FEATURES AND SPECIFICATIONS

Molex Premise Networks designs and manufactures systems and components dedicated to the integration of physical layer networking solutions for high speed communications cabling. As a premium physical solutions provider, Molex Premise Networks offers innovative Structured Cabling Solutions to customers worldwide and allows our customers to meet the dynamic challenges of today's networked society.

Headquartered in Hudson, New Hampshire, USA, Molex Premise Networks has integrated regional operations in the United Kingdom, Poland, Australia, and Hong Kong.

In addition to 20 sales offices covering the United States and Latin America, Molex Premise Networks has sales offices in France, Germany, Hungary, India, South Africa, Japan, Korea, China, and Malaysia.

MOD-CLIP

- Developed for the Asia Pacific market, MOD-Clip has proven to be an extremely versatile outlet, compatible with a number of commercially available wall plates. Up to 6 MOD-Clip outlets may be fitted onto a standard size wall plate and oriented horizontally or vertically. MOD-Clip is a compact outlet facilitating installing in shallow and hard to get at locations.

601 CONNECTION BOX

- The 601 Fiber series wall mount system interface products are compact units for optical fiber. The ST and Duplex SC versions have a capacity for up to either 6 or 8 ports.
- The enclosures are made of white, rugged plastic and have a low profile, yet provide the proper internal fiber management to ensure the integrity of the optical network. There is also provision for a user-supplied seal for added security.

Office/Workstation Products

Molex Premise Networks recognizes the variations in product standards throughout the world. In order to provide a global solution for the office/workstation environment, Molex Premise Networks has three premier wall plate families. The US011 family of mountings and modules satisfies most of North and South America.

For the European sector, Molex Premise Networks provides our EUROMOD family with a number of country-specific face plates and modules. And, for Asia Pacific, we offer MOD-Clip, a modular outlet accommodated by many different wall plates used in the region.

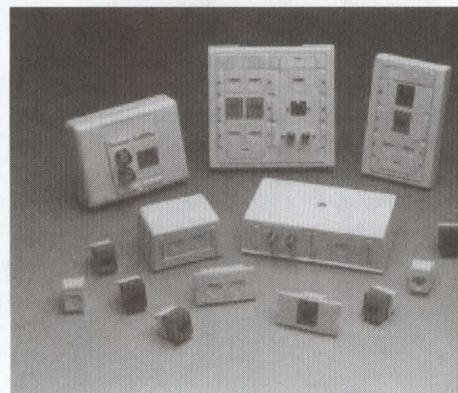

US011 WALL PLATES AND MODULES

- The US011 outlet system combines great looks with snap-in modularity to meet the ever-changing communications needs of today's office environment.
- US011 modules are the basic building blocks in the US011 system. They can be used with US011 wall plates bezels and work group interface products to build a smart-looking, versatile, multimedia office outlet system. US011 bezels fit all standard US1 and US2 wall boxes; and full range of US011 modules handles all connection requirements.

DATAGATE® JACKS

- DataGate jacks snap into special fascias to allow outlet customizing and retrofit right in the field. Made of rugged PC/ABS plastic, the jacks provide full protection from dust and contamination. DataGate jacks are UL listed, CSA approved and UL qualified to TIA 568B/A for Category 5e and proposed CAT 6 transmissions. The jacks are available in eleven additional colors for color-coding outlets.

Office/Workstation Products

SYNERGY

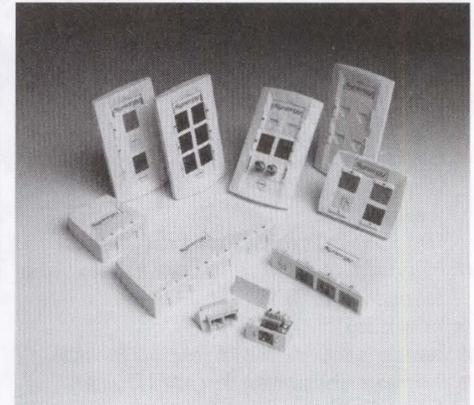

Synergy is an industrially designed family of wall plates providing a sleek, curved, and low profile appearance. Its slim, rounded contours offer an aesthetically pleasing style that fits even the most contemporary of high-technology office atmospheres.

The Synergy family blends optimum functionality with its unique design by offering convenient features such as tamper-proof rear-loading, hinged screw caps to prevent misplacement, and clear, concise labeling options.

- Low profile for inconspicuous network connecting
- Clear concise labeling
- Rear loading to reduce tampering
- Hinged screw caps prevent misplacement
- Accommodates DataGate jacks—available in 11 colors
- 5 wall plate colors available

THE EUROMOD RANGE

- The EUROMOD system of wallplates and bezels provide a flexible and versatile method of installation and is designed for use in European countries. This modular system offers a wide range of wallplates, bezels, and modules that allow the user to install as many or as few data outlets as required. EUROMOD allows various data modules to snap into the 50.00 x 50.00mm (1.968 x 1.968") or 100.00 x 50.00mm (2.953 x 3.937") aperture using a bezel style appropriate to the country.
- The EUROMOD modules are fully assembled units featuring the Molex Premise Networks PowerCat Category 5e RJLP connector and a 25.00 x 50.00mm (.984 x 1.968") fascias, shutter and sping assembly. Molex Premise Networks' unique patented RJLP FJ45 connector offers a low profile, space saving design that enables installation in shadow backboxes and trunking. Available in UTP, FTP and STP variants.

Communications Cabling Closet Products

CATEGORY 5E HD PATCH PANELS

- The Molex Premise Networks high density IDC Patch Panel is a versatile and economical means for cross connecting between trunk and horizontal cabling
- Available in 16, 24, and 48 channel versions
- Optional Rear Cable Management Tray available
- Exceeds UL, TIA, and ISO performance and safety requirements
- Uses Molex Premise Networks' proven IDC contacts:
 - Low insertion force
 - Simple to terminate
 - Compatible with Krone and Lucent termination tools
- Power Sum compliant for cleaner signals and reduced near end cross-talk (NEXT)
- Tested to 350 MHz
- Designed to eliminate short link resonance problems
- Designed to minimize delay skew critical to parallel transmission scheme applications
- Exceed the performance specified by TSB-67 channel and basic link limits

Molex Premise Networks HD Patch Panels offer enhanced performance over Category 5e products.

REAR CABLE MANAGEMENT TRAY

- Achieving a fully Category 5e compliant cable plant is easier than ever when you use Molex Premise Networks' unique Rear Cable Management Tray
- Add on option for Molex Premise Networks' IDC patch panels
- Features cable bend radius guides that ensure adherence to TIA guidelines
- Includes Velcro® tie-wraps that prevent over-compression of the cables during installation
- Each tray services eight channels—three trays per 24 channels required
- Constructed of clear Lexan that permits light to pass through dimly lit areas

SLIDING SHIELDED PATCH PANELS - 16 AND 24 PORT POWERCAT

- The Sliding Shielded Patch Panel is a two part sliding drawer which allows access for installation, termination, and maintenance. Cable support is provided in three positions for added strength and full 360 degree shielding is achieved with a braided foam strip on each half of the panel. A single label holder simplifies the identification of the channels.
- 16 or 24 ports in 1U of rack height
- Fully shielded overall
- Modular (2 ports per PCB)
- 586A and 586B wiring

KATT PREMISES DISTRIBUTION SYSTEM (PDS)

Molex Premise Networks' KATT MKII Connector is a high-performance IDC capable of providing all your voice and data interconnect needs. It has been independently tested to EIA/TIA 568A to assure a gas tight, Category 5e channel and link connection up to 1000 Mbps.

Requiring less than half the insertion force of similar connectors, the KATT connector utilizes unique "V8" termination which decreases installer fatigue and installation time while also increasing termination tool life. The connector has 20% greater wire retention than similar IDCs and has the ability to terminate two wires in the top IDC to daisy chain connections for voice and structured bus applications.

