

Xerox PARC – an innovation ecology?

Didn't you guys fumble the future
and give it all to Apple??

What question did Arthur D. Little fail to ask that
caused IBM to turn down buying the patent rights?

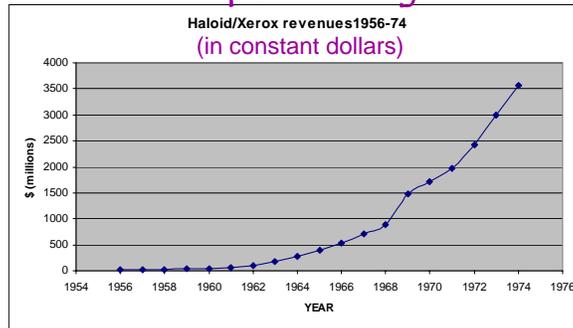

914 copier

ah, a radical innovation changes
our work and social practices.

Learning: Think deeply about network effects.

Growth of Xerox outpaces the growth of Microsoft

After 15 years, Microsoft was about 70% of what xrx was.

In radical innovation – tech & marketing often need to be creatively coupled.

Fantastic wealth created because of TWO complementary innovations – one tech, the other marketing.

The Art of Seeing Differently Palo Alto Research Center (PARC)

pioneering new frontiers for the digital age

PARC fulfilled its original charter:
the architecture of information
and the office of the future

ethernet
distributed
computing
object-
oriented
programming

bit-mapped
display
windows,
Word,
icons,
folders
wysiwyg

and created the modern
xerographic laser printer

Building the foundation for the
(Digital) Document Company

and then marched on

Social computing, MOOs, Ubiquitous computing
Smart matter, collaborative filtering, DRM, Liveboard
tablet computing, mems based printing, ePaper, -, -,
and some spin outs. - SPL,

Who Are We?

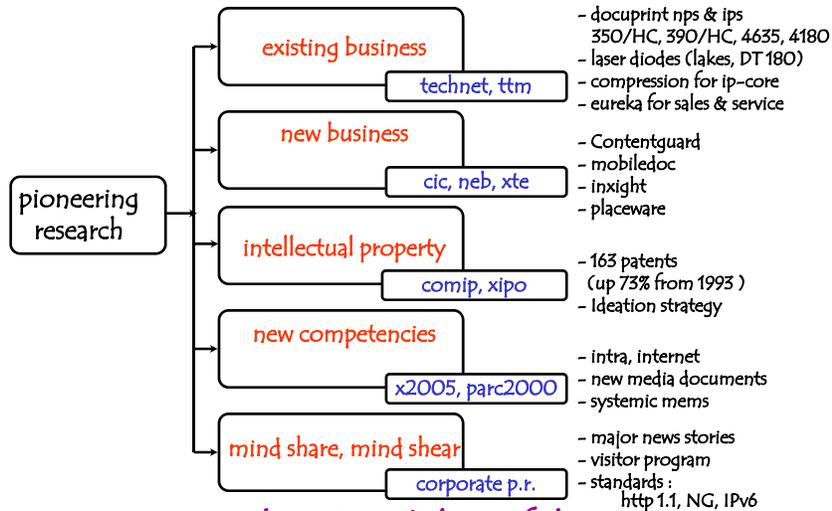

Disciplines	Countries	Universities
(atoms to culture)	(27 countries)	(60% Phds)
physics	north america	Stanford
materials science	central america	MIT
electrical engr	south america	Berkeley
computer science	europa	CMU
mathematics	asia	Princeton
psychology		Harvard
linguistics		Cornell
anthropology		Cambridge
design		UCSB
art		+many others

budget ~ \$55m

size ~ 325 folks (including post-docs)

1995 or so

paths for creating value

Increasing the adaptability of the corporation
(1/3 of 1% of revenue → genetic variance)

How We Work

core values

- * bold but grounded
- * inter-disciplinary
- * honoring the emergent
- * passion for impact

we strive to hire:

- * those with deep intuitions
- * the creative
- * those with a passion for impact
- * risk takers

style

- * radical (both meanings):
 - 1) go to the root
 - 2) think out of the box

style prime

- * QTL⁴:
 - 1) link
 - 2) listen
 - 3) learn
 - 4) lead

pioneering research: opening up new frontiers

Key Insight

At 1/3rd of 1% can almost be viewed
as a round-off error
and thus doesn't need adult supervision

stay small – but large enough
to achieve critical mass
and be fundamentally unpredictable
(failure permitted)

PARC Themes

Knowledge Ecologies:
Content

Community

Networks and
Documents

Smart Matter

Document Tools and Practices to Support
Knowledge Creation and Use in
Organizations

Secure
Document Services on the Internet

Combining Computation and Matter at
New Scales and Revolutionizing Xerox
Product Competency

Early Mantra

Build what you need – use what you build

Ah, you had to eat your own dog food..

