Eagle-5 SBC

For Real-time Applications

The Eagle-5 SBC supports Integrated Solutions':

- UniWorks, real-time operating system.
- On board plug-in modules (Ethernet, Serial, IEEE 488, Memory).
- Two mailbox interrupts for interprocessor communications.

EAGLE-5 HARDWARE FEATURES

- MC68020 CPU at 16/20/25 MHz.
- MC68881/68882 Floating Point Coprocessor,
- 1 or 4 MByte of dual ported high speed DRAM on board.
- 256 x 4 EPROM for nonvolatile storage of application dependent parameters.
- 2 asynchronous serial communication ports to connect serial devices.
- SCSI host adaptor interface.
- 1 x 24 bit programmable timer.
- Time of day clock with ni-cad battery backup.
- Software programmable VMEbus interrupt handler to ease multiprocessor applications.
- Supports both the 32-bit VMEbus and VSB.
- On-board system controller, 1 level Bus Arbitration Module.
- Local Extension Bus (LEB) for customized applications with Integrated Solutions' intelligent peripheral modules.

Optional modules:

- Ethernet/Cheapernet Interface.
- 6 serial synchronous/asynchronous interfaces.
- IEEE 488.
- RAM/EPROM Memory Module offering up to 2MBytes of additional memory.

Customers are also able to build up their own specialized I/O modules, as the I/O specifications are available to all Eagle 5 board users.

EAGLE-5 SOFTWARE FEATURES

- The Eagle-5 SBC offers:
 - Integrated Solutions' real-time operating system, UniWorks, utilizingVRTX, PSOS, and Wind Kernels.
 - C and FORTRAN.
 - Source-level symbolic remote debugger.
