

Dual-Input Power Distribution Unit

Distributes fault tolerant power to industries with mission-critical systems

Because 24x7 availability is a must in today's business climate, more and more businesses are equipping their data centers with redundant systems and dual AC inputs to virtually eliminate downtime due to power outages. The innovative new Compaq Dual-Input Power Distribution Unit (PDU) not only provides efficient power distribution, it also provides fast, automatic AC failover from one input source to the other in case of an emergency. Plus, with its unique side-mounted space-saving design, it occupies zero space in the rack.

As a zero-U*/single-U dual-input PDU with a built-in AC transfer switch, it distributes redundant power without using valuable rack space. By delivering rapid switching between two independent AC power sources for uninterrupted mission-critical system operation, it protects data and provides peace of mind wherever information is at a premium.

Key Features

- > Fault-tolerant, automatic AC line transfer switch capability
- > Rack-mountable PDU with 24 A peak capacity at 200/240 VAC
- > Small 0U or 1U form factor
- > Distributes up to 24 A of AC load
- > 2 attached input line cords for dual AC input power
- > Overload circuit protection provided by 4 x 10 A circuit breakers
- > Front Panel LED indicators
- > 12 output receptacles
- > Surge and spike protection

*1U=1.75"

Model Selection Matrix

	North America/Latin America	Europe, Middle East, Africa, Asia Pacific and China
Part Number	191186-001	191186-B31
Nominal Voltage	200 to 240 VAC	200 to 240 VAC
Current Capacity	24A	24A
Input Connections	(2) NEMA L6-30P	(2) IEC309 Plugs
Output Connections	(12) IEC 320-C13	(12) IEC 320-C13

The Compaq Advantage

- > Efficiently distributes redundant power to rack-mounted servers, storage units and other peripherals
- > Prevents loss of critical data and damage to valuable equipment due to sudden power outages
- > Industry-leading, versatile, space-saving design
- > Reduces the number of power cords entering the rack
- > Broadens the Compaq PDU product line

Compaq PDUs offer flexible rack mounting options. You can choose to mount them in either a zero-U or 1U configuration.

Flexible Mounting Options

Compaq Solutions

Service and Support

With our global network of 27,000 IT experts in more than 100 countries, Compaq provides the industry's most comprehensive service and support program.

We test all our products to guarantee seamless operation with Compaq systems. We comply with Microsoft PC standards to ensure compatibility with Microsoft operating systems. And we support Compaq solutions with 24-hours-a-day, 7-days-a-week technical support to make sure we deliver the performance and productivity that our customers count on.

To learn more about Compaq customer services, contact your local Compaq representative or business partner or visit us at www.compaq.com/services.

Compaq Financial Services

We provide customized leasing and financial asset management services with competitive rates, simple processing and 100 percent solution financing. For more information, visit us at www.compaq.com/ups.