The Alto (1974 or so)

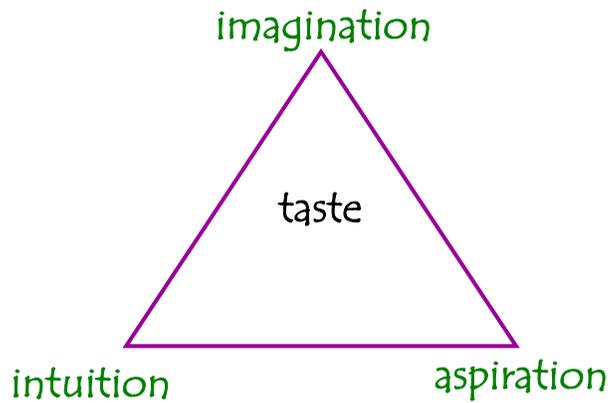

Designed to be experimented with.

Deep Focus on the Soft Stuff

Subsidized and great cafeteria
Cross disciplinary teams nearly always
Long lunch tables – so disciplines ate with each other
Wall to wall whiteboards near all the coffee machines
Coffee machines on ether net
Labs never larger than 60 people, usually 45.
Heavy use of intern program for hiring
High rate of failure expected.
Never micro managed.
Big audacious projects the norm – 15 folks or more for multi years
Craft folks appreciated as much as researchers.. (treated the same)

