

# HP TFT7210R rack-mount monitor

## **Big monitor, small footprint**

In high-density data centers, you need to conserve space and resources everywhere you can. That's why almost everywhere you look, HP provides total rack, console and power solutions that maximize efficiency in data centers of all sizes. Consider our new TFT7210R rack-mount monitor and 1U Integrated Keyboard and Drawer. They combine into a space-saving local consoling solution that makes the most of every U.

## **17" flat-panel display in only 1U of rack space**

The ideal local consoling solution starts with the rack-mountable HP TFT7210R retractable TFT flat-panel monitor, one of the largest monitors available in a 1U configuration.

It tucks a full 17" flat-panel display into just 1U of rack space. The unique rail design even provides

plenty of room to mount a KVM switchbox behind the unit.

This monitor delivers more functionality with fewer demands, thanks to advanced TFT technology, which uses less power and emits less heat than traditional monitors. What's more, it features on-screen display in ten languages, plus a brilliant screen that's easy to read (and easy on the eyes). The screen can even be viewed with the rack door closed when the monitor is in a vertical position.

Want the advantages of these space-saving server consoling solutions in your data center? Learn more about the TFT7210R retractable TFT flat-panel monitor and integrated keyboard and drawer at [www.hp.com/products/rackoptions](http://www.hp.com/products/rackoptions)

The new HP TFT7210R rack-mount monitor with its 17" flat-panel display is the largest rack mounted monitor that fits in a 1U space.

# HP TFT7210R rack-mount monitor

Both the TFT7210R rack-mount monitor and all-in-one keyboard/drawer are designed to allow a KVM switchbox to mount behind them on the standard mounting rails—further maximizing rack space.

**Deploy your way**—The TFT7210R gives you plenty of configuration flexibility. It's fully compatible with all HP rack-mounted products and options. It can be deployed in our 9000 and 10000 series racks or even in third-party and telco racks with optional rail kits.

**Complete with keyboard and drawer**—The HP 1U Integrated Keyboard and Drawer provides an all-in-one, full-size keyboard and drawer to complete your server console solution. It provides just the kind of smart features you need in a busy data center, such as an easy-to use trackball mouse, rear cable management arm, and nine programmable hot keys for quick movement from one server to the next. All this fits neatly together requiring only 1U of vertical rack space.

**Handy storage**—A rugged, removable paper tray and CD holder lets you keep supplies readily available, making day-to-day work within the data center more convenient and organized for IT administrators.

**Simple yet worldly**—Fully compatible with all HP rack-mounted products, the keyboard is even available in 14 languages. And with its optional adjustable rails, data center managers can standardize on one keyboard/drawer across the organization with confidence knowing it can be deployed in almost any rack. The TFT7210R has one worldwide SKU so companies can standardize on this monitor across the globe.

**Integrated solutions**—Together with its partners, HP also offers a complete array of flexible, innovative enterprise solutions designed to help maximize server performance and simplify system management.
