No. 31

March 1981

### Datapoint Processors Expedite Hostage Release

A Datapoint® ARC™ system located at TRW's European Support Office in London played an important role in finalizing the negotiations for the release of the U.S. diplomatic personnel held hostage in Iran.

The New York accounting firm of Peat, Marwick and Mitchell, working with lawyers representing European branches of Citibank, Chase Manhattan, and other U.S. banks, worked out the financial details of the agreement concerning the Iranian loans "frozen" in those banks.

More than \$4 billion had to be pro-rated, and interest had to be allocated and divided in a fashion that satisfied all concerned parties.

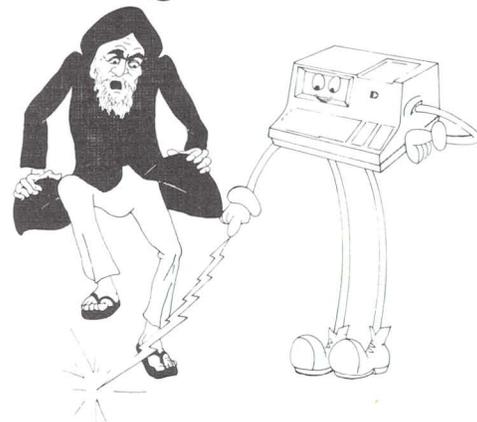

#### LONG WEEKEND

After preliminary arrangements for the use of the equipment that began Wednesday, Jan. 14, the process got underway in earnest

about 5:30 p.m. Saturday, Jan. 17, with the arrival at the London TRW office of two people from Peat, Marwick and Mitchell.

Work continued through the night without a break on the TRW ARC system, with the accountants entering data, variables and parameters into the ARC system. Reports generated by the unit's 600LPM printer were taken by taxi to the lawyer's offices in London and at 1 p.m. Sunday, Jan. 18, the reports were telecommunicated to New York, where they were printed and taken by courier service to Washington, D.C.

During the afternoon, revisions and updates were processed in the same fashion, and the results ended up in Washington as an actual attachment to the agreement signed by U.S. and Iranian authorities. In London, the operation was finished by 5 p.m.

#### ROLL CALL

Behind the scenes, coordination and operations were conducted by:  
Jim Pullen, TRW, London  
Bob Behrend, Datapoint  
Chris Hay, TRW  
Jim Farmer, TRW  
Joe Shine, Ventek  
Peter Romeril, Ventek  
Pat Phillips, Ventek

### Ordering Procedure Differs For Two Distinct 98XX Software Groups

*Confused about how to order 98XX software? Product Marketing has revised the procedure released on November 17, 1980, to clarify it.*

*The phrase "all 98XX" has been modified. The rules and procedures you've learned still apply to Computer Systems Group 98XX software, but not to Office Systems Group 98XX software. The accompanying information will define these groups.*

#### COMPUTER SYSTEMS SOFTWARE

Review our earlier articles in Out-Think No. 29 and No. 30 and Source Data No. 11. The

procedures defined in these publications remain the same. The software license fee for all 98XX software is \$1,500 unless the software is purchased with a processor, in which case the license fee is waived. Monthly software maintenance is \$10 for DOS 98XX software and \$20 for RMS™ 98XX software. The media upon which the software is to be shipped must be explicitly ordered.

RMS software will not be shipped until the customer has attended the RMS class given by Customer Education. If the customer wishes to receive the

*con't. on page 3*

#### BEN HAYES

For the few of you who didn't know him, Ben was the soul and spirit of our trade show program.

Ben's electric energy and craftiness got us into the minds of thousands of customers, who probably remember him better than the product.

He was our friend and a part of us.

Ben passed away from a heart attack on Monday, February 9, 1981.

Miss you, Benny.

*For Internal Use Only*

# Modems From Refurb, New Build

The 9408 and 9409 split modems are now available from Refurb only.

DAA model 9445, complimenting the 9409 modem, is also Refurb only at a price of \$175.

DAA model 9446, which compliments the 9408, is compatible with various other modems in our product line (i.e. 9401 and 9402). Therefore, this DAA will remain a current product available from new build inventory at the current price of \$250.

## GOOD PRICES

The price of each of these modems from Refurb is \$450. Please take note that this is a better price and a correction of the current published Pink Sheet price.