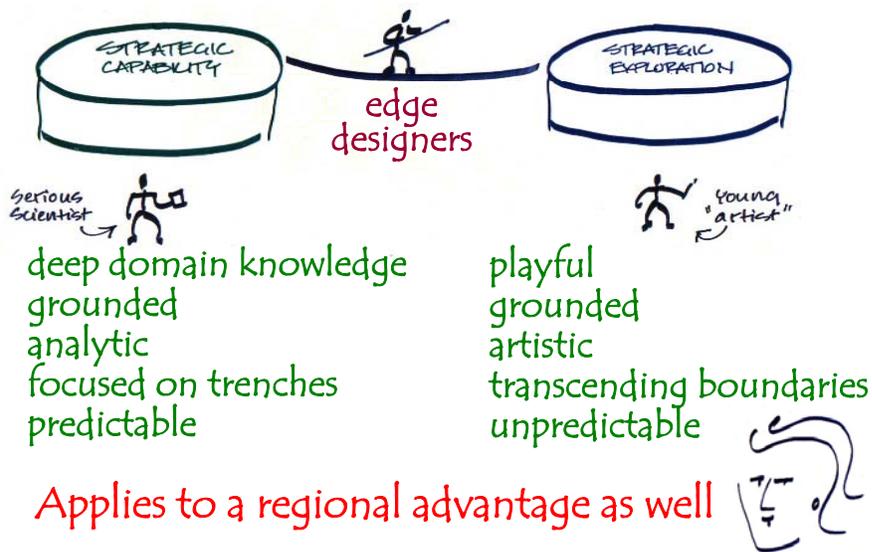

War for Talent & Whom We Sought

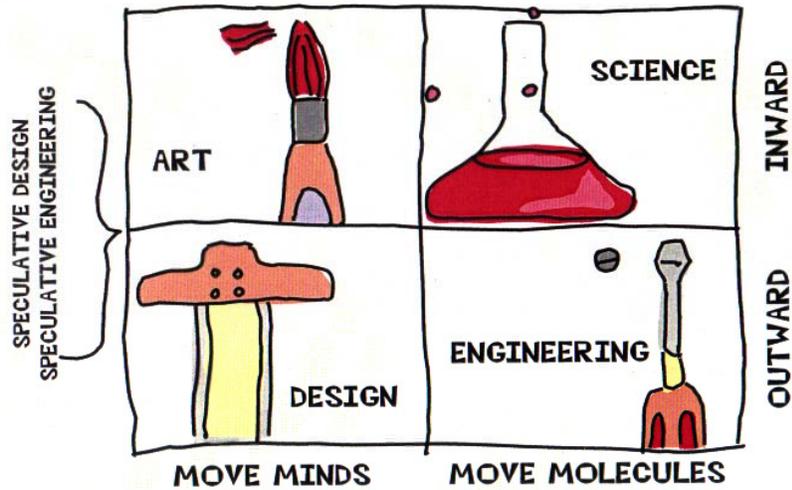

Never looked at a transcript

The Innovative Organization: productively bridging two worlds

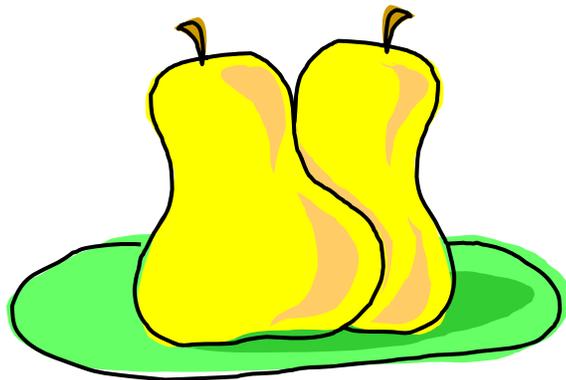

The Secret Receipt

SUCCESS: ALL FOUR COMBINED

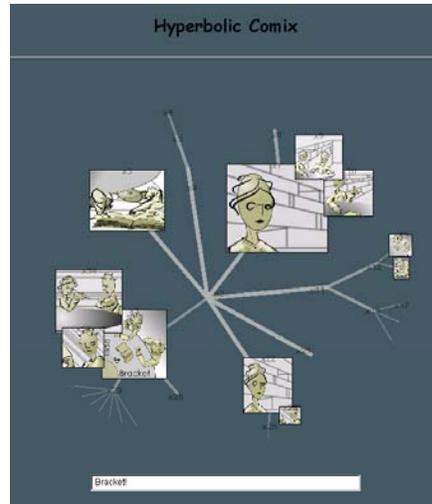

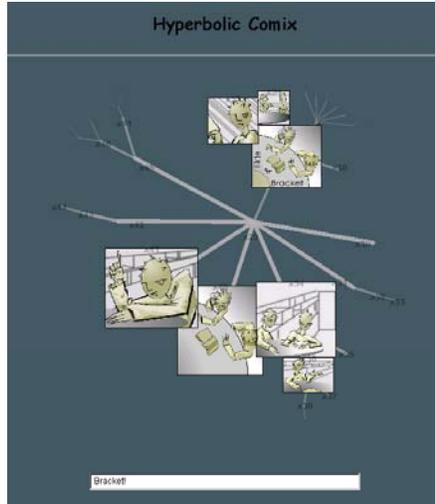

Rich Gold & Anne Balsamo

PAIR: PARC ARTIST IN RESIDENCE PROGRAM
Technologies of Imagination

Pairing Artists and Scientists, One on One,
Using Technology as a Common Language.

