WITHOUT WHOSE HELP THIS MANUAL COULD  
NOT HAVE BEEN ASSEMBLED.

# AUGMENT ENGINE Overview

## MACDONNELL DOUGLAS

### CPU

36 bit word length

bit slice microprocessors

40 Mhz basic machine clock

36 bits: 60, 61, 62

12 bits/band

interchangeable function  
non-interchangeable slot,

TTL not ECL

(Schotcky compatible  
Memory for big memory cycle)

### MOS MEMORY

8 MEG words max (most machines 2 meg)

ECC (error correction)

### CONSOLE BOARD - Replaced by IBM PC; Console Computer

commands to interrogate machine

remote diagnosis interface

floppy disks? 10mb

### MICROCODE

DEC PDP-10 emulation, Tenera or XXVI, Tops-20 or 26KL

8K of 88 bit words

### F-BUS (I/O BUS)

36 bit parallel data transfers

DMA (direct memory access)

{ not really - All MA uses Microcode

no interleaving; no "real" multi-ported memory.

### I/O DEVICES

\* disk - Auger's Connection

\* tape

line printer

DLS (data line scanner)

\* micronode (Tymnet interface)

Arpanet interface

## AUGMENT ENGINE SPECIFICATIONS

### I. PHYSICAL CHARACTERISTICS

#### A. SIZE

1. System mounted in two 19" rack mount cabinets
2. Cabinets mounted side-by-side
3. Total floor space required 1518 Sq In or 10.5 Sq. Ft.

#### B. PHYSICAL CONFIGURATION

1. Cabinet #1 contains the CPU, On-board Memory, Console Computer, Controllers, & I/O PCBs.
2. Cabinet #2 contains peripherals of the customers choice. Currently, the configuration is:

1 Kennedy 9219 Tape Formatter  
1 Kennedy 9100 dual density Tape Drive  
\*\* 1 OPTIONAL KENNEDY 9400 TRI-DENSITY TAPE DRIVE  
1 DEC LSI/23 Tymnet Communication Node  
3 Ampex "Capricorn" 330 Mbyte Disk Drives

NOTE: The customer may modify the peripheral equipment as to type or quantity to meet his specific needs.

### II. SYSTEM ARCHITECTURE

#### A. MICRO-PROGRAM PROCESSOR CONTROL

1. 88 bit micro-word for engine control
2. Utilizing bit-slice technology

#### B. MEMORY

1. Up to 8 Megawords of internal memory
2. Standard ECC Error Correction  
(Single bit error detection-correction)  
(Double bit error detection)

#### C. SPEED OF PROCESSING

1. 350 nanoseconds per memory cycle
2. 2.0 million instructions processed per second
3. Micro code speed is 150-500 ns

#### D. OPERATING SYSTEMS

1. TOPS-10
2. TOPS-20
3. TENEX
4. TYMCOM-X

E. PROGRAMMING LANGUAGES

1. Customer's choice -- no restrictions

F. PERIPHERALS SUPPORTED

1. Up to four disk drives per controller (1)
2. Tape transport 9 track NRZI format (800, 1600 or 6250 CPI)
3. High speed printers
4. Phototypesetters
5. Intelligent VDTs
6. ARPANET communication net
7. Micronode for local communication net or TYMNET tie

G. USERS

1. Up to 100 total
2. Up to 40 simultaneous users

H. MAINTENANCE

1. Local & remote Microcode diagnostics
2. Local & remote Memory diagnostics
3. Highly qualified software and technical support
4. Strategically placed, readily available spares.

*logic design*

# Computer Systems & Support

MODEL NUMBER	DESCRIPTION
TS26KL-A	CPU, data bus, diagnostic front end, console terminal, 512K words of memory, cabinet and power supplies, 115V, 60 Hz
TMS20-A	MEZ6B
	Memory 512K words, 36-bit ECC with parity
DCN30-A	MICRONODE controller, with 16 asynchronous ports, power supply, 115V, 60Hz
DCN30-B	DLVH
	Micronode additional 16 asynchronous ports
DCN30-C	DVH
	Micronode synchronous port
DCA30	Arpa net interface, MILNET
DCF40	CFLR CFLS
	Disk controller, single channel, up to 4 drives
DFM42	Single drive, 160 megabyte, 14" fixed media storage
DFM43	Single drive, 330 megabyte, 14" fixed media storage
DFM44	Single drive, 474 megabyte, 14" fixed media storage
DRM43	Single drive, 300 megabyte, removable media
LPC60	LPT
LPB60	Line printer, 64 character, 1000 LPM
TCR50	MT&L CFTA
TDR50	Tape drive 75 IPS, 800/1600 BPI, includes formatter

# MODEL TS 26KL

## PHYSICAL CHARACTERISTICS

Size	System mounted in two 19" rack mount cabinets	
	Cabinets mounted side-by-side	
	Total floor space required—1518 sq. inches or 10.5 sq. feet.	
Physical configuration	Cabinet #1	CPU, on-board memory, console computer, controllers, & I/O PCBs.
	Cabinet #2	contains peripherals
	Typical configuration:	1 TDR50 tape drive 75 IPS 800/1600 DCN30 MICRONODE controller with (16) lines ASYNC DFM43 disk drives 660 megabytes 14" fixed media
Power requirements	2-30 AMPS, 10, 115 V AC	
	Power consumption (CPU)	11 AMPS, 115 V AC (CPU)
	Power consumption (I/O)	Max 20 AMPS, 115 V AC

## PERFORMANCE

Micro-program processor control	88 bit micro-word for engine control
	Utilizing bit-slice technology
Memory	Up to 8 megawords of internal MOS memory
	Standard ECC error correction (Single bit error detection-correction) (Double bit error detection)
Speed of processing	350-500 nanoseconds per memory cycle
	2.0 million instructions average processed per second
	Micro code speed is 150-500 ns
Operating systems	TYMCOM-20
Programming languages	TOPS-20 compatible
Peripherals supported	Up to four disk drives per controller
	Tape transport 9 track NRZI format (800 or 1600 BPI)
	High speed printers
	High resolution color graphics (in development)
	ARPANET communication network/ MIL-NETWORK
	Micronode for local communication net or TYMNET
	High speed local area network connection (in development)
Access	40 interactive users
Maintenance	Local & remote microcode diagnostics
	Local & remote memory diagnostics
	Highly qualified software and technical support fully remote
	Strategically placed, readily available spares
	Remote diagnostics capability software & hardware

