See What You're Fixing!

Specifications:

The Extender Board is a great aid in troubleshooting or servicing any 8800 compatible module. The EXB lets you plug in a troublesome module five-inches above the mother board. This makes both sides of the board easily accessible for use with an oscilloscope, VTVM, or logic probe.

- Dimensions:** 5.3" x 10.0" (13.46cm x 25.4cm)
- Contacts:** Gold-plated, 100 pins (dual 50) on .125" centers
- Bus Pinout:** Plug-in compatible with Sol System, Altair 8800 and IMSAI 8080 bus.
- Edge Connector:** Viking 3VH50/1CV (one included)
