## Release Notes Contents

The 64-Bit/66-MHz PCI to Fibre Channel Host Bus Adapter (HBA) is a high-performance PCI option module that connects to devices attached through either a hub-based optical Fibre Channel arbitrated loop or a switch based optical Fibre Channel fabric. These release notes include all known issues or restrictions for using the HBA within a system configuration. This document is organized into the following sections:

- RAID Platform Kits
- Enterprise Solution Kits
- Parts List

### RAID Platform Kits

The drivers included in this kit are for Fibre Channel installations that do not use Compaq RAID storage. When implementing Compaq RAID storage over Fibre Channel, please use the appropriate platform kit, which installs and configures the Fibre Channel driver.

The following table lists the available Compaq RAID storage platform kits that you can choose from to implement Compaq RAID storage over Fibre Channel.

AIX RAID Platform Kits	Part Numbers
