

Digital Research is Proud to Announce FlexOS 286 and FlexOS 386 Release 2.2 and X/GEM Release 1.2

FlexOS release 2.2 and X/GEM release 1.2 are now available. FlexOS enhancements and added features include:

- improved hard disk performance for sequential access
- dynamically allocated OSPOOL and reduced KOSPOOL use, increasing the number of processes that can run simultaneously
- loadable console and keyboard drivers with multi-language support (US, German, French, Spanish, Italian, UK, and Japanese)
- enhanced shared run-time library support
- more device drivers including PS/2 ST506 hard disk, 3.5" floppy, and bus mice (PS/2, Logitech and Microsoft)
- improved linker and librarian
- new shell with command-line recall
- faster program loader

Also new in this release is a run-time library with broad IEEE 1003.1 POSIX interface support and updated documentation giving it a new look and making it easier to use.

X/GEM enhancements and added features include:

- better screen performance
- improved support for high-res monitors
- full 640x480 VGA graphics mode
- enhanced color palette support
- new, more flexible, shared run-time libraries

Special update packages are available for existing FlexOS and X/GEM customers with a legitimate serial number. There are three update packages to choose from:

FlexOS PTK Update 1160-DA-BA-01 \$250

This kit is for existing Programmer Toolkit customers who wish to upgrade to the new FlexOS 2.2 release (both 286 and 386 versions included).

FlexOS SBK Update 1160-DA-BA-02 \$300

This kit is for existing System Builders Kit customers who wish to upgrade to the new FlexOS 2.2 release (both 286 and 386 versions included).

X/GEM PTK/SBK Update 1171-DA-BA \$75

This kit combines all of the PTK and SBK contents for both 286 and 386 X/GEM versions in one kit.

Keep in mind: If you haven't already purchased the FlexVIEW Application Debugger or FlexVIEW System Debugger you're missing out on the advantages of a tool that can save you a lot of development time. I've enclosed information on these powerful source code debuggers. If you have any questions, call your FlexOS sales office. Also, available for X/GEM users is a native version of Draw Plus, a multiuser, multitasking implementation of Draw Plus for X/GEM. Draw Plus is an element-based, graphics drawing program which allows you to create professional-quality charts, complex diagrams, or simple drawings on your FlexOS development platform.

Support Policy: Support for older versions of FlexOS and X/GEM will be discontinued 90 days from date of release, unless other contractual arrangements have been made.

To get your update, fill in the attached order form. Be sure to include your serial number.

Sincerely,

Dan Erickson & Peter Bolton