If a DAA is ordered with the modem, it's still a good price! The 9408 / 9446 costs \$700, and the 9409 / 9445 costs \$625.

It should be noted that the 9408 and 9409 have successors in the current product line, 9478 and 9479 respectively. These new models have DAAs built in and do not require a 9445 or 9446 DAA. They list for \$940 each.

## SPLIT MODEMS

Datapoint's modems link remotely located terminals to the central processor of a DATASHARE® system. The modems are attached to the communications ports of the processors and the terminal.

A standard DAA (Data Access Arrangement) connects the modems to the dial-up lines. The terminals can enter or receive data, execute programs, and accomplish a wide range of other tasks, all with access to the common database or the central systems.

The modems operate in the full duplex mode. This method speeds communications by allowing the separate, simultaneous use of two different channels, eliminating time consuming line turnaround procedures.

The 9408 / 9478 modem attaches to the DATASHARE processor, sending data at 1200 bits per second and receiving at 150 bits per second. The 9409 / 9479 modem sends data at 150 bits per second and receives at 1200 bits per second, and connects to the remote DATASHARE terminal. Both modems accommodate asynchronous data.

## LINE INFORMATION

It should be noted that the type of telephone line to be specified when using these units will always be two-wire for both dial-up and leased lines.

If Datapoint is proposing or if a customer is considering the 9478 and 9479 in the leased line configuration, one should be cautioned that if the data link is non-Bell and appears for all practical purposes to be a solid cable pair, it will not work. However, there is a modification to address this problem on a case-by-case basis.

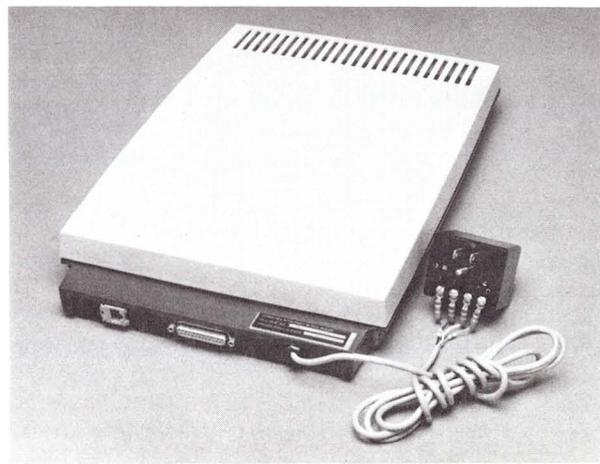

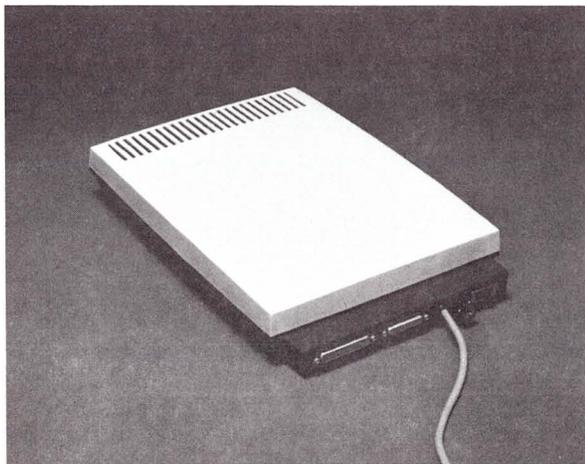

If you have questions pertaining to problems with the leased line configuration, please contact *Gene Vestor* or *Joe Jackson*.

Other contacts are:

9478/79 Modifications — *Joe Jackson, Product Marketing*, or *Gene Vestor, Customer Service Technical Operation*.

Current Product Line Modems — *Joyce Paes, Product Marketing*.

Refurb Modems — *John Tysall, Refurb Marketing*.

# Ordering Procedure Differs For Two Distinct 98XX Software Groups

CONTINUED FROM PAGE 1

software soon after class attendance, he must have ordered it through his Datapoint office prior to attending class. If you have questions, call Carolyn Lusk in Product Marketing at extension 7151.