MODLINK™

Installing fiber-optic systems is quick, easy and cost-effective with ModLink. Because field termination is not required, there is no need for special termination tool and training. Simply plug the cable in and the link is operational. This is also an excellent solution for disaster recovery and fast-track installs.

- ModLink cables and cassettes are factory tested and shipped with complete optical test results for each unit.
- Multi-fiber ribbon cable terminations put all fibers in one MTP connector for easier cable management
- Rack or wall-mounted enclosures for multiple applications including premises backbones, consolidation points and OFTD

24 PORT FMS TERMINATION DRAWER

- The 24 Port FMS Termination Drawer is a 1U configurable rack mount unit for storing and terminating incoming fiber cable. The front drawer slides out to reveal a recessed configurable patch panel that accepts up to four 6-Pak/Adapter Plates (purchased separately)
- Fully enclosed cable management area
- Includes a keyed lock for optimum security
- Includes rack mounting hardware, cable management rings, labeling, and split tubing to protect incoming cables
- Accepts all Molex Premise Networks 6-Pak/Adapter Plates, most common configurations listed in the table

FMS PLUS

FMS Plus is a series of configurable patching and/or splicing units that are available in seven styles to accommodate between 48 and 144 fibers. Single units (4 rack positions) include 48 and 72 fiber patch units and a 72 fiber splice unit. The combination patching/splicing units are double high (8 rack positions) for applications where patching and splicing is required.

- Fully configurable using Molex Premise Networks 6-Pak/Adapter plates.
- Accommodates multiple connector and fiber types within a single enclosure.
- Available with fully lockable steel doors where security is a primary concern.
- Easy to use and apply labeling.
- Holds up to six Universal Splice Trays that adapt for either fusion or mechanical splices.
- Splicing and patching can occur within the same unit.
- Low profile design allows a maximum of fiber termination in a minimum of rack space.
- Multiple cable access holes with grommets to protect incoming cables and cap for unused holes.

FEATURES AND SPECIFICATIONS

Features

- 19" Standard
- Ease of change, enlargement and reconfiguration
- Ease of connection system side with utility side
- Panel accommodates up to 6 M1 Euromods (sold separately)
- Special holder provide four Splice Trays fastening
- Profiled shelf at the back allows an easy way to manage incoming cables
- Plastic holder for channel identification
- A rugged graphite, gray powder coated enclosure to protect incoming cables and connectors
- Set contains fixing screws

Fiber Optics

91.EU.000.D001G

19" Fibre Optic 6xEuromod M1 Panel

FEATURES AND SPECIFICATIONS

Features

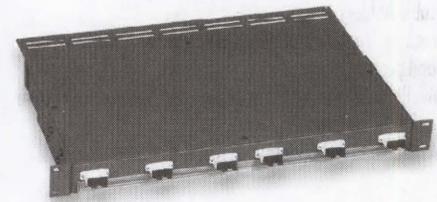

- 19" Standard
- Ease of change, enlargement and reconfiguration
- Ease of connection system side with utility side
- Panel is equipped with six Duplex SC adapters
- Special holder provide four Splice Trays fastening
- Profiled shelf at the back allows an easy way to manage incoming cables
- Plastic holder for channel identification
- A rugged graphite, gray powder coated steel enclosure protects the incoming cables and connectors
- Set contains fixing screws

Technical Features

Dimensions:
Size: Width—486.00mm (19.134")
Height—44.00mm (1.732")
Depth—300.00mm (11.811")
Weight: 3675g
Material: Cold rolled steel
Color: Graphite

91.SC.120.D001G

19" Fibre Optic 6xDuplex SC, MM, Graphite

FEATURES AND SPECIFICATIONS

Features

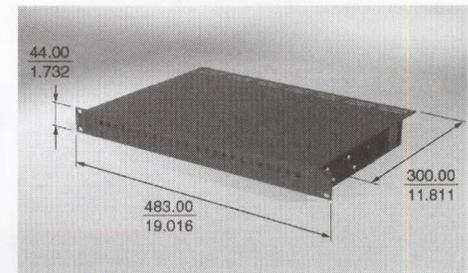

- 19" Standard
- 24 high-quality ST adapters ensure high density of connection (sold separately)
- Ease of connection system side with utility side
- Easy to maintenance
- Profiled shelf at the back allows an easy way to manage incoming cables and to fasten them with cable ties
- Plastic holder for channel identification
- A rugged graphite, gray powder coated steel enclosure protects the incoming cables and connectors
- Set contains fixing screws

