VISTA-S6

The fastest color flatbed scanner!

The fastest color flatbed scanner!

The High Speed, Single Pass Color Scanning Solution

Image Quality

The Vista-S6 is a single pass, high-speed 4800 dpi, 24-bit color flatbed scanner, that delivers professional quality images. This multi-function scanner features fast scanning speed and accurate image quality. The Vista-S6 also features cold cathode technology with sealed optics for particle-free scanning.

High Speed Scanning

The Vista-S6 delivers high speed with a SCSI-II interface, a 256K bus caching buffer and micro-stepping optical transmission for ultra fast scanning throughput.

Expandability

Pair the Vista-S6 with the powerful automatic document feeder option. The Vista-S6 is highly expandable for users working in document management. The Vista-S6 automatic document feeder performs at high speeds for scanning multiple documents up to 50+ pages of text.

The Vista-S6 also provides an optional transparency adapter to scan films, slides, and transparencies. The transparency adapter option allows you to conveniently scan transmissive art as large as 8" x 10".

Powerful Partnerships

Teamed with powerful scanning software, you can create whatever you can imagine. Design and produce color or black-and-white images, right at your desk. Just scan in an image, add or correct color, perform delicate image retouching, import illustration files, create duotones, tritones, and more.

The Vista-S6 comes bundled with VistaScan, a simple-to-use and innovative scanning interface which automates scanning controls for a single-step operation. Other functions such as auto-density determines highlight and shadow values; descreen removes moiré patterns; and quality scan calibrates the scanner for best scanned images.

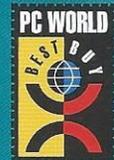

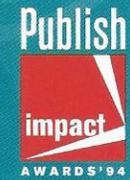

With MagicMatch

MagicMatch is a new color calibration software program designed exclusively by UMAX for achieving precise color correction and calibration. Primary among its features is a reflective IT8 calibration target which is used to produce the most accurate color by allowing the user to fine-tune scanned images to closely emulate the colors of the original. MagicMatch ensures true accurate colors, scan after scan.

Vista-S6 shown with optional Transparency Adapter (UTA-V6) and Automatic Document Feeder (ADF-V)

UMAX Products have won the following awards:

FEATURES

- Single Pass Scanning**
- 24-Bit Color**
- 4800 dpi**
- Cold Cathode Lamp**
- Sealed Optics**
- SCSI-II Interface**
- Fast Throughput**
- VistaScan®**
- MagicMatch®**
- Options**

BENEFITS

- Accurate color registration and faster scanning.
- Capturing 16.8 million vivid colors
- High resolution for smooth images.
- Maintenance free operation.
- Dust free for superior image quality.
- Easily connects to PC or Macintosh.
- Micro-stepping motor coupled with I/O buffer
- Powerful, easy to use interface for maximum productivity.
- Color correction for accurate color output. Incorporated with Kodak color technology.
- Optional Transparency Adapter for film, slides and transparencies and Automatic Document Feeder holding up to 50 sheets are available.

SPECIFICATIONS

Hardware Resolution	300 x 600dpi
Maximum Resolution	4800 x 4800dpi with UltraView®
Maximum Document Size	8.5"x11.7" (216 x 297mm)
Scanner Speed	Color: 21 sec., 200dpi, Letter (Native speed; actual speed may vary)
Input/Output Buffer	256K byte
Color Scanning Method	Single Pass, tri-linear CCD
Scanning Modes	Color Mode: 24 bits per pixel (internal) Lineart Mode: 1 bit per pixel Grayscale Mode: 8 bits per pixel (internal) Halftone Mode: 1 bit per pixel
Scanning Settings	Scaling: 1% to 1600% in 1% increments Resolution: 1dpi to 4800dpi in 1dpi increments Highlight/Shadow: 256 steps
Hardware Interface	Built-in SCSI-II interface/ASPI compliant
Software Interface	TWAIN compatible for PC and Plug-in for Macintosh
Power Requirements	Voltage: 110/240 VAC Frequency: 50/60Hz Consumption: 50W Max. w/ UTA-V6 connected
Environmental Ranges	Operating Temperature: 10°C-40°C Relative Humidity: 20%-80%
Dimensions	13.2" x 20.7" x 4"
System Requirements	Macintosh, PC and Compatibles
Net weight	17.4 lbs.
