SECTION 1

PARTS CATALOG

1.1 INTRODUCTION

This manual contains lists of parts and accompanying illustrations, identifying and illustrating components, assemblies and detail parts of the Model 733 DEC Disk Storage Drive. It is contained in one volume and is divided into three sections as follows:

- a. Section 1, Introduction. This section contains the instructions you will need to use the information contained in Sections 2 and 3.
- b. Section 2, Group Assembly Parts Lists. Parts and assemblies required for maintenance are illustrated, listed, and identified in this section.
- c. Section 3, Part Number Index. This section is a complete alphabetical-numerical index of all parts listed in Section 2, and provides a cross reference to the figure and index number that illustrates and identifies each part.

1.1.1 Figure/Assembly Locator (Figure A)

Figure A is an assembled view of the drive and is provided as an aid in locating assemblies and components in Section 2.

1.2 GROUP ASSEMBLY PARTS LIST

The following group assembly parts lists and illustrations contain a breakdown of assemblies, listed in order of disassembly (when disassembly is significant). Tools and test equipment are shown in the last figures of this chapter. Optional equipment and parts are identified within appropriate lists.

1.3 COLUMN EXPLANATION

1.3.1 "Fig. & Index" Column

This column shows the figure number of the unit breakdown and the index number which is cross referenced to a callout on the accompanying illustration.

1. Index numbers are not assigned to assemblies where all details of the assembly have index numbers.
2. Where two or more assemblies are combined in a single breakdown, the same or similar items with different part numbers or quantities have the same index number.
3. All items having an index number are illustrated.

1.3.2 "Part Number" Column

This column lists the Information Storage Systems part number.

1.3.3 "Description" Column

This column lists the name of the part, followed by a description when required.

Assembly and part relationship are shown by indenture. Each separately illustrated assembly listing begins in indenture one.

Attaching parts follow and are in the same indenture as the items they attach. The letters "AP" in parenthesis follows the description of attaching parts.

EXAMPLE: DUCT ASSY,BLOWER	1
SCREW,BIND.HD 8-32X.375 (AP)	3
.CLAMP,DUCT	1

Electrical and electronic item descriptions have reference designations in parenthesis.

EXAMPLE: RESISTOR,10K 1/4W +2 PCT (R4)

Gate designation and socket numbers for printed wiring assemblies (PWA's) are shown in parenthesis in the description.

EXAMPLE: PWA,TACHOMETER (A15)

Printed wiring boards are numbered top to bottom, right to left, and components are listed in order of their location, beginning with the lowest location number used. When a component is used more than once, only the first application is identified on the illustration. Components of the same part number can be located by a common reference designator. The location number and the reference designation number are shown in the description.

EXAMPLE: RES,FILM 1K 1/4W +2% (1R4,6R4)
DIODE (2D1,4D1,5DT)

A square pad is used to indicate the anode on diodes, the emitter on transistors, the plus side of capacitors (as applicable), pin 1 on integrated circuits, and pin 8 on operational amplifiers.

Proprietary items have the words "PROPRIETARY ITEM" in parenthesis in this column. No breakdown is provided for proprietary items.

1.3.4 "Qty Per Assy" Column

This column designates the quantity used at that particular application of the part. Where "REF" is shown, the quantity used is shown on the figure indicated in the "REF FIG." column. Where "AR" (as required) is shown, requirement is determined by user.

1.3.5 "Used on Code" Column

The explanations of codes used in this column are given at the end of each listing. Parts with no code in this column are used on all machines covered in this manual.