Hyperbolic Comic Browser/Book

Tunnel Vision Leads To Tunnel Design

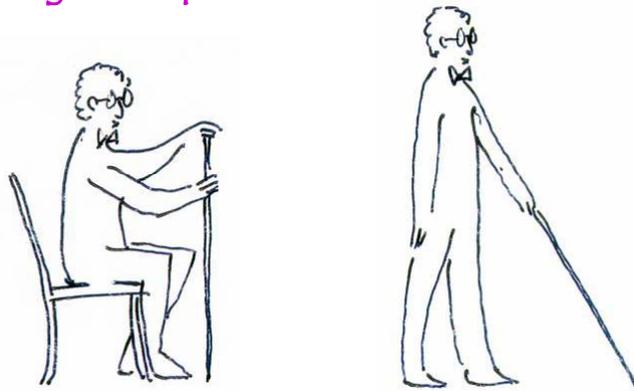

Individuals
Information

Communities
Communication
Context

Honor the Periphery

Metaphors/Images & Stories
help orient the mind
and the organization

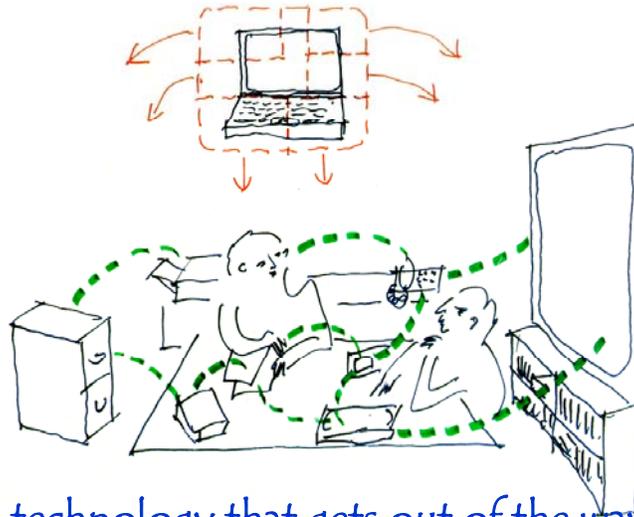

A guiding metaphor: The Blind Man & the Cane

Ready-at-hand: the handle disappears. (Heidegger)

Reaching thru the 'interface' to touch the world directly
almost like a prosthetics – reaching thru the interface to
the subject matter itself..

Taking Computing out of Computers
and embedding it in the world around us

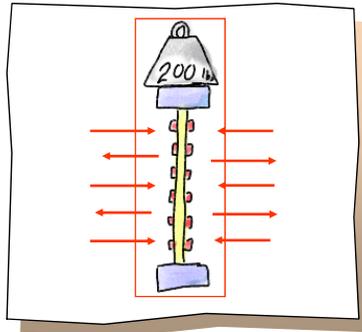

technology that gets out of the way
the essence of the ubiquitous computing movement

Automobile or
4 wheel computational platform?

Dozens of computer – sensor/actuator systems –
all in service of you, sensing when you are in trouble and
seamlessly stepping in to help. The Ultimate Experience??

Replacing Mass with Computation using a dynamic auction-based control system

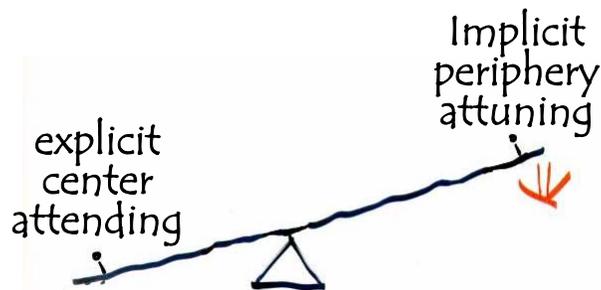

smart column

Hmmm, bringing computation deeply into the physical world.
Beyond PID type controllers – almost mimicking human muscle??

The Need for Balance the conscious & the subconscious

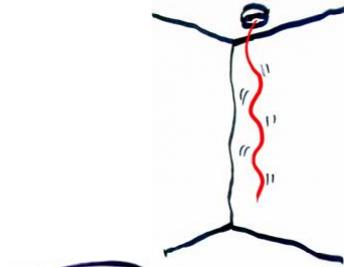

Subconscious? This is weird, jsb.

Steps toward attunement

The dangling string
(indicator of ether traffic)

The water fountain
(indicator of stock prices)

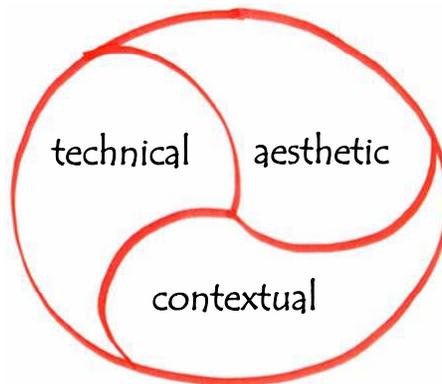

Thanks
Natalie

Things that
think want
to link!