The following lists all software currently available in this category:

## Resource Management System™ (RMS)

Software	Model Code
RMS COBOL	9836
RMS Communications Software	9829
RMS DATABUS®	9831
RMS DATASHARE®	9832
RMS Nucleus & Utilities	9830
RMS Nucleus, Utilities, & DATASHARE software and documentation	9835

## Disk Operating System (DOS)

Software	Model Code
AC3721B (ARC binary synchronous 3271 emulation)	9817
ARC AP & FP	9801
ARCSYS (ARC AP & FP software and documentation)	9833
BASICPLS	9804
COBOL	9802
DASP (Datapoint attached support processor)	9809
DATASHARE 5	9812
DATASHARE 6	9828
DCIOV1 (ARC direct channel interface option)	9806
DSSYS (DATASHARE system software and documentation)	9834
EM3270 (IBM 3270 display unit emulator)	9815
FORTTRAN 1500	9816
MLCI (channel adaptor MULTILINK™ line driver)	9810
RPGSYS	9803

## OFFICE SYSTEMS SOFTWARE

Ordering procedure for Office Systems 98XX software differs slightly from Computer Systems software.

As you already know, IEOS/EMS™ orders require two events before they are shipped: (1) the actual order for the software on a separate Software Order Schedule received by Software Services, and (2) attendance by the customer at the appropriate Customer Education class. Again, the customer's order must be received by Software Services prior to his attendance at class if he is planning to receive the software shortly after completion of the class.

There are no license fees or monthly software maintenance charges associated with this software. The customer is responsible for paying media and set up charges and the charges for classroom instruction. The week-long IEOS class costs \$750; the EMS™ class, also one week long, costs \$1200. Direct further questions to Product Marketing at extension 5191 (ask for Shannon Neal to discuss IEOS and for Bob Holmes to discuss EMS).

The 98XX model codes involved all are DOS only:

Software	Model Code
EMS Network Controller	9826
IEOS/WP (1500)	9822
IEOS/WP (1800)	9821
IEOS/WP/MS (1800)	9824
IEOS/WP/MS (3800)	9823

## COMMUNICATIONS MANAGEMENT PRODUCTS

The next version of CMIS (Version 2.1), which consists of TDP or EBP products, will have a unique ordering procedure. These products have mandatory license fees; however, there is no monthly software maintenance fee. The license fee for CMIS II System Control, TDP, and EBP (9841) is \$15,000, for CMP/TDP (9842) is \$5,000, and for CMP/EBP (9843) is \$10,000. System Control, which is

not charged for, is integral to the operation of TDP or EBP. The customer is responsible for media and set up charges.

The 98XX model codes involved all are DOS only:

Software	Model Code
CMIS II (System Control, TDP, & EBP)	9841
CMP/TDP (System Control & TDP)	9842
CMP/EBP (System Control & EBP)	9843

The next version of INFOSWITCH® /SHARE (5.X) also will reflect a 98XX model code-9846. Direct questions about CMIS (TDP or EBP) or SHARE to Andrea Ross, Product Marketing, extension 5191.

CAROLYN LUSK

## TURN IN THOSE FOREIGNERS!

Heard of a foreign device being used with a new Datapoint installation?

A list of non-Datapoint devices that are adding value to existing installations has been distributed to all branch managers and branch SE managers. If a client in your area adds a foreign device, whether or not it is on the current list, please give a call to Marketing Education (Extension 7012). We also would like to know any errors on the list.

Take some time periodically to review the list. It's a good selling tool. Several of the devices are on clients' "wish" lists. They may never implement them, but it's comforting for them to know that if they buy Datapoint gear they can someday utilize the device.

# The Salesman as Consultant

Salespeople are assuming more responsibility as representatives of their respective organizations.

It is becoming common to deal with higher level decision makers who understand the long-term benefits of buying a product or service. Clients are increasingly emphasizing long-term relationships with vendors, placing a premium on professional service and support. A significant factor in providing this professional form of service is that the salesperson must now act in a consultative role in many instances.

Successful salespeople are finding they must continually work with clients to diagnose and identify their needs, to develop and implement solutions, and to monitor results.

## SET PROCEDURES FIRST

A good consultant will work with a client to develop a set of procedures that will result in the best information throughput consistent with the client's business objectives. Only after procedures have been agreed on will any DP equipment be evaluated or purchased.

Often an unsophisticated user will skip this procedure analysis phase, or perhaps not place proper emphasis on it, before deciding on a DP vendor. Whatever emphasis the client places on the analysis phase, it is the salesperson who can act as a consultant that stands the best chance of getting the DP vendor contract.

