

Who ever heard of a three-terminal key-to-disc system for \$573/month that can handle source data entry, remote batch processing, IBM 3270/2260 simulation, and stand-alone computing? No one until now. Business data processing will never be the same.

System IV/40: Genius of the Intelligent Terminals

24K to 72K byte CPU with processing power of an IBM 360/30. All LSI design with solid state memory, integrated 290K byte diskette or 2.5M byte cartridge disc drive, and async or bi-sync communications controller.

132 column, 30 cps printer with 96-character font. Up to 16 per system.

Single-switch start up with automatic program loading and hardware self-check.

Distributed processing for distributed organizations. Makes sense doesn't it?

With System IV/40 you can put the terminals where the action is. On the front line. In the back office. Wherever your people need help getting the job done.

And because System IV/40 is intelligent, it doesn't need to be on-line to solve the kinds of problems typically found throughout business. Things like helping a branch clerk enter orders in displayed replicas of your standard forms. Checking input data for errors while computing price/quantity totals, discounts, and taxes. Printing picking lists for warehouse stock. Retrieving and updating order files to show quantities actually packed. And generating invoices for inclusion with shipments.

But System IV/40 can go on-line too. Whenever you or the central computer decide to transmit records back home. Or to receive reports from headquarters. During data entry in the day.

Or when line costs are low at night. Even when no one's there.

Need even quicker turnaround? System IV/40 also simulates remote IBM 3270's and 2260's for real-time data base access. But with several intelligent extensions. Like single-key message generation for push-button report retrieval. Local format storage to keep line loads down and response time up. And a store-and-forward capability for nonstop data entry during periods of line failure or central site down time.

Fully supported software is part of the Four-Phase package. Including DATA IV/70 for conversational source data entry. On-line terminal simulators field proven in three million hours of operator use. Plus terminal-oriented COBOL for easy development of both batch and multiterminal applications.

System IV/40. More than key-to-disc. More than RJE. A whole new way of doing business.

We have installed over 3500 intelligent terminals throughout the nation in leading business, financial, and government organizations.

Call for a personal demonstration today.

Four-Phase Systems, Inc.
National Marketing Headquarters
10420 North Tantau Avenue
Cupertino, California 95014

Yes, I am interested in System IV/40 for:

- Source Data Entry & RJE IBM 3270 Simulation
 IBM 2260 Simulation Custom Applications

No. and type of terminals now in use _____

Name _____

Title _____

Company _____

Address _____

City _____ State _____ Zip _____

1152-character Video Terminal
with 85-key Data Entry
or Typewriter Style Keyboard.
Up to 16 per system at \$41/month
each. 1920 characters, dual intensity,
and audible alarm available.

FOUR-PHASE SYSTEMS, INC.

See System IV/40 at NCC in Booth 1101.
