

# Subject index for papers in Volume 42

Each index entry below is accompanied by an author's name and a page number; the author index contains the title of the paper and the names of coauthors, if any.

Subject	Author	Page			
<i>Algorithms</i>					
A fast hardware data compression algorithm and some algorithmic extensions	Craft	733			
Design considerations for the ALDC cores	Slattery	747			
Performance as a function of compression	Kampf	759			
The IBM JBIG-ABIC Verification Suite	Colyer	785			
The Qx-coder	Slattery	767			
<i>Analytical models</i>					
Modular nets (MNETS): A modular design methodology for computer timers	Matick	813			
<i>ASICs</i>					
A decompression core for PowerPC	Kemp	807			
A fast hardware data compression algorithm and some algorithmic extensions	Craft	733			
A JBIG-ABIC compression engine for digital document processing	Marks	753			
Data compression technology in ASIC cores	Burroughs	725			
Design considerations for the ALDC cores	Slattery	747			
Integrating the MPEG-2 subsystem for digital television	Anderson	795			
Performance as a function of compression	Kampf	759			
The IBM JBIG-ABIC Verification Suite	Colyer	785			
The Qx-coder	Slattery	767			
<i>Beams, charged particle</i>					
Terrestrial cosmic ray intensities	Ziegler	117			
<i>Chemical analysis</i>					
Polarographic methods of monitoring addition agents in the electroplating of Sn-Pb solders	Horkans	621			
<i>Chemistry and chemical engineering</i>					
Applications of electrochemical microfabrication: An introduction	Datta	563			
Electrochemical process for advanced package fabrication	Krongelb	575			
Electrolessly deposited diffusion barriers for microelectronics	O'Sullivan	607			
Metallization by plating for high-performance multichip modules	Wong	587			
Microfabrication by electrochemical metal removal	Datta	655			
Photoelectrochemical etching of semiconductors	Kohl	629			
<i>Circuit and device technology</i>					
Electrochemical microfabrication by laser-enhanced photothermal processes	von Gutfeld	639			
<i>Coding, arithmetic</i>					
Data compression technology in ASIC cores	Burroughs	725			
Multimedia—An introduction	Flynn	165			
The Qx-coder	Slattery	767			
<i>Coding theory</i>					
The Qx-coder	Slattery	767			
<i>Color</i>					
Understanding crosstalk in high-resolution color thin-film-transistor liquid crystal displays	Libsch	467			
<i>Communications and communication networks</i>					
Bamba—Audio and video streaming over the Internet	Willebeek-LeMair	269			
Design of a video-server complex for interactive television	Sanuki	199			
Multimedia—An introduction	Flynn	165			
MultiMedia Digital Conferencing: A Web-enabled multimedia teleconferencing system	Bisdikian	281			

<i>Computer architecture</i>				Video-server designs for supporting very large numbers of concurrent users	Kumar	219
Tiger Shark—A scalable file system for multimedia	Haskin	185				
<i>Computer organization and design</i>				<i>Data transmission</i>		
Modular nets (MNETS): A modular design methodology for computer timers	Matick	813		A decompression core for PowerPC	Kemp	807
				A fast hardware data compression algorithm and some algorithmic extensions	Craft	733
<i>Computer-aided design</i>				A JBIG-ABIC compression engine for digital document processing	Marks	753
Modular nets (MNETS): A modular design methodology for computer timers	Matick	813		Bamba—Audio and video streaming over the Internet	Willebeek-LeMair	269
<i>Copper</i>				Data compression technology in ASIC cores	Burroughs	725
Damascene copper electroplating for chip interconnections	Andricacos	567		Design considerations for the ALDC cores	Slattery	747
Electrochemical process for advanced package fabrication	Krongelb	575		Performance as a function of compression	Kampf	759
Electrolessly deposited diffusion barriers for microelectronics	O'Sullivan	607		Video-server designs for supporting very large numbers of concurrent users	Kumar	219
Metallization by plating for high-performance multichip modules	Wong	587				
Thin-film multichip module packages for high-end IBM servers	Perfecto	597		<i>Databases</i>		
				Progressive search and retrieval in large image archives	Castelli	253
<i>Corrosion</i>				Video query: Research directions	Bolle	233
Thin-film multichip module packages for high-end IBM servers	Perfecto	597				
