

Finally... a word processing system that does things your way

Our new word processing system—ForeWord™—gives you the flexibility you need to fit today's advanced technology to your work environment... at a price your business can afford.

More than an automated typewriter

ForeWord is a shared logic system that uses a Four-Phase computer with up to 16 video display stations and 16 printers to help your staff prepare letter-perfect correspondence in a fraction of the

time once required. Either in a central location. Or in individual offices. Or both with the same system.

Ideal for manuals and proposals

ForeWord can also be used for direct composition, editing, and final typing of the large documents that once tied up your staff for days. Paragraphs can be retrieved from local storage and updated, chapters reorganized... all at computer

speed. And all while other operators are performing their independent tasks.

Nationwide support

ForeWord uses the same proven hardware as our distributed processing systems, and is backed by the same network of experienced service personnel in strategic locations throughout the country.

For more information, call your local Four-Phase office. Or write us at the address below.