Technical Features

Dimensions:
Size: Width—486.00mm (19.134")
Height—44.00mm (1.732")
Depth—300.00mm (11.811")
Weight: 3795g
Material: Cold rolled steel
Color: Graphite

91.ST.240.D001G

19" Fibre Optic 24xST Unloaded Panel

FEATURES AND SPECIFICATIONS

Features

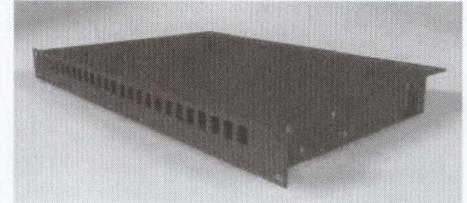

- New, 19" patch panel is appropriate to build optical Intermediate and Main Distribution Frames. Patch panel provides high-density patching field, accepts up to 24 MT-RJ Adapters which can accommodate 48 optical fibres in 1U high device. Adapters are sold separately. Panel is fitted with holders enabling fitting four Universal Splice Holders and holders for cable management. Profiled shelf at the rear ensures fixing points for incoming optical cables. Clear channel identification. Rugged steel case protects optical splices from damage. Kit consists of mounting screws, channel identification holders, cable ties, screws for MT-RJ Adapters and cable management holders.

Technical Features

Dimensions:
 Size: Width—483.00mm (19.016")
 Height—44.00mm (1.732")
 Depth—300.00mm (11.811")
 Weight: 3800g
 Material: Cold rolled steel
 Color: Graphite

FEATURES AND SPECIFICATIONS

Features

- Universal Wall mount Cabinet USN-32 is perfect for small LAN application
- Every USN-32 fits with Panel Insert, which can accommodate up to 16 Euromod Modules M1 (it makes 32 fibres when used with 2xST Modules) and Shelf for active equipment
- It is possible to mount one PDS 100-pair Block instead of Euromod Modules
- Cable entry from top and bottom
- Possibility of 100cm cable storage using special cable holders
- Locking front door provides high level of security and protection
- Available with extra Panel Inserts and Shelves to improve utility of the product
- Available in two options, full metal door and glass door

Connectors, Tools, and Test Equipment

KATT "S" SERIES TERMINAL BLOCK KATT CONNECTOR PCB

- The "S" Series KATT insulation displacement contact (IDC) is a low profile connector which is ideal for manufacturers of electronic, datacomm, and computer peripheral equipment. High corrosion resistance is maintained by the gas-tight contacts which were designed for fast and reliable PCB mounting and will accommodate 22 to 26 AWG (0.40-0.63mm) solid or stranded wire. The contacts may be reterminated up to 200 times in line with BT specification D2920. Patented retention devices prevent the connector body separating from the contacts. The connector body is a flame retardant material and is available without retention posts.
- Available in 2, 3, and 4 pair
- IDC contact accepts 2 wires for daisy chaining applications
- Low wire insertion force reduces the risk of PCB damage
- No heat-staking required
- Solder tail length compatible with industry standard 1.60mm PCB
- EIA 568A Annex A, ISO 11801 Annex B, EN 50173 Annex B compliant without retention posts