<i>Cosmic rays</i>				<i>Design automation</i>		
Terrestrial cosmic ray intensities	Ziegler	117		Modular nets (MNETS): A modular design methodology for computer timers	Matick	813
<i>Damascene process</i>				<i>Design verification</i>		
Damascene copper electroplating for chip interconnections	Andricacos	567		Projection display throughput: Efficiency of optical transmission and light-source collection	Doany	387
<i>Data compression</i>				<i>Diffraction gratings</i>		
A decompression core for PowerPC	Kemp	807		Nematic LC modes and LC phase gratings for reflective spatial light modulators	Yang	401
A fast hardware data compression algorithm and some algorithmic extensions	Craft	733				
A JBIG-ABIC compression engine for digital document processing	Marks	753		<i>Diffusion</i>		
Bamba—Audio and video streaming over the Internet	Willebeek-Lemair	269		Electrolessly deposited diffusion barriers for microelectronics	O'Sullivan	607
Data compression technology in ASIC cores	Burroughs	725		<i>Digital libraries</i>		
Design considerations for the ALDC cores	Slattery	747		Progressive search and retrieval in large image archives	Castelli	253
Evolution and challenges in multimedia	Dan	177		<i>Display technology</i>		
Performance as a function of compression	Kampf	759		A 10.5-in.-diagonal SXGA active-matrix display	Colgan	427
The Qx-coder	Slattery	767		A new backlighting system using a polarizing light pipe	Tanase	527
<i>Data, structures and accessing</i>				Active line repair for thin-film-transistor liquid crystal displays	Wright	445
A decompression core for PowerPC	Kemp	807		Aluminum-based gate structure for active-matrix liquid crystal displays	Arai	491
A fast hardware data compression algorithm and some algorithmic extensions	Craft	733		Contrast properties of reflective liquid crystal light valves in projection displays	Rosenbluth	359
Data compression technology in ASIC cores	Burroughs	725		Design and fabrication of a prototype projection data monitor with high information content	Melcher	321
Design considerations for the ALDC cores	Slattery	747		Driving method for gate-delay compensation of TFT/LCD	Kusafuka	459
Performance as a function of compression	Kampf	759		Evaluation of Al(Nd)-alloy films for application to thin-film-transistor liquid crystal displays	Takatsuji	501
Progressive search and retrieval in large image archives	Castelli	253				
The Qx-coder	Slattery	767				
Video query: Research directions	Bolle	233				

Increasing electronic display information content: An introduction	Alt	315	Metallization by plating for high-performance multichip modules	Wong	587
Micropitch connection using anisotropic conductive materials for driver IC attachment to a liquid crystal display	Nishida	517	Polarographic methods of monitoring addition agents in the electroplating of Sn-Pb solders	Horkans	621
On-chip metallization layers for reflective light valves	Colgan	339	Thin-film multichip module packages for high-end IBM servers	Perfecto	597
Projection display throughput: Efficiency of optical transmission and light-source collection	Doany	387	<i>Etching</i>		
Silicon light-valve array chip for high-resolution reflective liquid crystal projection displays	Sanford	347	Applications of electrochemical microfabrication: An introduction	Datta	563
Understanding crosstalk in high-resolution color thin-film-transistor liquid crystal displays	Libsch	467	Electrochemical microfabrication by laser-enhanced photothermal processes	von Gutfeld	639
			Microfabrication by electrochemical metal removal	Datta	655
			Photoelectrochemical etching of semiconductors	Kohl	629
<i>Electrochemistry</i>			<i>Fabrication</i>		
Applications of electrochemical microfabrication: An introduction	Datta	563	Applications of electrochemical microfabrication: An introduction	Datta	563
Electrochemical microfabrication by laser-enhanced photothermal processes	von Gutfeld	639	Electrochemical microfabrication by laser-enhanced photothermal processes	von Gutfeld	639
Electrochemical process for advanced package fabrication	Krongelb	575	<i>File systems</i>		
Electrolessly deposited diffusion barriers for microelectronics	O'Sullivan	607	Tiger Shark—A scalable file system for multimedia	Haskin	185
Future directions in electroplated materials for thin-film recording heads	Andricacos	671	<i>Films, magnetic</i>		