# MODEL DFM42 DISK DRIVE

## (160 Megabyte Capacity)

### PHYSICAL CHARACTERISTICS

Dimensions and weight	Height	25.9 cm (10.2 inches)
	Width	48.3 cm (19.0 inches)
	Length	76.5 cm (30.1 inches)
	Weight	56.6 kg (125 lbs)
AC power input	60 (+0.6, -1) Hz	120 (+8, -18) V, single phase
	50 (+0.5, -1) Hz	220 (+15,-25) V, single phase 240 (+17,-27) V, single phase
Power	Carriage and disks in motion	120 V: 530 W with maximum line current of 5.6 A. 220/240 V: 530 W with maximum line current of 2.85 A.
	Carriage and disks at rest	120 V: 160 W with maximum line current of 1.5 A. 220/240 V: 180 W with maximum line current of 0.7 A.
Operating temperature	Range	10° to 40°C (50° to 104°F)
	Max change	10°C (18°F) per hr
	Gradient	10°C (18°F)
Humidity	Operating	20% to 80% RH, non-condensing 10% per hr max change

### PERFORMANCE

Transfer rate	Disk speed	9.677 MHz (1,209,625 bytes/sec)
Latency	At 3,600 r/min	Latency is time to reach a particular track address after positioning is complete
	Average	8.33 ms (disk rotation speed at 3,600 r/min)
	Maximum	17.3 ms (disk rotation speed at 3,474 r/min)
Recording	Mode	MFM or NRZ (modified frequency modulation or non-return to zero)
	Density	6,417 bits per inch (inner track)
Seek time	Full	55 ms max
	Average	30 ms
	Single track	7 ms max
Start/Stop time		30 sec max

# MODEL DRM43 DISK DRIVE

(300 Megabyte Capacity)  
 (Removable Media)

## PHYSICAL CHARACTERISTICS

		DRM43		
Dimensions	Height	38.0 inches		
	Width	19.25 inches		
	Depth	34.0 inches		
	Clearance	0.5 inch minimum on each side; 36 inches minimum in the front and rear (for operation and maintenance)		
Weight		465 lbs		
Support	Casters under the frame of the unit. The cable entrance is on the bottom, right side rear of the unit.			
Power requirements				
Input power: The standard drive is designed to operate on 208 VAC±10%, 60 Hz, three-phase, delta-connected power. The following input power configurations are also available:				
<ul style="list-style-type: none"> <li>• 400 VAC±10%, 50 Hz, three-phase, wye-connected</li> <li>• 220 VAC±10%, 60 Hz, single phase</li> <li>• 230 VAC±10%, 50 Hz, single phase</li> </ul>				
<b>INPUT POWER REQUIREMENTS WITH NOMINAL INPUT OF 208 V, 60 Hz, 3-PHASE</b>				
Type Current	Phase A (Amperes RMS)	Phase B (Amperes RMS)	Phase C (Amperes RMS)	
Idle mode	1.5	1.5	1.5	
Starting mode current for 7 seconds	27	27	23.5	
Running mode current (no seeks)	4	4	2.2	
Seeking mode current (random seeks)	6.4	6.4	2.2	
Total power consumption at 208 VRMS: 1700 watts during random seeks				
Ambient temperature	Operating	60° to 90°F		
	Nonoperating	50° to 110°F		
	Shipping/storage	0°F to 140°F		
Relative humidity	Operating	20% to 80%		
	Shipping/storage	5% to 90% noncondensing		
Shock and vibration	Vibration	1.5G (5-400 Hz)		
	Shock	5G		
Cooling	The unit is cooled by means of internal fans and blowers			
Altitude	-1,000 ft (-305 m) to 30,000 ft (9,000 m)			
With 208 VRMS input, heating effects of each drive are:		4,100 BTU/hr, Ready status 5,800 BTU/hr, Selected status, random seeks		

## GENERAL OPERATING CHARACTERISTICS

Storage characteristics	Cylinders per pack	815
	Tracks per cylinder	19
	Tracks per pack	15,485
	Track density	370 tracks per inch
	Bit density	6,038 BPI
	8-bit bytes per track	20,160 (unformatted)
	8-bit bytes per cylinder	383,840 (unformatted)
	8-bit bytes per pack	312,177,600 (unformatted)
Disk pack characteristics	Weight	20 lbs
	Diameter	15 inches
	Height	7 inches
	Storage temperature	-40° to 150°F
	Operating temperature	60° to 90°F
Pack rotation speed		3,600±2% rpm
Pack rotation period		16.7 ms for one rotation
Average rotation latency		8.35 ms
Head positioning time	One cylinder	10 ms
	815 cylinders	55 ms
	Duty cycle (rep rate)	No less than 4 ms
	Data transfer rate	1,209,600 8-bit bytes per sec
Start time		After the START/STOP switch is set to START, it takes 15 seconds maximum to reach the point when the READY indicator is lit, indicating a ready condition.
Stop time		After the START/STOP switch is set to STOP, it takes a maximum of 15 seconds to bring the disk pack to a complete stop. (Braking is accomplished electrodynamically by means of an eddy-current brake on the spindle shaft.)

# **MODEL DFM43 DISK DRIVE**

## **(330 Megabyte Capacity)**

### **PHYSICAL CHARACTERISTICS**

Dimensions and weight	Height	10.75 inches (with feet) 10.25 inches (w/o feet)
	Width	18.75 inches
	Weight	134 lbs
Power requirements	Voltage (single phase)	120+10%, -15% VAC, 60 Hz 230+10%, -15% VAC, 50 Hz
	Frequency	60+1.0 Hz or 50+1.0 Hz
	Start current (10 seconds)	20 A, 60 Hz 12 A, 50 Hz
	Run current	5 A, 60 Hz 3 A, 50 Hz
Temperature gradient (per hour)	Transit	27°F 15°C
	Operating	18°F 10°C
Storage	Transit	-40° to 140°F -40° to 60°C
	Operating	50° to 110°F 10° to 43.3°C
Relative humidity non-condensing	Transit	10% to 90%
	Operating	20% to 80%
Humidity gradient	Transit	10% per hr
	Operating	10% per hr
Vibration (vertical)	Transit	5-50 Hz 0.01 in. disp. 50-500 Hz 2 gs acc.
	Operating	5-10 Hz 0.004 in. disp. 10-15 Hz 0.02 gs acc. 15-50 Hz 0.0016 in. disp. 50-500 Hz 0.20 gs acc.
Altitude	Transit	-980 to 40,000 feet
	Operating	-980 to 10,000 feet

### **FUNCTIONAL SPECIFICATIONS**

Storage capacity (unformatted)	330.3 megabytes	
Disks	5	
Bytes per track	20,160	
Tracks per cylinder	16	
Tracks per surface	2,048	
User cylinders	1,024	
Positioning time	Track-to-track	6 ms
	1,024 cylinders (max seek)	55 ms
	Average	30 ms
Average latency	8.33 ms	
Rotational speed	3,600 ± (+2.5%, -3.5%) rpm	
Recording density	6,250 BPI	
Data transfer rate MFM encoding	1,209,600 8-bit bytes per sec 9,676,800 bits per sec	
Recording code	MFM (modified frequency modulation)	
Interface code	NRZ (non-return to zero)	
Interface	SMD (storage module drive)	
Heads R/W Servo	16 1	
Head positioning	Servo-controlled	
Start time	15 sec max	
Stop time	15 sec max	

