

Announcing the personal computer that's also:

Four-Phase introduces the PC I, PC II and PC III: *personal computers* that operate on our office automation workstations. All of our multifunction workstations can be field upgraded for personal computing, yet still retain their ease of access to our distributed information systems. At the flip of a switch, your workstation becomes a personal computer. Not only do you save the expense and clutter of duplicate workstations, but you also benefit from dealing with one vendor.

Of course, there's a good reason for getting into personal computing: increased productivity from managers and professionals who must perform analyses, solve scheduling problems and create long-range plans. Before you make your move, however, take a look at us.

Four-Phase's personal computers deliver the benefits of CP/M®

software, giving you access to thousands of application programs such as SuperCalc.™ They can also grow with your office automation system. The PC I will operate with either Series IV or our new Series 5000 FASTRAK workstations.

Finally, you can match a system to the performance you need: select full Direct Memory Access (DMA), dual microprocessors, a track-oriented floppy disk controller which is 5 to 15 times faster than most or even a hard disk should you need it.

And since you'll want your personal computers to be fully supported, you'll be pleased to know that one of the most extensive service networks in the computer industry stands behind you. Four-Phase has more than 1000 field engineering professionals in over 150 locations across the continent.

So if personal computers play a role in your office automation plans, talk to the Office Automation Company. Call us at 1-800-528-6050 ext. 1599. (In Arizona call 1-800-352-0458 ext. 1599.) Or write: Four-Phase Systems, 10700 N. De Anza Blvd., Cupertino, California 95014. M/S 52-10A7.