Integrated, variable-reluctance magnetic minimotor	O'Sullivan	681	Design, fabrication, and performance of spin-valve read heads for magnetic recording applications	Tsang	103
Metallization by plating for high-performance multichip modules	Wong	587	Electronic states in magnetic nanostructures	Himpfel	33
Microfabrication by electrochemical metal removal	Datta	655	Future directions in electroplated materials for thin-film recording heads	Andricacos	671
Photoelectrochemical etching of semiconductors	Kohl	629	Magnetic properties of transition-metal multilayers studied with X-ray magnetic circular dichroism spectroscopy	Stöhr	73
Polarographic methods of monitoring addition agents in the electroplating of Sn-Pb solders	Horkans	621	Magnetotransport in doped manganate perovskites	Sun	89
<i>Electrodeposition</i>			Oscillatory magnetic properties	Allenspach	7
Applications of electrochemical microfabrication: An introduction	Datta	563	The magic of magnetic multilayers	Parkin	3
Electrolessly deposited diffusion barriers for microelectronics	O'Sullivan	607	The role of molecular beam epitaxy in research on giant magnetoresistance and interlayer exchange coupling	Farrow	43
Future directions in electroplated materials for thin-film recording heads	Andricacos	671	Theory of exchange coupling in magnetic multilayers	Jones	25
Integrated, variable-reluctance magnetic minimotor	O'Sullivan	681	Theory of spin-dependent conductivity in GMR materials	Nesbet	53
<i>Electroless plating</i>			<i>Films, metal</i>		
Electrochemical microfabrication by laser-enhanced photothermal processes	von Gutfeld	639	Aluminum-based gate structure for active-matrix liquid crystal displays	Arai	491
Electrochemical process for advanced package fabrication	Krongelb	575	Evaluation of Al(Nd)-alloy films for application to thin-film-transistor liquid crystal displays	Takatsuji	501
Electrolessly deposited diffusion barriers for microelectronics	O'Sullivan	607	On-chip metallization layers for reflective light valves	Colgan	339
<i>Electro-optics</i>			<i>Films, permalloy</i>		
Design and fabrication of a prototype projection data monitor with high information content	Melcher	321	Future directions in electroplated materials for thin-film recording heads	Andricacos	671
<i>Electroplating</i>			Integrated, variable-reluctance magnetic minimotor	O'Sullivan	681
Damascene copper electroplating for chip interconnections	Andricacos	567			

<i>Films, thin</i>								
Application of cross-sectional transmission electron microscopy to thin-film-transistor failure analysis	Tsuji	509	Electrolessly deposited diffusion barriers for microelectronics	O'Sullivan	607	Thin-film multichip module packages for high-end IBM servers	Perfecto	597
<i>Holography</i>			<i>Ion beam bombardment</i>					
A one-megapixel reflective spatial light modulator system for holographic storage	Sanford	411	Active-matrix display using ion-beam-processed polyimide film for liquid crystal alignment	Lien	537	Application of cross-sectional transmission electron microscopy to thin-film-transistor failure analysis	Tsuji	509
<i>Image processing</i>			<i>Lasers</i>					
A fast hardware data compression algorithm and some algorithmic extensions	Craft	733	Electrochemical microfabrication by laser-enhanced photothermal processes	von Gutfeld	639			
A JBIG-ABIC compression engine for digital document processing	Marks	753	<i>Lead</i>					
Data compression technology in ASIC cores	Burroughs	725	Polarographic methods of monitoring addition agents in the electroplating of Sn-Pb solders	Horkans	621			
Design considerations for the ALDC cores	Slattery	747	<i>Light</i>					
Design of a video-server complex for interactive television	Sanuki	199	A new backlighting system using a polarizing light pipe	Tanase	527			
Increasing electronic display information content:			A one-megapixel reflective spatial light modulator system for holographic storage	Sanford	411			
An introduction	Alt	315	Nematic LC modes and LC phase gratings for reflective spatial light modulators	Yang	401			
Integrating the MPEG-2 subsystem for digital television	Anderson	795	<i>Liquid crystals</i>					
Multimedia—An introduction	Flynn	165	A new backlighting system using a polarizing light pipe	Tanase	527			
Performance as a function of compression	Kampf	759	A one-megapixel reflective spatial light modulator system for holographic storage	Sanford	411			