### **RELIABILITY**

MTTR (mean-time-to-repair)	30 minutes	
Components life	5 years	
Error rates	Recoverable errors	1 in $10^{10}$ bits
	Unrecoverable errors	1 in $10^{12}$ bits
	Seek errors	1 in $10^6$ seeks

# MODEL DFM44 DISK DRIVE

## (474 Megabyte Capacity)

### PHYSICAL CHARACTERISTICS

		DFM44/AF
Dimensions and weight	Height	264 mm (10.4 inches)
	Width	482 mm (19.0 inches)
	Depth	660 mm (26.0 inches)
	Weight	64 kg (140 lbs)
Power requirements		100 VAC±10%, 50 Hz±2 Hz, 5.7 A or 60 Hz±2 Hz, 5.4 A
		120 VAC±10%, 60 Hz±2 Hz, 4.6 A
		220 VAC±10%, 50 Hz±2 Hz, 2.9 A
		240 VAC±10%, 50 Hz±2 Hz, 2.6 A
Ambient temperature	Operating	10° to 40°C (50° to 104°F), less than 10°C (18°F) per hr
	Nonoperating	-40° to 60°C (-40° to 140°F), less than 20°C (36°F) per hr
Relative humidity	Operating	20% to 80% noncondensing
	Nonoperating	5% to 95% noncondensing
Vibration	Operating	0.2G (5 to 50 Hz), 1G (50 to 500 Hz) shock: 2G (10 ms max)
	Nonoperating	0.2G (10 to 500 Hz), shock: 3G (10 ms max)
	In storage or during transportation	3G, shock: 5G (30 ms max)
Altitude	Operating	3,000 m (10,000 feet)
	Nonoperating	12,000 m (40,000 feet)

### RELIABILITY SPECIFICATIONS

		DFM44/AF
MTBF (mean-time-between-failures)		More than 10,000 power-on hours
MTTR (mean-time-to-repair)		Less than 30 minutes
Components life		5 years
Error rates	Recoverable errors	10 per $10^{11}$ bits read
	Unrecoverable errors	10 per $10^{14}$ bits read
	Seek errors	1 per $10^7$ seeks

### FUNCTIONAL SPECIFICATIONS

	DFM44	DFM44/AF
Storage capacity (unformatted)	Moving heads	474,214,400 bytes
	Fixed heads	— 1,689,600 bytes
Disks	6	
Bytes per track	28,160	
Tracks per cylinder	Moving heads	20
	Fixed heads	— 20
Cylinders	Moving heads	842
	Fixed heads	— 3
Positioning time	Track-to-track	5 ms
	Average	18 ms
	Maximum	35 ms
Average latency	7.5 ms	
Rotational speed	3,961 rotations/minute± 2%	
Recording density	12,790 bits/inch	
Track density	880 tracks/inch	
Data transfer rate	1,859 megabytes/second	
Recording code	MFM (modified frequency modulation)	
Interface code	NRZ (non-return to zero)	
Interface	Modified SMD (modified storage module drive)	
Heads	Moving	20 (2 per surface)
	Servo	1
	Fixed	— 60
Head positioning method	Servo-controlled track-following	
Start time	30 seconds	
Stop time	15 seconds	

# MODEL LPB60 BAND PRINTER

## PHYSICAL CHARACTERISTICS

Dimensions and weight	Height	113 cm (44.5 inches)
	Width	87 cm (34.3 inches)
	Depth	75.5 cm (29.7 inches)
	Weight	159 kg (350 lbs)
Power requirements	Electrical voltage/freq	Universal power supply 90-132 V, 180-250 V 50 or 60 Hz
	Operating	600 watts
	Standby	550 watts
Features	Self test	Std
	Auto motor on/off	Std
	Diagnostic display	Std
Pedestal & paper shelf	N/A	
Acoustic cabinet	Std	
Forms length select switch	Optional	
Elapsed time meters Tape controlled 12 ch VFU Direct access 12 ch VFU 136 print columns	Optional Optional Optional Optional	

## FUNCTIONAL SPECIFICATIONS

Print speed	48 character set	1100 LPM
	64 character set	1025 LPM
	96 character set	820 LPM
Paper slew speed		38 cm (15 inches) per sec
Single line advance		18 ms
Band speed		507 cm (199 inches) per sec
Interface	Parallel with full line buffer (standard)	RS-232 (optional) Long line (optional)
	Continuous fan-fold, edge perforated 7.6 cm (3 inches) to 40.6 cm (16 inches) wide	
Copies		Original plus five
Print format	Horizontal	10 characters per inch
	Vertical	6 or 8 lines per inch

