

This folder contains the entire publications library for VMBARS, the *IBM Backup, Archive and Retrieval System/VM*. This is an obsolete backup/archival solution that was available internally at IBM and was also offered for sale in EMEA. While this product is no longer supported, there are still customer installations that rely on it for one reason or another.

This documentation was very difficult to locate; a search of the old WINVMB system where it was written turned up nothing, and we had to rely on the good graces of an IBM retiree to provide us with PDF copies. The documents are as follows:

File Name	Document Title	Publication Number
VMBGIM.PDF	General Information, Release 1.3	<i>SB11-8972-03</i>
VMBGUG.PDF	User's Guide, Release 1.3	SB11-8972-03
VMBMAC.PDF	Messages and Codes Manual, Release 1.3	SB11-8973-03
VMBPDOM.PDF	Program Description and Operations Manual, Release 1.3	SB11-8974-03