Progressive search and retrieval in large image archives	Castelli	253	Active line repair for thin-film-transistor liquid crystal displays	Wright	445			
The IBM JBIG-ABIC Verification Suite	Colyer	785	Active-matrix display using ion-beam-processed polyimide film for liquid crystal alignment	Lien	537			
The Qx-coder	Slattery	767	Design and fabrication of a prototype projection data monitor with high information content	Melcher	321			
<i>Imaging technology</i>			Driving method for gate-delay compensation of TFT/LCD	Kusafuka	459			
Active-matrix display using ion-beam-processed polyimide film for liquid crystal alignment	Lien	537	Increasing electronic display information content:					
Design of a video-server complex for interactive television	Sanuki	199	An introduction	Alt	315			
Multimedia—An introduction	Flynn	165	Micropitch connection using anisotropic conductive materials for driver IC attachment to a liquid crystal display	Nishida	517			
<i>Information content</i>			Nematic LC modes and LC phase gratings for reflective spatial light modulators	Yang	401			
Design and fabrication of a prototype projection data monitor with high information content	Melcher	321	Understanding crosstalk in high-resolution color thin-film-transistor liquid crystal displays	Libsch	467			
<i>Integrated circuit design</i>			<i>Lithography, X-ray</i>					
A decompression core for PowerPC	Kemp	807	Integrated, variable-reluctance magnetic minimotor	O'Sullivan	681			
A JBIG-ABIC compression engine for digital document processing	Marks	753	<i>Magnetic head design</i>					
<i>Integrated circuits</i>			Future directions in electroplated materials for thin-film recording heads	Andricacos	671			
Active line repair for thin-film-transistor liquid crystal displays	Wright	445						
Driving method for gate-delay compensation of TFT/LCD	Kusafuka	459						
Micropitch connection using anisotropic conductive materials for driver IC attachment to a liquid crystal display	Nishida	517						
Silicon light-valve array chip for high-resolution reflective liquid crystal projection displays	Sanford	347						
<i>Interconnection technology</i>								
Damascene copper electroplating for chip interconnections	Andricacos	567						
Electrochemical process for advanced package fabrication	Krongelb	575						

<i>Magnetic recording</i>			<i>Models and modeling</i>		
Design, fabrication, and performance of spin-valve read heads for magnetic recording applications	Tsang	103	Damascene copper electroplating for chip interconnections	Andricacos	567
The magic of magnetic multilayers	Parkin	3	Modular nets (MNETS): A modular design methodology for computer timers	Matick	813
<i>Magnetics—studies and structures</i>			Terrestrial cosmic ray intensities	Ziegler	117
Future directions in electroplated materials for thin-film recording heads	Andricacos	671	Understanding crosstalk in high-resolution color thin-film-transistor liquid crystal displays	Libsch	467
<i>Magnetoresistance</i>			<i>Multichip modules (MCMs)</i>		
Future directions in electroplated materials for thin-film recording heads	Andricacos	671	Metallization by plating for high-performance multichip modules	Wong	587
<i>Manufacturing</i>			Thin-film multichip module packages for high-end IBM servers	Perfecto	597
Metallization by plating for high-performance multichip modules	Wong	587	<i>Multilevel structures</i>		
Polarographic methods of monitoring addition agents in the electroplating of Sn-Pb solders	Horkans	621	Electrochemical process for advanced package fabrication	Krongelb	575
Thin-film multichip module packages for high-end IBM servers	Perfecto	597	<i>Multimedia</i>		
<i>Materials</i>			Bamba—Audio and video streaming over the Internet	Willebeek-LeMair	269
Magnetotransport in doped manganate perovskites	Sun	89	Design of a video-server complex for interactive television	Sanuki	199
<i>Materials technology</i>			Evolution and challenges in multimedia	Dan	177
Application of cross-sectional transmission electron microscopy to thin-film-transistor failure analysis	Tsuji	509	Integrating the MPEG-2 subsystem for digital television	Anderson	795
<i>Mechanical design</i>			Multimedia—An introduction	Flynn	165
Design and fabrication of a prototype projection data monitor with high information content	Melcher	321	MultiMedia Digital Conferencing: A Web-enabled multimedia teleconferencing system	Bisdikian	281
