making a disc the default library

To define a disc as the default library, add a command line defining DECW\$BOOK to your startup command procedure located in SYS\$MANAGER:SYSTARTUP\_V5.COM.

#### Example:

```
$ DEFINE/SYSTEM DECW$BOOK DUB1:[DECW$BOOK]
```

This command line establishes the disc you loaded as the library from which books will be read each time the system starts up.

---

## Disc Contents

### Overview

This section contains tables listing the contents of the VMS Online Documentation Library discs. In addition to documentation files, the disc contains bookshelf files, which the Bookreader uses to organize the library of books into separate bookshelves.

Also, this User Guide is available in PostScript format in the [DECW\$BOOK] directory. The User Guide file name is USER\_GUIDE.PS.

### Printing a listing of documents

To obtain a hardcopy listing (in ASCII or PostScript® format) of the books and products on this release, enter one of the following DCL commands:

```
$ PRINT device-name:[DECW$BOOK]BOOK_LISTING.TXT
$ PRINT device-name:[DECW$BOOK]BOOK_LISTING.PS
$ PRINT device-name:[DECW$BOOK]CDMASTER_INDEX.TXT
$ PRINT device-name:[DECW$BOOK]CDMASTER_INDEX.PS
```

Be sure to print the PostScript file on a PostScript printer.

### Product documentation on the disc

Table 1 below lists the products for which documentation is included on the VMS Online Documentation Library discs.

The columns in the table contain information as follows:

Column Name	Column Contents
Product Name	The name of the product.
Vers	The version number of the product.
UPI	The unique product identifier.
CD	The number of the disc on which the product is located.
Status	Indicates whether the documentation is a new addition to the disc or has been updated since the last issue.

---

#### A Note About Document Versions and Product Versions

---

In some cases, the product version numbers listed in Table 1 may not coincide with the version numbers of the books on the disc. However, the online documentation does support the most currently shipping version of the product.