1.3.6 "Ref. Fig." Column

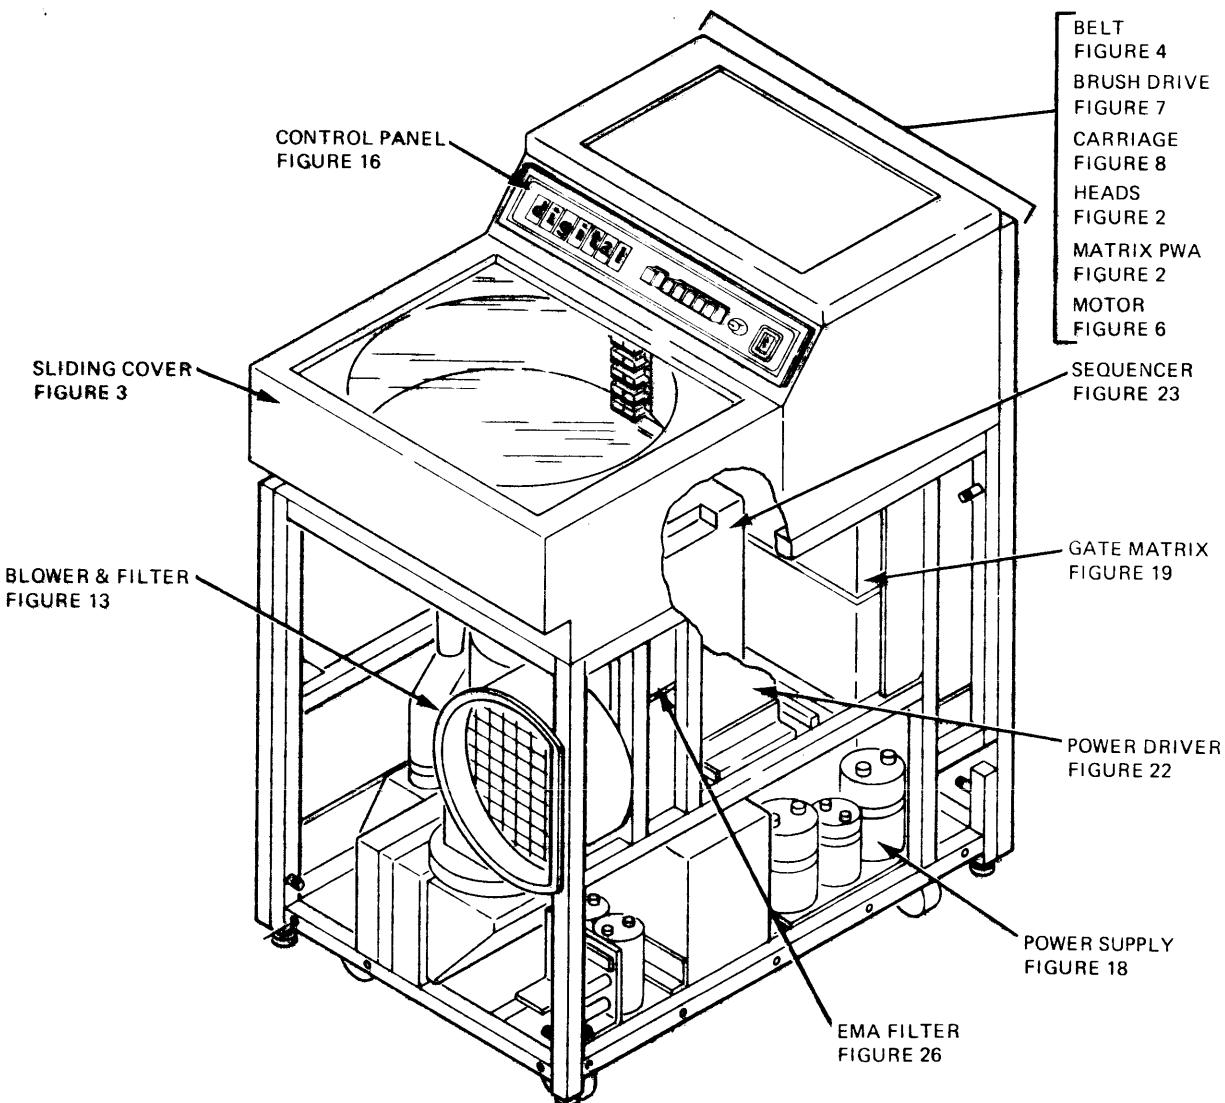

This column is used as a cross reference between figures. A number in this column indicates the item is also shown on the figure referenced.

1.3.7 "NFR" Column

An "X" in this column indicates the part is Not Field Replaceable.

1.4 PART NUMBER INDEX

The Part Number Index is a numerical index of all part numbers that appear in the Parts-Lists. Part number arrangement is in numerical order, left to right. The "Fig." column indicates the figure or figures on which that part appears, the "Index" column indicates the index number, where applicable, and the "Qty" column shows the quantity used at that particular application.
