

# An open invitation to the 1,000 data processing managers in America who want to reduce data preparation costs and errors at the entry point. See DATA IV/70, the most intelligent data entry terminal system in the industry.

**Demonstration Week:  
October 18th through 22nd.**

**Locations: Four-Phase  
sales offices listed below.**

DATA IV/70 is a key-to-disc system that reduces the elapsed time from data creation to completed data processing.

The key features of DATA IV/70 are:

- Complete functional capabilities of the IBM 029/059 and 129 keypunch verifier as well as stand alone key-to-tape units.
- Extensive validation language.
- Six levels of program control.
- Variable length records.
- Video display of entire record.
- Formatted screen for "fill-in-the-blanks" data entry.
- Dynamic allocation of disc storage.
- Remote, local, or magnetic tape output options.