# MODEL TDR50 Computer Systems & Support

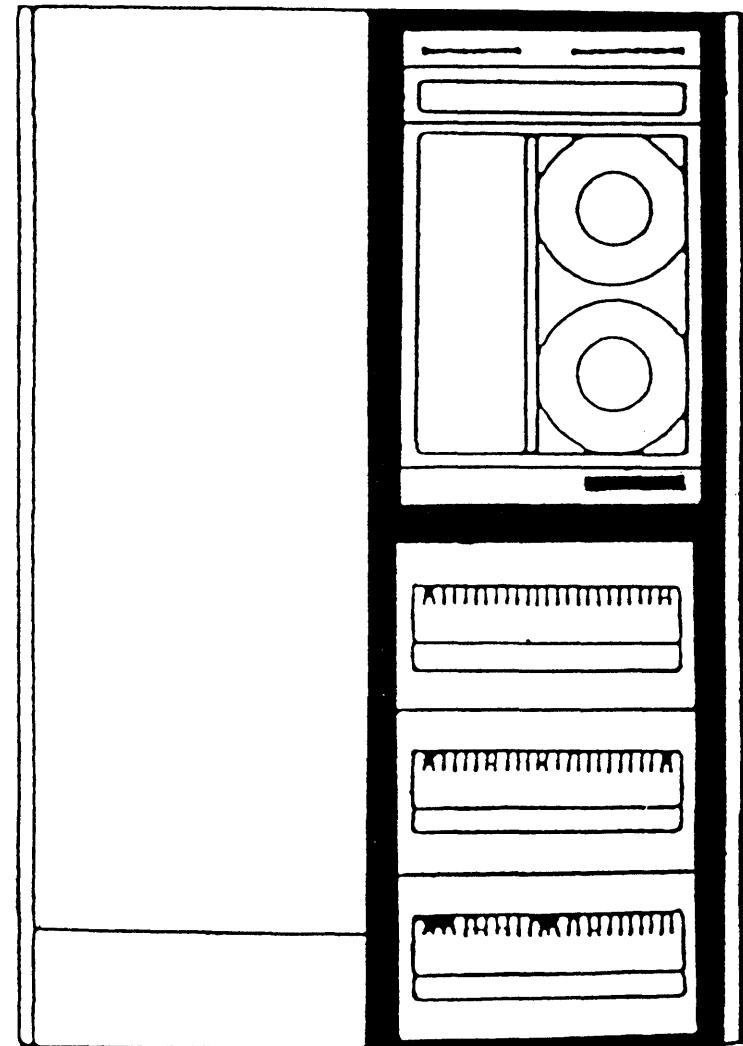

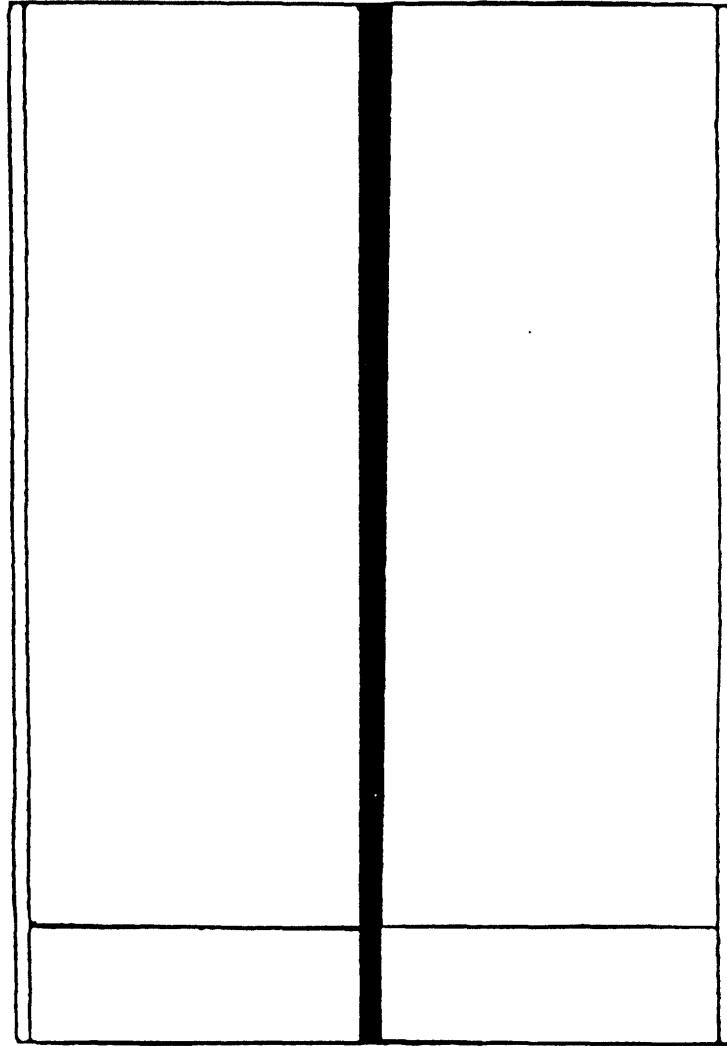

## Tape Drive

### PHYSICAL CHARACTERISTICS

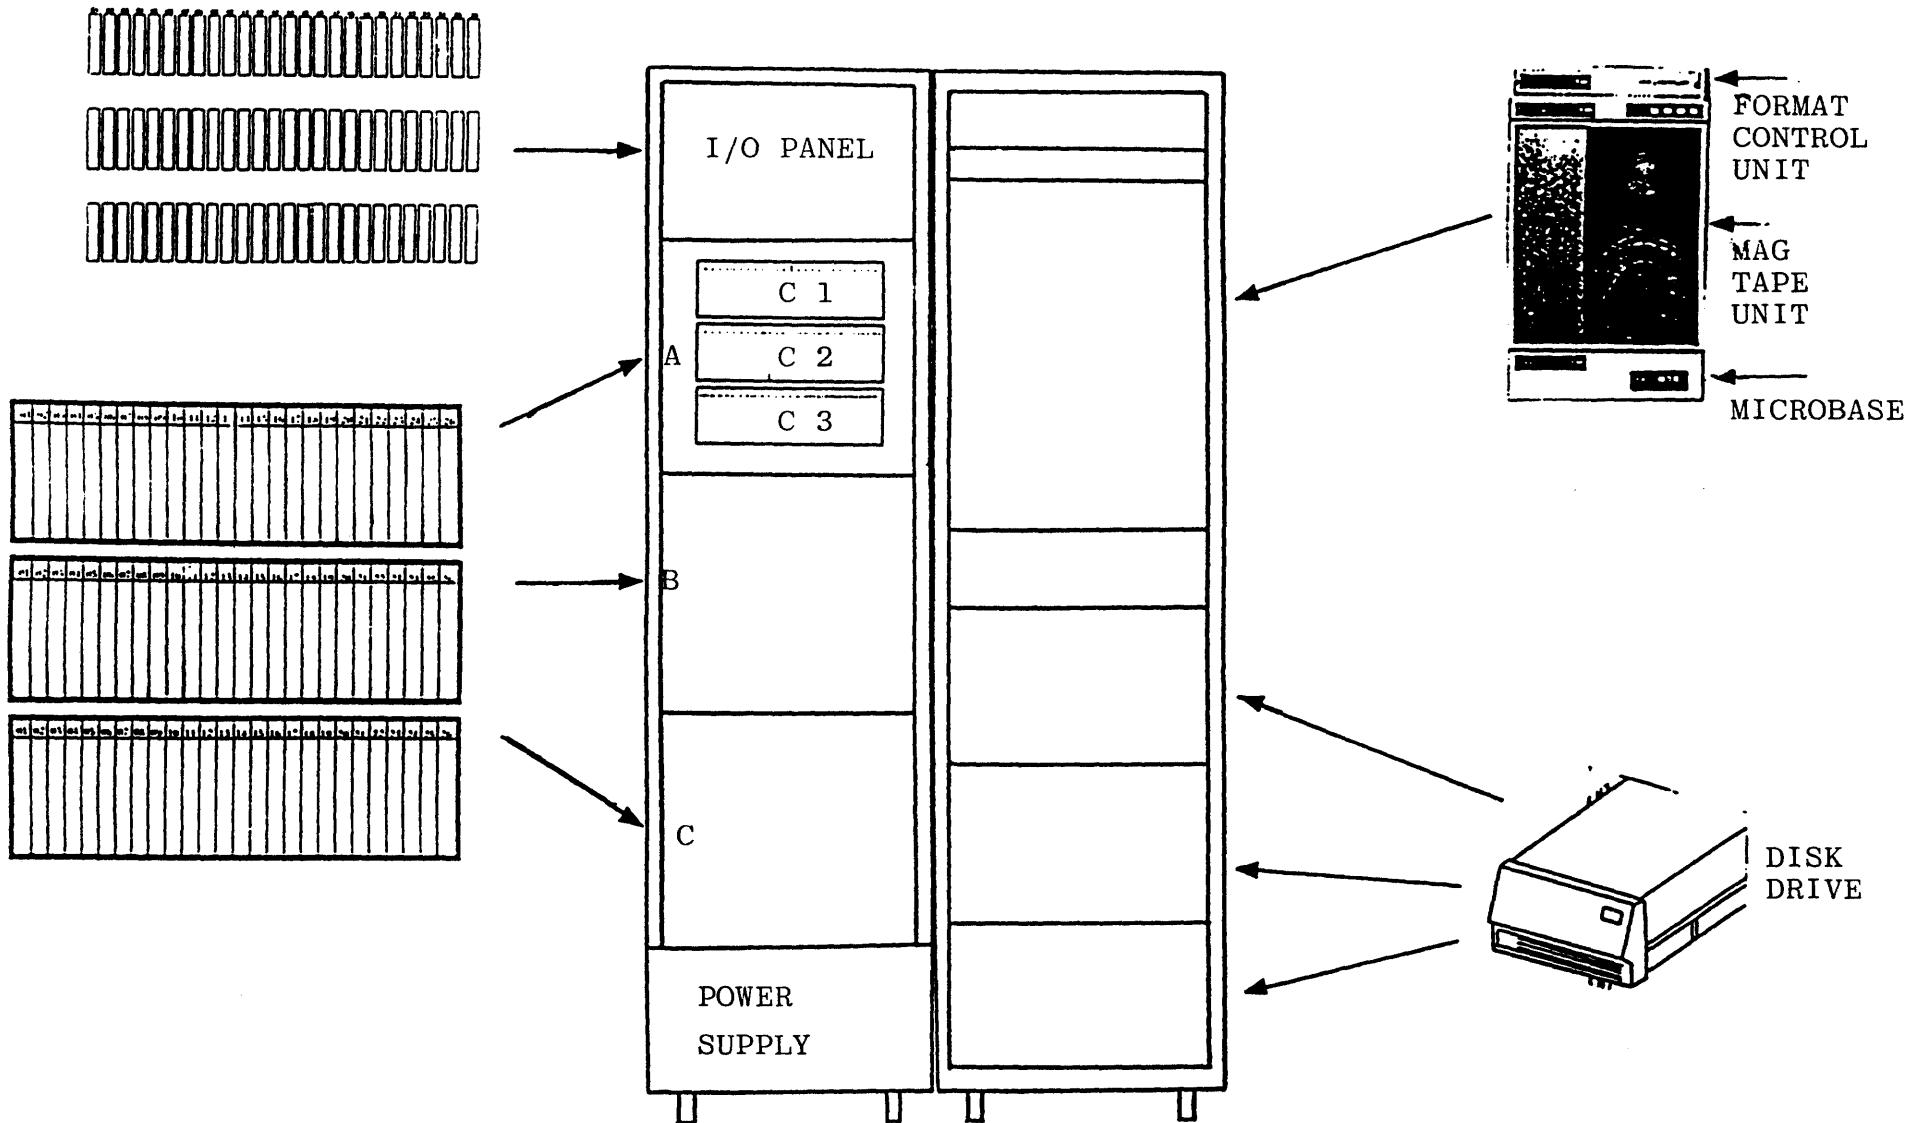

Dimensions and weight	Height	24.5 inches
	Width	19.0 inches
	Depth	21.0 inches
	Weight	155 lbs
Mounting		Std EIA rack
Power		115 VAC±10%, 48-60 Hz 750 watts max
Operating temperature		+2° to 50°C
Humidity		15% to 95% noncondensing
Altitude		0 - 4,000 feet
Options available		High altitude kit Special paint 220, 240 VAC

### FUNCTIONAL SPECIFICATIONS

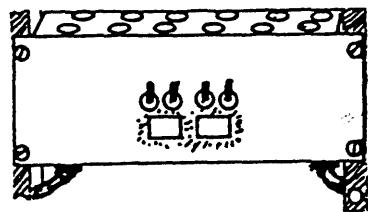

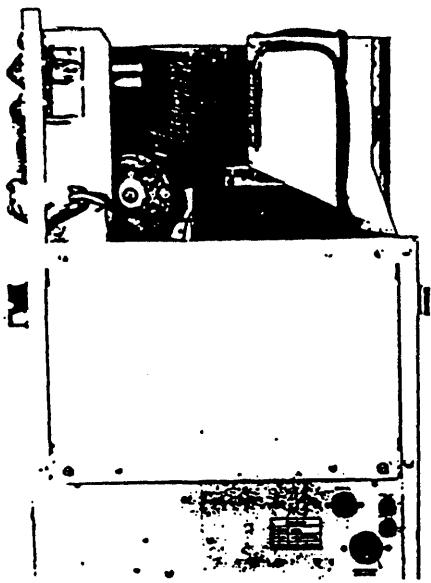

Data density	7 track - 200/556, 556/800 CPI 9 track - 800/1600 CPI
Number of tracks	7 or 9 read after write
Format	NRZI/PE IBM-compatible
Tape speed	75 IPS
Instantaneous speed variation	±3%
Long term speed variation	±1%
Interchannel displacement error	150 $\mu$ inches max 800 CPI 200 $\mu$ inches max 556 CPI
Read data	NRZI 7 or 9 data output levels deskewed with read strobe PE 9 output levels peak and envelope detected
Start/Stop time	5 ms±0.5 ms at 75 IPS inversely proportional to tape speed
Start/Stop displacement	0.1875±0.0125 inches
Gaps	Externally timed
Parity	Externally generated
Tape tension	8.0 oz
Reel size	10.5 inch 2,400 feet 1.5 mii 0.5 wide tape
Drive system	Single capstan 180° wrap
Tape buffer	Vacuum column
Tape detection	Capacitive
Rewind speed	200 IPS nominal
Electronics	TTL
Tape unit interface	TTL industry-compatible low true