UK Order No.	Description
36.A0160	Gray, 4 Pair KATT S4, unmarked
36.A0170	Gray, 2 Pair KATT S2, unmarked
36.A0300	Gray, 2 Pair KATT S2, brown & green
36.A0310	Gray, 2 Pair KATT S2, blue & orange
36.A0320	Gray, 4 Pair KATT S4, brown, green, orange & blue
36.A0330	Gray, 4 Pair KATT S4, blue, orange, green & brown
36.A0890	Gray, 3 Pair KATT S3, unmarked
36.A0690	White, 2 Pair KATT S2, unmarked
36.A0700	White, 2 Pair KATT S2, brown & green
36.A0710	White, 2 Pair KATT S2, blue & orange
36.A0740	White, 4 Pair KATT S4, unmarked
36.A0750	White, 4 Pair KATT S4, brown, green, orange & blue
36.A0760	White, 4 Pair KATT S4, blue, orange, green & brown

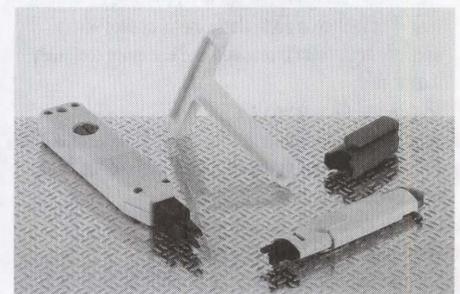

Note: Available from Molex Premise Networks UK only
Note: Parts listed above have retention post for PCB mount

MOLEX PREMISE NETWORKS IDC PUNCH DOWN TOOL

- Molex Premise Networks termination tool is designed to provide a reliable connection at a reasonable cost. Low impact force eases strain and prevents damage to installations. The "scissor-style" cut off gives positive wire trimming even on older blocks.
- The IDC Punch Down Tool is used for terminating individual conductors on 110 and KATT IDC contacts. The Disposable Termination Tool is designed for repair use only. Rated for approximately 200 cycles.
- The KATT Loading Tool is inexpensive and designed to aid in lacing wire, loading, and terminating KATT Connectors to 100 Pair Bases. The square end of the handle pre-locates and inserts wires into the base prior to IDC termination by the KATT contact.

SLT3 TESTER

- Molex Premise Networks SLT3 Tester provides instant identification of the most common voice and data problems including shorts, opens, reversals, and miswires. It is available in two versions: the SLT3 is used with UTP cable and the SLT3S is used with SCTP cable.
- Accurately verifies the continuity and sequence of 1-, 2-, 3-, and 4-pair voice and data channels
- Innovative 3-in-1 design features modular jacks for testing USO, 568A, and 568B cabling systems
- Simply snap and lock master and remote together when not in use—jacks are protected and battery is disabled

Distribution Frames and Accessories

OMEGA RACK

- Molex Premise Networks' OMEGA Rack provides a multitude of rack mounting options and cable management features
- Compatible with both 19" and 23" panels and equipment
- Increased side rail depth allows extra space for routing cables along the inside of the rack
- Side rails are slotted for using Velcro® tie wrap—preferred for securing Category 5e cables
- Top cable management trough provides required Category 5e cable bend radius management—also slotted for Velcro®
- Accommodates Molex Premise Networks' Cable Management Rings (purchased separately)

UNIVERSAL PATCHING FRAME

- The Universal Patching Frame (UPF) provides a simple cable loom support with maximum accessibility, together with a universal patch panel mounting facility. The UPF has the facility for fitting rear equipment mounting angles, and for upgrading the concept to an enclosed equipment rack. This feature is particularly useful at sites where ancillary equipment is required and enclosure continuity maintained.
- 18 arm and 42 arm versions
- Open frame maximizes access for fast and simple installation
- 19" standard allows active equipment and cabling to be accommodated in the same cabinet
- Lockable door option for added security
- Clean earth bar for shielded applications
- Slip joint construction allows the frame to be delivered in flat pack and quickly assembled

UPF-00019	Fixed shelf - 600mm deep

Note: Front Sill Kit is required when fitting doors and side covers

Accessories

- Shelves
- Glass doors, ventilation aids, side panels
- Rear doors, power distribution units
- Covers, Baying Kit for grouping frames

CABLE MANAGEMENT PANELS

- Molex Premise Networks has an extensive assortment of cable management and ring run panels to neatly organize patch cords on the front side of patching fields. Rugged black rings are mounted on a steel, graphite grey, powdercoated panel.
