Make the most of your investment

Original HP accessories

Protect your investment with the assurance provided by original HP accessories.

When our clients buy an HP Desktop, Notebook, Handheld iPAQ or Workstation, they know they are acquiring a quality product that will meet their productivity and performance needs.

Just as our clients trust HP to deliver full solutions, they can also trust they will receive the same quality and reliability from our accessories.

Whether it be the first time you purchase our products, or you need to keep in pace with the growth of your business, HP can offer you a full solution, whatever your needs.

1) Proven quality

Just as with our equipment, HP performs extensive quality tests on each accessory with our brand name on it. Our engineers work for many hours on testing the quality of each part, ensuring that our clients receive the best quality possible.

2) Guaranteed compatibility

When buying HP accessories, you can rest assured that each accessory is certified and compatible with your HP equipment. Don't waste time or jeopardize the productivity of your business by purchasing accessories that are not designed for your equipment.

3) Common accessories

HP accessories are designed to be compatible with the different products within a family. For example, the HP Travel Battery is compatible with practically all the products within the HP business notebooks family. This makes it possible to simplify the process of purchasing accessories, reduce the spare parts inventory for your business, and the costs incurred due to expensive repairs and dead times.

4) HP Innovation

HP is known for being a company that always provides innovative solutions for your business. We invest 4 billion dollars annually in research and development, and we currently have 17,000 patents worldwide.

Customization services

HP PC customization services are a quick and easy way to improve your return on investment in personal computer equipment. You can save time, work and money by ordering the customization of your equipment from HP, thereby obtaining productivity straight from the cash register.

At HP we help you:

- **Manage your software image** – HP can load the image into your systems, create a new and customized image, or modify the existing image.
- **The image may be delivered in recovery CDs if desired** – In any case, you can trust HP's standardization services to ensure the full functioning of your equipment, with the image that your company uses.
- **Customizing the BIOS in your equipment** – Change the standard configuration of your equipment's BIOS directly from the production line, or from previously manufactured equipment.
- **Integration of system hardware** – Save time and stop worrying – let HP incorporate third party components into your systems.
- **Bulk pack** – Save space and throw away less by consolidating the delivery of your desktops in one box (boxes for 8 sets).
- **Labeling your equipment** – HP can help you fully monitor your inventory, both physically (by designing your labels or using those that you prefer) or electronically (saving a fixed asset number in your equipment's BIOS).
- **Pad Printing:** Customizes your equipment by means of the printing of your company's logo in the equipment chassis.

Notebooks

HP recommends Microsoft® Windows® XP Professional.

Why buy an HP Notebook?

- **Security:** with the set of tools provided by HP, you can be confident that the integrity of your information is preserved.
- **Ease of use:** Intuitive equipment that allow you to obtain the maximum benefit from your advantages.
- **Reliability:** Designed in accordance with the highest quality standards, with the mobile user in mind.
- **Excellent prices:** Highly accessible models that adapt to your company's budget.

Immediate delivery:

You no longer need to wait for your product. With HP you get your notebooks immediately.

Why is security important for my business?

- Companies annually lose thousands of dollars due to information theft from their organizations, by means of both device theft and non-authorized access.
- Have you thought of the risks that your business would incur if you compromised confidential information?
- HP offers systems that provide the highest level of security, offering a competitive advantage and avoiding unauthorized access to your information
- With HW and SW HP ProtectTools, you can:
 - Add an additional security level to your equipment by means of a Smart Card.
 - Define access alternatives: fingerprint, written access password, Smart Card
 - Rely on the convenience of only one electronic signature that automatically recalls the different user passwords and access passwords for each application, Web page and protected network resources.
 - Encrypt whatever information you wish by means of the TPM Security Chip.
 - Protect your information against unauthorized access.
 - Configure the user access passwords for BIOS users and administrators
 - Flexible tool with which the client configures the desired security level
- HP ProtectTools is included in all portable HP equipment (nx and nc lines) without additional cost

HP Compaq tc4200 Tablet PC

High performance, compatibility and mobility with the versatility of written features

