# You can do all four functions at the same station with our

## new Multifunction Executive.

For the first time, you can perform the four primary office computing activities on a single distributed processing system. Our new MFE/IV Multifunction Executive lets operators independently handle data entry, COBOL processing, word processing, and interactive 3270 inquiry to your central mainframe. And every function is instantly available at up to 16 System IV/90 display stations with the touch of a key.

The Multifunction Executive allocates CPU and I/O resources for optimum system performance, and allows our field proven software packages to operate concurrently and independently.

### Save Money.

Multifunction means bottom-line savings for your organization. No more special-purpose systems sitting idle . . . no redundant and underutilized peripherals . . . no users struggling to crosstrain on dissimilar equipment. And because each Four-Phase display replaces several dedicated terminals, you should need fewer of them.

### Save Effort.

As the balance of your workload changes, your multifunction system keeps up with it . . . automatically.

In a branch office, for example, an operator using the word processing mode to generate proposals can check current product availability by transferring to inquiry mode and accessing the headquarters data base. Or while new orders are keyed in fill-in-the-blanks formats, the system can independently retrieve and enter customer data from local files . . . price and delivery data from central files . . . and print an invoice. All while other activities proceed at other displays.

### Grow Step-by-Step.

Begin now to benefit from multifunction distributed processing. Start by installing an economical system, combining data entry and file management. Or word processing and batch communications. Or data entry, central inquiry, and local processing.

Then add memory—up to 384K bytes for your local applications. Add discs—up to 270M bytes of online storage. Add printers—one for each display. And add software—with the Multifunction Executive for concurrent operation. Our family of systems lets you grow at your own rate, saving time and money at each step.

For more information, call your local Four-Phase Systems office. Or write for our new brochure.