DATE	SEPT. 19. 1984	SHEET 02 OF 02	

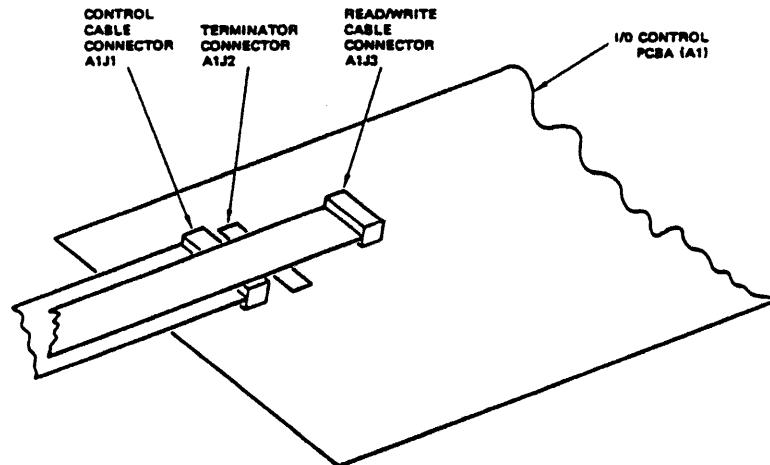

# CAPRICORN 330

DAISY-CHAIN CONFIGURATION

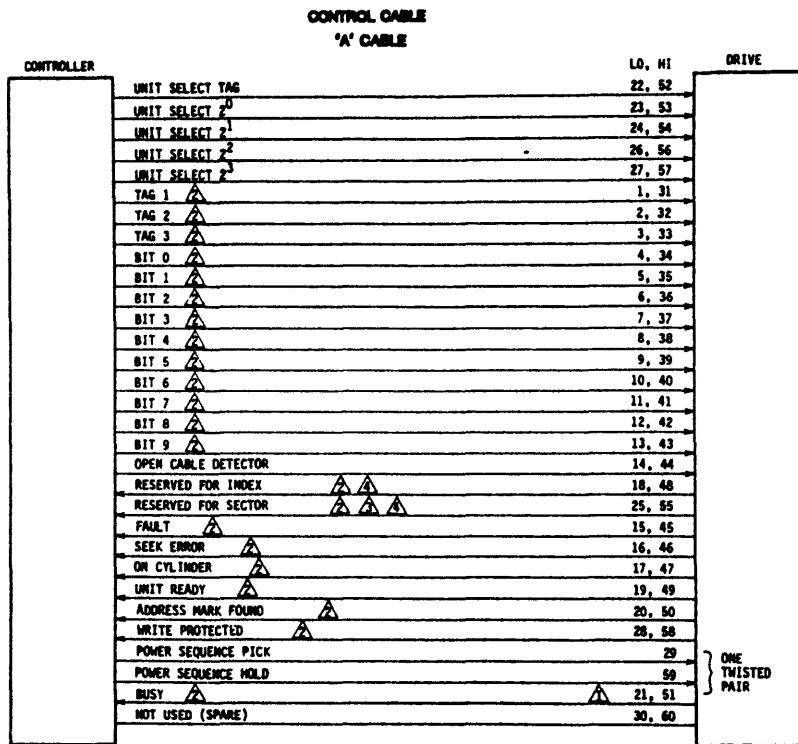

A. LOCATION OF I/O CONNECTORS

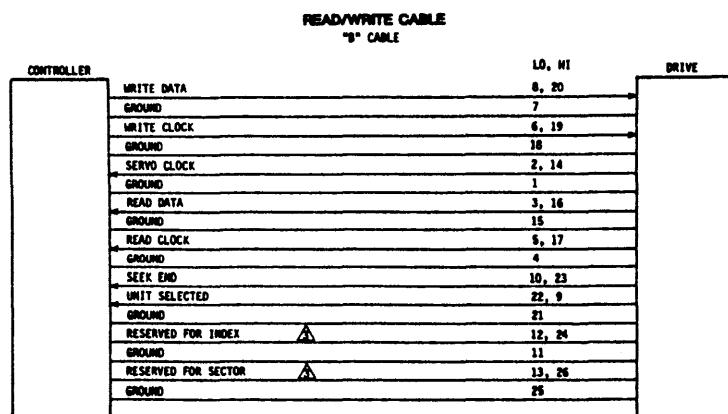

B. SINGLE-DRIVE SYSTEM I/O CONNECTIONS  
I/O Cable Attachment

# RUGGEDIZED ENGINE

NOTES:

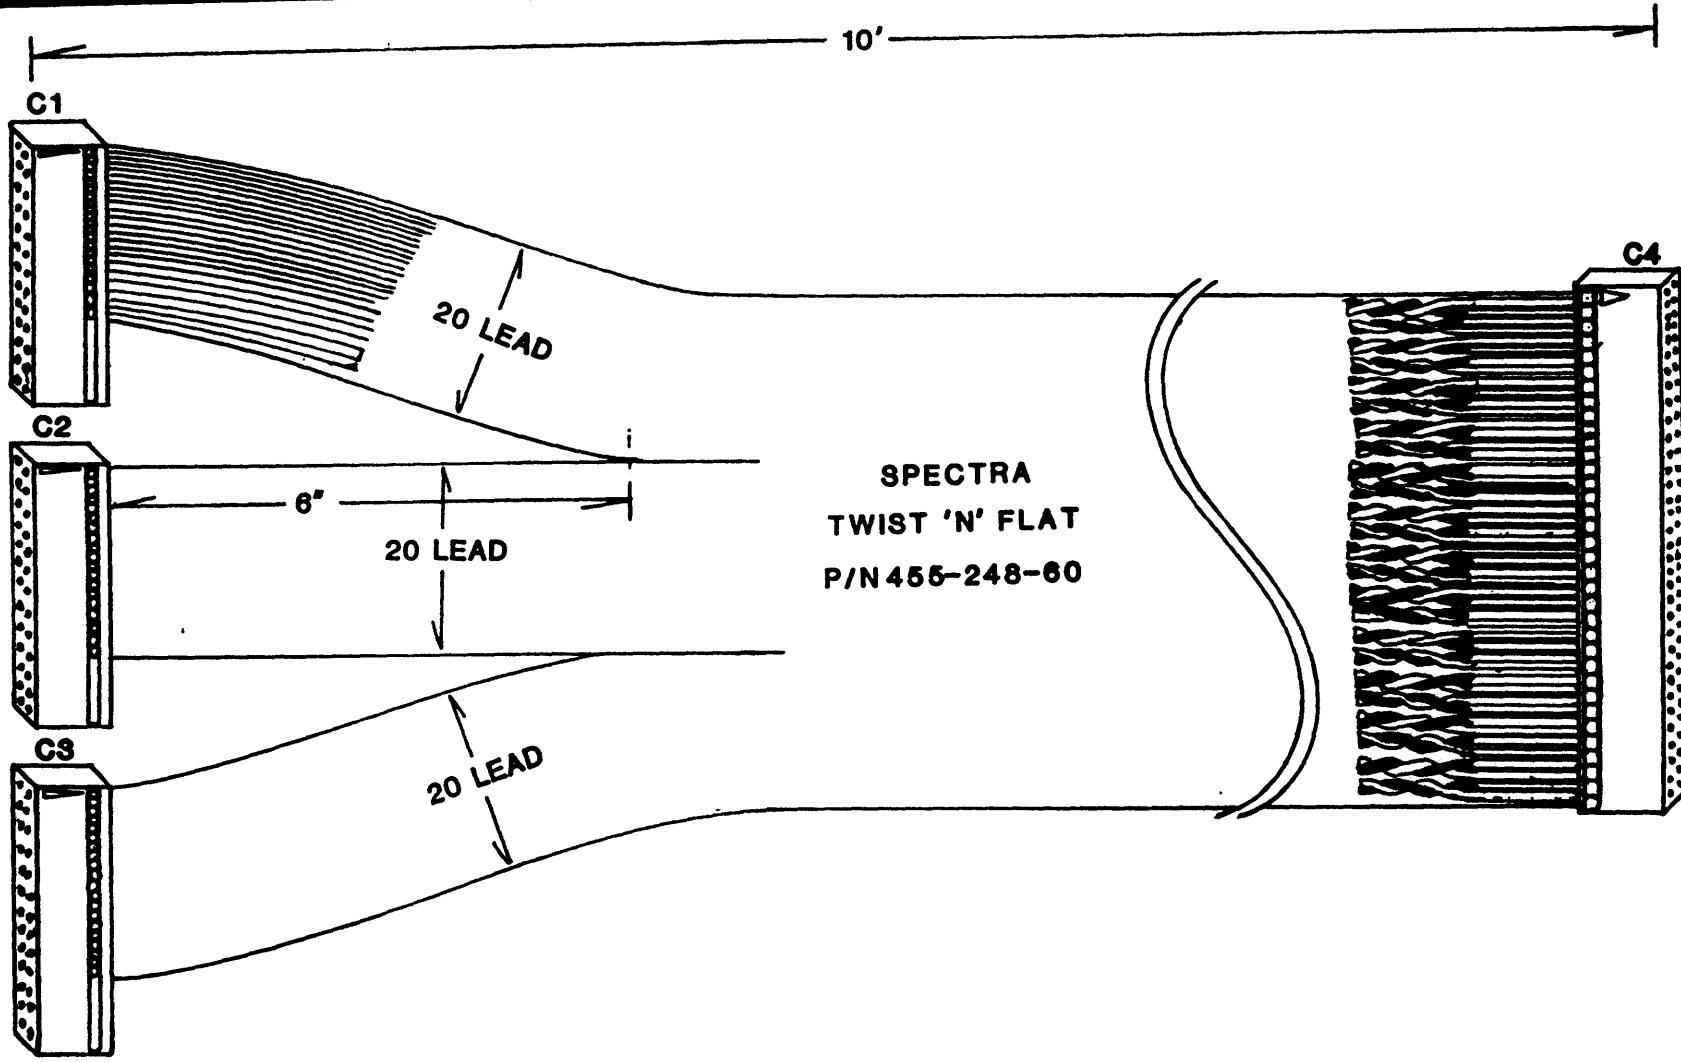

- ▲ DUAL CHANNEL UNITS ONLY
- ▲ GATED BY UNIT SELECT
- ▲ CALLED SECTOR MOD ON B29A1J/K/L/M AND B29A5E/F
- ▲ INDEX AND SECTOR MAY BE IN "A" CABLE AND/OR "B" CABLE.

NOTES:

- 1 26 CONDUCTORS FLAT CABLE. MAXIMUM LENGTH - 50 FT.
- 2 NO SIGNALS GATED BY UNIT SELECTED.
- ▲ INDEX AND SECTOR MAY BE IN "A" CABLE AND/OR "B" CABLE.

## P O W E R   D I S T R I B U T I O N

AUGMENT ENGINE Main Power Distribution panel (PDP) is located in the I/O cabinet.

Main power is supplied from two 30 amp single phase power cables. Main power is controlled by 4 circuit breakers at the back of the "PDP". Each breaker supplies a group of three single phase sockets on top of the "PDP". Each disk drive and the tape drive should be plugged into a separate group to balance the power load. Extra sockets are available for the console and Operator's terminals, tape formatter, micronode, and other small loads. All input power passes through a \*RFI filter in the "PDP".

Other local power breakers are one each device and in the CPU cabinet - see page #2

\* Radio Frequency Interference filter

POWER DISTRIBUTION PANEL

LOCAL CIRCUIT BREAKER DESCRIPTION

CPU CABINET

- \* bottom/ Backplane-Pin side (under false air intake)
- \* 2 pole breaker

    1. Separate Console power supply

- \* SWITCH

    1. Power supplys to backplane

I/O CABINET

- \* Disks

    1. One breaker each at rear

- \* Tape

    1. On/Off Button on front

- \* Tape Formatter

    1. No local power switch

- \* Micronode (PDP 11/23 or 11/02)