<i>Metallurgy</i>			Progressive search and retrieval in large image archives	Castelli	253
Damascene copper electroplating for chip interconnections	Andricacos	567	Tiger Shark—A scalable file system for multimedia	Haskin	185
<i>Metrology</i>			Video query: Research directions	Bolle	233
Thin-film-transistor process-characterization test structures	Colgan	481	Video-server designs for supporting very large numbers of concurrent users	Kumar	219
<i>Microelectromechanical systems (MEMS)</i>			<i>Nanoscale structures and devices</i>		
Applications of electrochemical microfabrication: An introduction	Datta	563	Electronic states in magnetic nanostructures	Himpfel	33
Integrated, variable-reluctance magnetic minimotor	O'Sullivan	681	<i>Networks</i>		
<i>Microelectronics</i>			Bamba—Audio and video streaming over the Internet	Willebeek-LeMair	269
Applications of electrochemical microfabrication: An introduction	Datta	563	Evolution and challenges in multimedia	Dan	177
Microfabrication by electrochemical metal removal	Datta	655	Video-server designs for supporting very large numbers of concurrent users	Kumar	219
Thin-film-transistor process-characterization test structures	Colgan	481	<i>Optical lithography</i>		
<i>Microfabrication</i>			Integrated, variable-reluctance magnetic minimotor	O'Sullivan	681
Electrochemical microfabrication by laser-enhanced photothermal processes	von Gutfeld	639	<i>Optical projection system</i>		
<i>Micromachining</i>			Design and fabrication of a prototype projection data monitor with high information content	Melcher	321
Microfabrication by electrochemical metal removal	Datta	655	Projection display throughput: Efficiency of optical transmission and light-source collection	Doany	387
<i>Minimotors</i>			<i>Optical science and technology</i>		
Integrated, variable-reluctance magnetic minimotor	O'Sullivan	681	Active-matrix display using ion-beam-processed polyimide film for liquid crystal alignment	Lien	537

Design and fabrication of a prototype projection data monitor with high information content	Melcher	321	<i>Physics, solid state</i> Photoelectrochemical etching of semiconductors	Kohl	629
Electrochemical microfabrication by laser-enhanced photothermal processes	von Gutfeld	639	<i>Physics, theoretical</i> Theory of exchange coupling in magnetic multilayers	Jones	25
Increasing electronic display information content: An introduction	Alt	315	Theory of spin-dependent conductivity in GMR materials	Nesbet	53
Nematic LC modes and LC phase gratings for reflective spatial light modulators	Yang	401	<i>Planarization</i> Electrochemical process for advanced package fabrication	Krongelb	575
Projection display throughput: Efficiency of optical transmission and light-source collection	Doany	387	<i>Polarography</i> Polarographic methods of monitoring addition agents in the electroplating of Sn-Pb solders	Horkans	621
<i>Optics</i> Active-matrix display using ion-beam-processed polyimide film for liquid crystal alignment	Lien	537	<i>Polymers</i> Electrochemical process for advanced package fabrication	Krongelb	575
Nematic LC modes and LC phase gratings for reflective spatial light modulators	Yang	401	Electrolessly deposited diffusion barriers for microelectronics	O'Sullivan	607
Projection display throughput: Efficiency of optical transmission and light-source collection	Doany	387	Metallization by plating for high-performance multichip modules	Wong	587
<i>Optimization</i> Projection display throughput: Efficiency of optical transmission and light-source collection	Doany	387	Thin-film multichip module packages for high-end IBM servers	Perfecto	597
<i>Packaging</i> Applications of electrochemical microfabrication: An introduction	Datta	563	<i>Process control and development</i> Future directions in electroplated materials for thin-film recording heads	Andricacos	671
Damascene copper electroplating for chip interconnections	Andricacos	567	Integrated, variable-reluctance magnetic minimotor	O'Sullivan	681
Electrochemical process for advanced package fabrication	Krongelb	575	Microfabrication by electrochemical metal removal	Datta	655
Metallization by plating for high-performance multichip modules	Wong	587	Polarographic methods of monitoring addition agents in the electroplating of Sn-Pb solders	Horkans	621
