NOTES

Although the program is intended for use on a computer, it has been found that it can be run on a desk calculator. The program is written in FORTRAN and is suitable for use on any computer which can handle FORTRAN programs. The program is available on a separate card set which can be obtained from the author. The program is also available on a separate tape which can be obtained from the author. The program is also available on a separate disk which can be obtained from the author.

PROGRAM TITLE: STOCK PREDICTION

PURPOSE

Predicts tomorrow's stock prices. (NOT GUARANTEED!)

OPERATOR'S INSTRUCTIONS

1. Enter tape.
2. Turn on punch.
3. Press "Error Reset" and "Start 3".
4. Enter code word for stock (8 characters, any of which may be blanks).
5. Enter prices for previous five days, followed by a carriage return (AN-007.1 format).
6. Computer will punch a tape of this information (with leader).
7. Repeat from (3) for the number of stocks desired.
8. To use previously punched tape, put tape in photoreader and press "Error Reset" and "Start 1". Tape will be kept up-to-date when new prices are typed-in, and predicted prices will print out. (Punch must be on, also)
