PDE-1800 & PDE-5 DISK PACKS

In many locations Pertec left disk packs at customer sites in case of disk problems.

Sperry Univac will supply one pack with each disk drive shipped but additional packs will be the customer's responsibility.

Your existing sites should be informed of this change if they are not now supplying their own backup packs. Informing them before a disk pack problem occurs will insure them of getting the system back up sooner and will minimize dissatisfaction with this change.