Some guiding metaphors for designing CALM technology

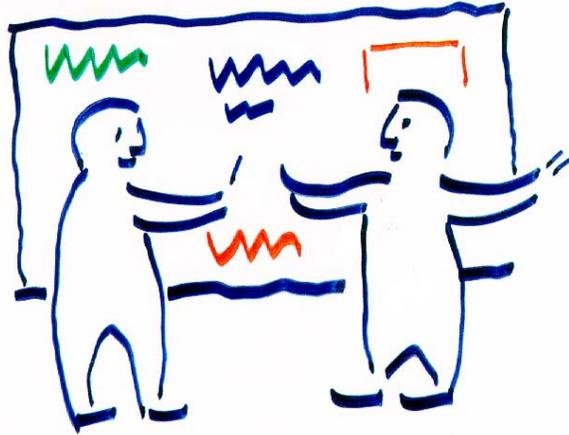

The key is the
rich interplay of
3 domains.

Taste
matters!!

Shoulder to Shoulder Computing

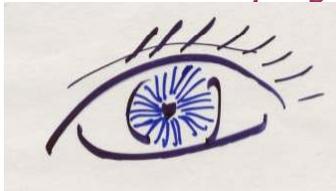

Might this help to explain SL's apparent success?

Turning a constraint into a resource?

Reconceptualizing how to scan documents.

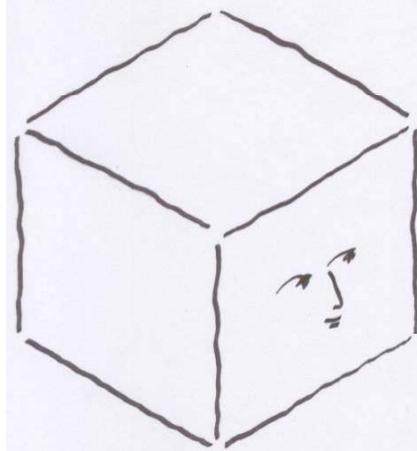

Leverage slop rather than trying to eliminate it

Learning: We can learn bunches from natural systems

If god were a Xerox engineer what would people look like?

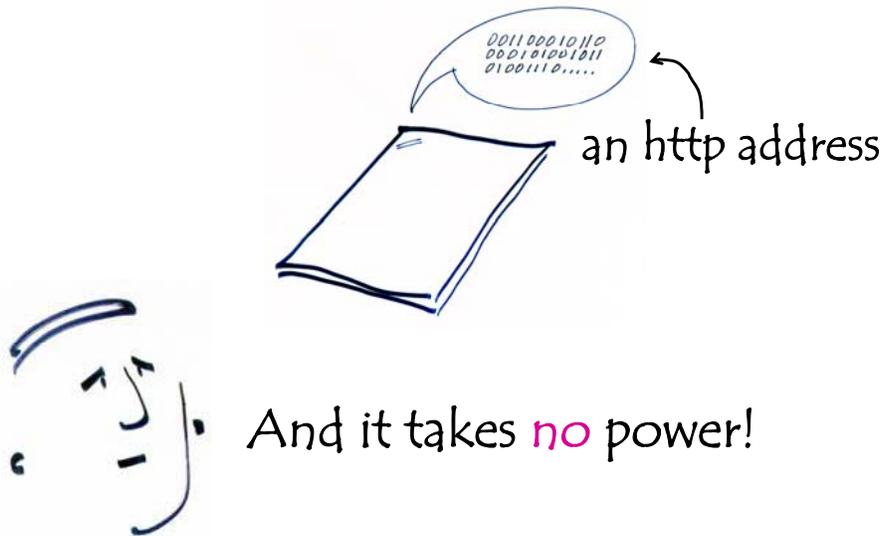

Guides to the Unknown

The way ahead is to look around, not just ahead.
jsb/pd

The future is already here just not evenly distributed
William Gibson

Fortune favors the prepared mind
Louis Pasteur

Smart Staples -- eTags

Keys to Innovation

"Thus, the task is not so much to see
what no one yet has seen
but to think
what nobody yet has thought
about that
which everybody sees."

Arthur Schopenhauer 1788-1860

Beware

"The real difficulty in changing any enterprise lies not in developing new ideas, but in escaping from the old ones"

John Maynard Keynes:

Wisdom can stultify innovation. The more experience you have the more you know why something can't be done.

Why did Xerox not grok the significance of the PC?

Steve Jobs got it in a nano second.

The Alto

Thank You