## THINK "APPLICATIONS"

Salespeople who know their company and products will find that not being able to discuss a customer's applications comfortably hinders the sales effort significantly. It is already obvious that an

DATA COLLECTION WORKSHEET

Date: \_\_\_/\_\_\_/\_\_\_

Client Name: _____			
Contact: _____			
# Datasations: Data entry only - Other -	Shift # 1	Shift # 2	Shift # 3
# Workstations -			
Amt of Disk Storage: Application pgms - Temporary files - Transaction files - Master files - System programs -			
Total -			
Printing: (in lines per shift) Printer 1 ( ) Printer 2 ( ) Printer 3 ( )			
Batch communication: (bytes per shift) Async: _____ bps - Sync: _____ bps -			
Magnetic tape: Bytes per shift -			

appreciable number of business applications in the 1980s will depend on voice communications control and accountability integrated with distributed and centralized DP. This integration means salespeople must be able to play a consultant's role to exhibit the benefits and features of using Datapoint hardware and software. The client must be shown that Datapoint Corporation can fit current, as well as future, information processing needs.

## DO RESEARCH

In discussing new or proposed applications with a customer, it is important to collect all pertinent data. Collecting pertinent data, however, requires that the salesperson see the application through the eyes of the end user. A data collection worksheet that is familiar and convenient provides an edge in application discussions.

Completing a form similar to the one illustrated above can provide information for making systems configurations. Three time periods indicate concurrence of applications and multiple use of workstations. A time period can be likened to a shift. An analysis of the number of workstations required in a given time period in conjunction with all concurrent activities will indicate what equipment and

software is needed to satisfy a user's information processing requirement. The form gives the salesperson a worksheet that the systems engineer, as well as the customer, can relate to.

## FIND AUTOMATION LEVEL

It is important to establish the extent to which the customer wants things automated. For example, a customer may or may not want to print an order subsequent to its entry. That decision would effect whether concurrent printing is necessary while other activity dictates continuous availability of a printer.

Accounts payable is a procedure made up of several tasks, and the salesperson could consider automating things like vendor maintenance, a 5-days-until-due report display and an overdue account display.

## GIVE REASSURANCE

Customers will want to know if Datapoint's equipment will handle given tasks. A knowledgeable salesperson will respond to such questions by using terms relative to the application, with references to how an existing customer uses Datapoint equipment to successfully process the same task.

Information processing requires a vendor's support in four areas: administrative, systems, technical and consultative. Efficient DP installations have one thing in common, however — they all have proper procedures developed which take advantage of a specific DP equipment need. Professional service comes as a result of skillful execution of these four areas of support.

## STAY IN TOUCH

If you have any comments on how application knowledge can help provide professional service (and thereby close more deals), give Marketing Education a call at Extension 7012.

SAM H. WALKER

# Systems Education Offers New RMS Course

A second RMS course has been added to the curriculum of Systems Education.

The first RMS course, RMS Transition (RMS I), is an introduction to the RMS operating system. Topics include an overview of the operating system, a study of basic RMS utilities, basic system configurations, and an overview of changes to the COBOL, DATABUS and DATASHARE products.

The new course, RMS II, is centered around an in-depth study of the RMS COBOL, DATABUS and DATASHARE products. The object of the RMS II course is to provide the SE with the information and skills necessary to install, configure and support those products.

## WHAT RMS COURSE #2 OFFERS

Included in the course are these topics:

1. An in-depth study of the capabilities of RMS COBOL.
2. A comprehensive study of the capabilities of the RMS DATABUS and DATASHARE interpreters.
3. Efficient configuration of DATABUS and DATASHARE interpreters.
4. Efficient configurations for execution of COBOL programs and the COBOL compiler.
5. RMS Enqueue/Dequeue facility.
6. RMS DATAPOLL product.
7. RMS pipe communications facility.

8. RMS File Management System.
9. RMS file structure and database design configurations.

## SOME PREREQUISITES

Prerequisites for the RMS II course are: DOS/DATABUS class, RMS Transition class and preferably the Advanced DOS Systems class. A minimum of two years of DATABUS programming and at least one year of COBOL programming experience is recommended.

For more details, call Systems Education at Extension 7368.