- Intel® Centrino™ mobile technology
 - Intel® Pentium® M 7501 (1.86 GHz) processor
 - Intel® PRO/Wireless 802.11 b/g card
- Microsoft® Windows® XP Tablet Edition
- 12.1" XGA display
- 512 MB standard memory, expandable up to 2 GB
- Can be used as a Tablet PC or regular notebook with integrated keyboard
- Wireless Bluetooth® technology
- 3-year limited warranty

Increase the protection of your HP Compaq tc4200 with 3-year 9x5 HW support and a response time for 3 years (UJ7840E)

Models start at 4.63 lb.

N/P: EB367LA

Desktops

The HP Desktops line is designed to offer your business the fullest range of productivity solutions, with the best combination of functions and price.

Why buy an HP Desktop PC?

- It increases productivity at the office and provides the lowest total ownership cost
- It offers a problem-free computer network environment and the tools to administer it.
- It provides processor options in order to execute current and future applications.
- **Support:** HP has been classified as the #1 company with regard to client satisfaction by IDG's Computerworld magazine**
- **Quality:** HP PCs undergo 75,000 hours of testing.
- **Price and availability:** Excellent prices that adapt to your budget

Immediate delivery:

You no longer need to wait for your product. With HP, you receive your desktops immediately at your address together with a limited guarantee.

For more information, see: www.hp.com/car/buy

³ All devices must include Bluetooth technology for data synchronization. Wireless connections may require third party services. Verify requirements and local availability. These prices do not include the VAT.

Servers

Is this the right time to buy your first server? If your business is growing, your technological needs are probably growing as well.

When you incorporate one or more servers into your company's network, you immediately optimize your employee's productivity, increase the reliability of your systems, and reduce maintenance costs. A new HP server will give you the fundamental base for your future business growth, with a platform that is prepared to grow easily and adapt to new users, data, and applications.

Step 1 – Choose the server family

The ML Series offers you:

- Maximum expansion capacity
- Flexible, stable, and high quality data management and protection
- Tower and rack options

The DL Series offers you:

- More power in less space
- High power and performance
- Thin and flexible design for rack environments

Step 2 – Choose the solution

The 100 Series: simplicity and power

- In order to share the network resources, Internet access, and filing and printing functions

The 300 Series: Reliability and performance

- E-mail and instant messaging, databases, and applications with high computing requirements
- Maximum network availability and protection

Back up your data

Backup solutions for entry-level HP servers offer you an exceptional value, with DAT 72 and DAT 40 Tape Drive units that are ready to install.

HP OpenView Client Configuration Manager

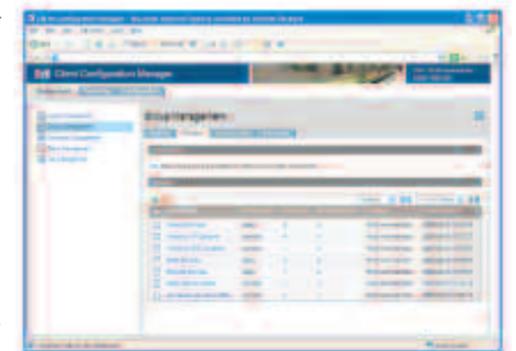

HP OpenView Client Configuration Manager is an integrated solution that resolves immediate administration needs in the configuration of company PC software, while providing a solid base for future requirements.

Product overview

HP OpenView Client Configuration Manager is an easy-to-use, out-of-the-box solution for managing your PCs, providing integrated inventory, software deployment and patch management functionality. Based on proven technology, the product enables IT to gather and maintain an accurate inventory of your PCs and reliably deploy the right applications/content and patches to the right desktops and mobile laptops at the right time using an integrated web-based management console. Enterprise IT can significantly cut costs by reducing help-desk calls, desktop support visits to LAN-based or mobile users and many routine software deployment and maintenance tasks.