Thin-film multichip module packages for high-end IBM servers	Perfecto	597	Thin-film-transistor process-characterization test structures	Colgan	481
<i>Performance analysis</i> Projection display throughput: Efficiency of optical transmission and light-source collection	Doany	387	<i>Recording technology</i> Future directions in electroplated materials for thin-film recording heads	Andricacos	671
<i>Photoelectrochemistry</i> Photoelectrochemical etching of semiconductors	Kohl	629	<i>Reduced-instruction-set computers (RISC)</i> Evolution and challenges in multimedia	Dan	177
<i>Photoprocesses</i> Photoelectrochemical etching of semiconductors	Kohl	629	Tiger Shark—A scalable file system for multimedia	Haskin	185
<i>Photothermal processes</i> Electrochemical microfabrication by laser-enhanced photothermal processes	von Gutfeld	639	<i>Reliability</i> Application of cross-sectional transmission electron microscopy to thin-film-transistor failure analysis	Tsuji	509
<i>Physical chemistry</i> Photoelectrochemical etching of semiconductors	Kohl	629	<i>Resolution</i> Design and fabrication of a prototype projection data monitor with high information content	Melcher	321
<i>Physics</i> Contrast properties of reflective liquid crystal light valves in projection displays	Rosenbluth	359	Increasing electronic display information content: An introduction	Alt	315
Oscillatory magnetic properties	Allenspach	7	Understanding crosstalk in high-resolution color thin-film-transistor liquid crystal displays	Libsch	467
Terrestrial cosmic ray intensities	Ziegler	117	<i>Semiconductors</i> Photoelectrochemical etching of semiconductors	Kohl	629

<i>Semiconductors, III-V</i>					
Photoelectrochemical etching of semiconductors	Kohl	629	Micropitch connection using anisotropic conductive materials for driver IC attachment to a liquid crystal display	Nishida	517
<i>Silicon</i>					
Photoelectrochemical etching of semiconductors	Kohl	629	Thin-film-transistor process-characterization test structures	Colgan	481
<i>Simulation</i>					
Modular nets (MNETS): A modular design methodology for computer timers	Matick	813	Understanding crosstalk in high-resolution color thin-film-transistor liquid crystal displays	Libsch	467
Understanding crosstalk in high-resolution color thin-film-transistor liquid crystal displays	Libsch	467	<i>Trenches, vias</i>		
<i>Soft errors</i>			Damascene copper electroplating for chip interconnections	Andricacos	567
Terrestrial cosmic ray intensities	Ziegler	117	<i>Video signals</i>		
<i>Spectroscopy</i>			Design of a video-server complex for interactive television	Sanuki	199
Application of cross-sectional transmission electron microscopy to thin-film-transistor failure analysis	Tsuji	509	Video query: Research directions	Bolle	233
<i>Storage (computer) devices and systems</i>			Video-server designs for supporting very large numbers of concurrent users	Kumar	219
A one-megapixel reflective spatial light modulator system for holographic storage	Sanford	411	<i>VLSI</i>		
<i>Surface effects</i>			Integrating the MPEG-2 subsystem for digital television	Anderson	795
Active-matrix display using ion-beam-processed polyimide film for liquid crystal alignment	Lien	537			
<i>Teleconferencing</i>					
MultiMedia Digital Conferencing: A Web-enabled multimedia teleconferencing system	Bisdikian	281			
<i>Testing</i>					
Integrated, variable-reluctance magnetic minimotor	O'Sullivan	681			
Polarographic methods of monitoring addition agents in the electroplating of Sn-Pb solders	Horkans	621			
Thin-film-transistor process-characterization test structures	Colgan	481			
<i>Testing, chip</i>					
The IBM JBIG-ABIC Verification Suite	Colyer	785			
<i>Tin</i>					
Polarographic methods of monitoring addition agents in the electroplating of Sn-Pb solders	Horkans	621			
<i>Transistors, thin film (TFTs)</i>					
A new backlighting system using a polarizing light pipe	Tanase	527			
Active line repair for thin-film-transistor liquid crystal displays	Wright	445			
Active-matrix display using ion-beam-processed polyimide film for liquid crystal alignment	Lien	537			
Application of cross-sectional transmission electron microscopy to thin-film-transistor failure analysis	Tsuji	509			
Driving method for gate-delay compensation of TFT/LCD	Kusafuka	459			
Increasing electronic display information content: An introduction	Alt	315