    1. On/Off switch at rear

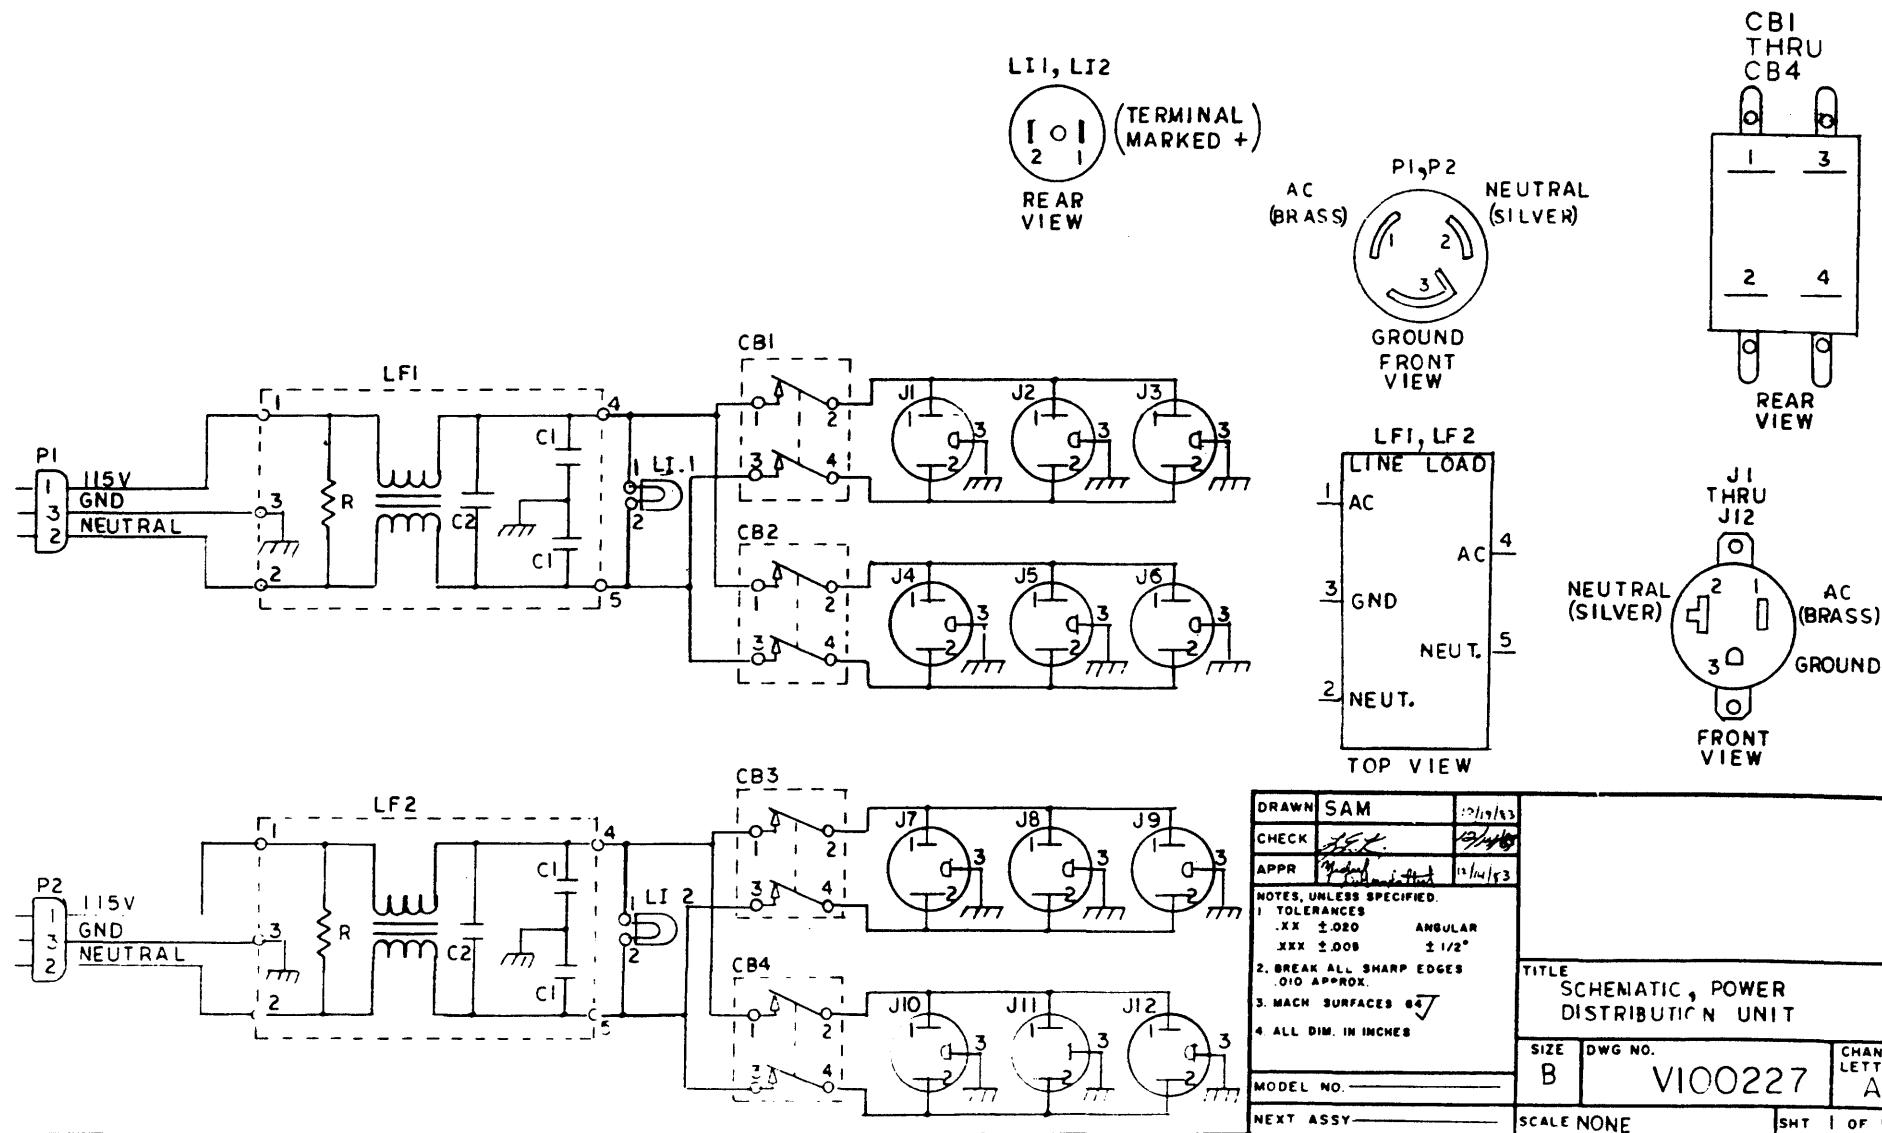

- \* PDP

    1. See Page #1

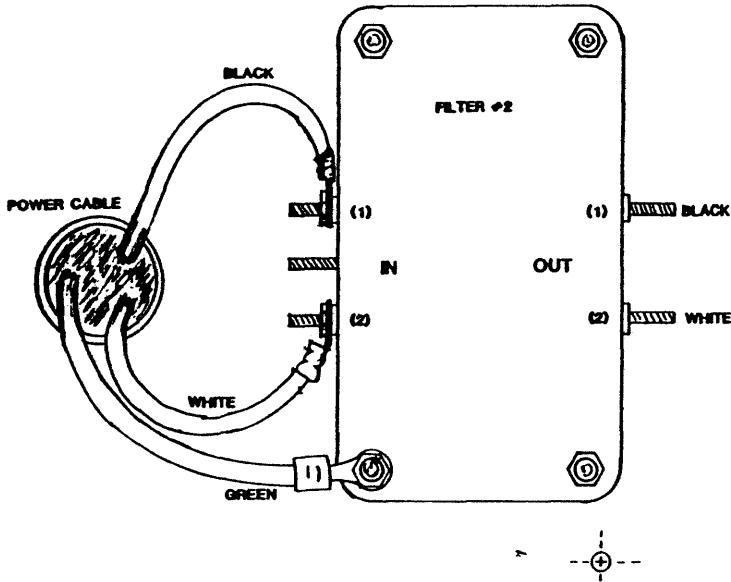

NOTES, UNLESS OTHERWISE SPECIFIED.

1. TERMINAL/PIN DESIGNATORS ARE SHOWN FOR REFERENCE AND WIRING PURPOSES AND MAY NOT APPEAR ON THE PARTS,