Key features and benefits

- **Integrated software management**
 - **Inventory collection**—Accurately inventories installed hardware and software assets on managed devices
 - **Security patch management**—Identifies and assesses vulnerabilities, deploys patches and performs continuous verification to protect PCs from security exposures
 - **Software distribution**—Distributes software and updates to locally and/or remotely connected end users
- **Quick time to value**—Installs in under an hour and provides out-of-the-box functionality for common management use cases
- **Ease of use**—Enables administration from an integrated web-based console, and is designed for self-deployment and self-learning
- **Proactive Control**—Provides built-in actionable reports for inventory, security and Operations

For more information about HP OpenView Client Configuration Manager, contact your HP sales representative or visit <http://managementsoftware.hp.com/solutions/pc>

monochrome printers

Are your old printers causing trouble?

Update to a new HP LaserJet Printer. It is likely that you will save more than what you spend today on your printing costs.

With a new HP Monochrome printer, you'll have:

- Higher speed
- More processing power
- Better print quality
- Efficient management of network printing
- Greater printing quantity per minute
- Savings in costs

Extend your warranty to 3 years with next business day on site (H5473E)

Accessories

Whether you need a personal printer for your small business, or a high performance printing equipment for work teams, HP has the solution you're seeking.

Wireless connectivity isn't only used for networks and internet access. Advancement in wireless technology now makes it possible to create a mobile work environment with HP printing products, allowing you to:

- Have fewer cables at your office and save on cable and network connector costs
- Create a more flexible office, making equipment installation faster and reducing support costs
- Move the printers as necessary, so that your employees may be more productive

HP Notebooks integrate the latest technology in wireless connectivity.

Models with optional network connection allow you to connect wireless printer servers.

Adaptors for wireless printing, such as the Bluetooth® HP bt1300 Adaptor, allow you to print without using cables.

Color Printers

Why print in black and white when you can print in color for a great price?

NEW

With a color printer in your office, you can:

- Create your own sales and marketing material
- Add color to your essential business documents, such as your sales presentations and even client invoices
- Develop more effective communications that contribute to increasing sales
- Create direct mail campaigns and other materials that you used to require external suppliers

When purchasing a color printer, remember:

- With HP you have a full line of color printers, both laser and ink jet that adapt to your business needs and budget
- HP's technological advances allow color printers to be faster and more accessible
- HP color printers are easy to maintain and offer you professional quality images

Do you need to print in Tabloid format? Ask about our models with this characteristic.

Compatible with iPAQ's, digital organizers, desktops and notebooks

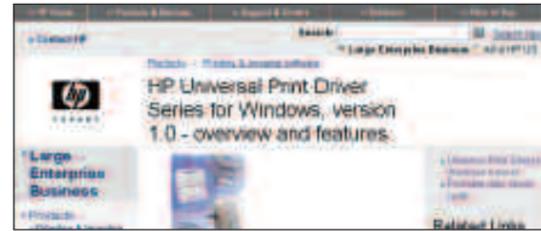

N/P: C8151A (cb)
C8152A (wf)

Multifunctional

Multi-Function Products (MFP) and All in One are the best alternative for your business, if:

are used excessively or that are not being fully put to use

- Your employees spend a lot of time transferring documents from one machine to the other, for example, from the printer to the fax machine
- You are occupying valuable office space due to having a number of machines with independent functions
- You want to improve the workflow and document exchange in your office, or make document filing more efficient, by converting them into digital files to be sent, shared or filed in digitally
- You want to replace your photocopier with a more flexible and poly-functional machine
- You wish to reduce your maintenance and support costs related to the management of several machines with independent functions

In order to make the most of the mobile work experience, the users should have access to network print resources. The greatest difficulty in accessing printer resources has been the support for print drivers. Notebooks are generally configured to support a limited number of printers. For this reason, HP developed the **Universal HP Print Driver for Windows**.

The **Universal HP Print Driver for Windows** is always accessible from Windows applications and allows users to print on any HP printing device with HP PCL5 HP postscript emulation, in a faster and easier way.

The driver is included in some HP and Compaq notebooks and tablet PCs and is **available for free download at the HP website at www.hp.com/go/universalprintdriver**