## Datapoint Systems Education Class Schedule March - June 1981

Mar. 16-Mar. 20, Apr. 6-Apr. 10  
Mar. 30-Apr. 3, May 11-May 15  
May 18-May 22  
June 15-June 19 (Designed for and recommended to Data Processing SE's)  
Mar. 2-Mar. 6, Apr. 6-Apr. 10  
Apr. 27-May 1  
Mar. 9-Mar. 13, Apr. 13-Apr. 17, June 22-June 26

The following classes will be scheduled pending minimum number (5) of student names requesting such:

DOS/Disk  
DOS/ARC™  
Assembler 3

ISL Conversion Seminar  
COBOL  
RPG

BASIC  
FORTRAN  
Channel Adapter

All classes can and will be offered more often if sufficient students make firm commitments to attend and proper resources are available. Call Mike Burns at X7368 for more info & Debbie Schilling to enroll.

# MESSAGE SERVICES AVAILABLE FOR 1800/3800

Datapoint is now offering IEOS / MS on the 1800 and 3800 processors.

This new software version incorporates IEOS 1.2 Word Processing with Message Services, giving you enhanced word processing capabilities along with the convenience of message services.

It also enables stand-alone 1800 processors, and 3800 processors on remote ARC systems, to communicate with a pre-defined network controller or another ARC system.

There are three types of software / object codes to order from: 9826 — EMS Network Controller, 9823 — IEOS / MS (3800), 9824 — IEOS / MS (stand-alone 1800).

The following model codes will aid in ordering software and associated documentation →

	MODEL CODE	DESCRIPTION
<b>OBJECT CODE:</b>	<b>9826</b>	<b>EMS Network Controller</b>

## Marketing Education

### San Antonio Class Schedule

March 1981 - April 1981

CLASS TITLE	DATES OF CLASS
Sales Orientation (DP)	March 9 - 20
Presentation Skills	March 24 - 25
Sales Orientation (DP)	March 30 - April 10
Resource Management System™ Sales	April 13 - 17
Sales Orientation (DP / CMP)	April 20 - May 1
ASR Group I Phase II	April 20 - MAY 8
ASR Group II Phase I	May 4 - 22

Marketing Education - Mailstation C-04 - Extension 7012

As promised in the last issue of Out-Think, prices are now available for user's guides for Resource Management System software:

50553	Vol. I, Utilities User's Guide	\$ 4.00
50554	Vol. II, Utilities User's Guide	\$24.50
50555	Vol. III, Utilities User's Guide	\$22.50
50597	Vol. IV, Utilities User's Guide	\$10.00
50545	Vol. I-IV, Utilities User's Guides	\$61.00
50589	RMS DATABUS User's Guide	\$25.00
50590	RMS DATASHARE User's Guide	\$ 4.00
50592	RMS Simplified User's Guide	\$ 4.00

These documents may be ordered through Software Services.

### Software Roundup

The following software has been released since the last Out-Think:

RPGSYS 1.1	RPG System release
TST1800 1.4	Diagnostic
TEST1800 1.4	Diagnostic
LIBRARY 2.1	DOS utility

# New Marketing Support Materials Available

These marketing support items have been released by Corporate Communications and are available through Software Services.

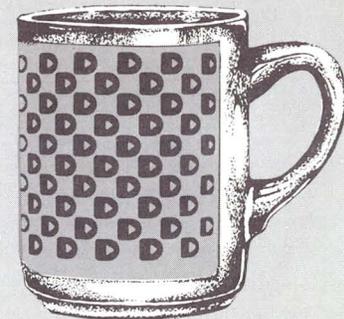

RMS Quick Reference Guide, Document Number 61017.

Double Density Diskette Drive 1403, product specifications, Document No. 61031.

Datapoint Signature Sheet and Color Match Sheet, Document No. 60980.

Datapoint Equipment Symbols Sheet, Document No. 61015.

Datapoint logo cup, Model No. 80465.

## Salesmen of the Month

Congratulations to these "Salesmen of the Month" named by Sales Services.

DENNIS DOONAN, SMR Minneapolis Branch, in July and again in October. Branch Manager Joe Tranchilla; North Central Region Manager John Huddock.

JIM ROWSE, SMR Dallas Branch, in August. Branch Manager Alex Padilla; Southern Region

Manager Len Julius.

JOHN PILKINGTON, JR., SSR Indianapolis Branch, in September. Branch Manager Charley Ford; Great Lakes Region Manager Martin Alvarez.

BILL BUNCE, SMR Chicago Branch, in November. Branch Manager Joe Morrison; Great Lakes Region Manager Martin Alvarez.
