

UNIVAC 90/60 and 90/70 Price Change Announcement

Sperry Univac joined in the latest round of computer price hikes in October 1975 by announcing an increase of 9 percent in the basic monthly maintenance prices for all UNIVAC computer equipment with the exception of the 1700 Series and 1800 Series keypunch equipment. An increase of 5 percent in the monthly rental prices of all UNIVAC terminal products except the Model 3760 Communications Controller and the Uniscope 300 Communications Terminal was also announced. Rental and purchase prices for all other computer equipment remain unchanged. However, UNIVAC also put into effect substantial *reductions* in the purchase and rental prices for most of the main memory increments for the 90/60 and 90/70 computer systems. The new prices are as follows:
