## How To Use This Document

The **HP StorageWorks Enterprise Backup Solution (EBS) Compatibility Matrix** provides information for designing data protection solutions, including backup/restore and archiving, that scale from entry-level workgroups to enterprise-level datacenters. It includes support for Direct Attach SCSI (DAS), Direct Attach Fibre (DAF), and Storage Area Network (SAN). It does not imply product availability. Products highlighted in yellow will be removed from the EBS Compatibility Matrix in the next release. Previous versions of the EBS Compatibility Matrix are available on the web at [www.hp.com/go/ebs](http://www.hp.com/go/ebs).

Each application listed in the EBS Compatibility Matrix is classified as either Extended Solution Interoperability or Tape Automation Compatibility. These applications directly communicate and perform I/O with HP tape automation products. See below for more information on how these applications are tested:

**Extended Solution Interoperability:** HP performs on-going interoperability and extensive solution testing to provide fully certified and supported data protection solutions with these applications. In addition to HP tape automation products; these solutions are verified with a variety of servers, operating systems, host bus adapters, switches, disk arrays, and storage software in complex, heterogeneous SANs. Detailed support information for these solutions can be found in this document.

**Tape Automation Compatibility:** Tape automation compatibility is verified and supported with these applications through a cooperative test effort with the software vendor. Tape automation support can be found in this document. Contact the software vendor for latest application version, patches/drivers, and interoperability details.

See the [Libraries and Applications](#) page for application support.

Additional technical information can be found in the Enterprise Backup Solution Design Guide and various Backup Application Implementation Guides located on the web at [www.hp.com/go/ebs](http://www.hp.com/go/ebs). For information on stand alone tape products and compatibility, go to [www.hp.com/go/connect](http://www.hp.com/go/connect).

NOTES: section contains specific configuration details

**NOTES:**

- 1) Other Operating Systems may be supported within EBS by the respective ISVs as LAN clients.
- 2) Please reference your ISV support matrices for supported application and operating system version compatibility.
- 3) ATS is not supported.

4) Refer to [EBS Design Guide](#) for configuration rules and guidelines.

5) For Boot from Tape support, [click here](#), and select the type of tape for compatibility.

6) Refer to the [EBS Design Guide](#) for details on failover configurations. For Operating Systems not listed, please refer to the ISV's web page for supported High Availability configurations.

1/8 DLT Tape Autoloader (vs80)	5.0	9.0	6.0	5.1	9.0	9.0	4.5

Application Name	Latest Tested Version	Partner Device Compatibility Pages	Recommended Tape Driver
HP OpenView Storage Data Protector	6.0	<a href="#">Data Protector HCL</a>	Native Drivers
Computer Associates BrightStor ARCserve	11.5	<a href="#">ARCserve HCL</a>	CABA Drivers
EMC Legato NetWorker	7.3	<a href="#">NetWorker HCL</a>	HP Drivers
IBM Tivoli Storage Manager	5.3	<a href="#">Tivoli Storage Manager HCL</a>	Tivoli Drivers
Symantec Backup Exec for Windows	10d	<a href="#">Backup Exec HCL</a>	BE Drivers
Symantec Backup Exec for NetWare	9.2	<a href="#">Backup Exec HCL</a>	BE Drivers
Symantec NetBackup	6.0	<a href="#">NetBackup HCL</a>	HP or NBU Drivers

**NOTES:**

Use the latest backup application maintenance release unless otherwise noted. Refer to the backup application vendor for specific patches, builds, and drivers required to support HP tape automation and virtual library products.

- 1) Backup Exec version 10d and Device Driver Installer (DDI) version 20060615 or later are required to support the HP StorageWorks MSL2024 and MSL4048 Tape Automation Libraries.

## Advanced Library Features

DAS, DAF, and SAN Support	HP Data Protector	CA BrightStor ARCserve	EMC Legato NetWorker	IBM Tivoli Storage Manager	Symantec Backup Exec	Symantec NetBackup
<b>Enterprise Libraries</b>	<b>IMPORTANT:</b> See the <a href="#">Backup Application Details</a> page for the latest supported versions of backup software.					
<b>ESL E-Series 2 Unit Cross Link</b> <sup>1</sup>	✓	✓ <sup>3</sup>	✓	✓		✓
<b>ESL E-Series 3-5 Unit Cross Link</b> <sup>1</sup>	✓			✓		✓

**NOTES:**

- 1) Other Operating Systems may be supported within EBS by the respective ISVs as LAN clients.
- 2) Please reference your ISV support matrices for supported application and operating system version compatibility.
- 3) All applications except Tivoli require updated Storport.sys KB891793 (minimum) or KB912944 (recommended). Tivoli configuratons require Storport.sys KB901371.

- 4) Please reference ISV application installation/support documents for specific driver and patch requirements.
- 5) Refer to [EBS Design Guide](#) for configuration rules and guidelines.
- 6) 3rd Party adapters require HP drivers and firmware.

**NOTES:**

- 1) Other Operating Systems may be supported within EBS by the respective ISVs as LAN clients.
- 2) Please reference your ISV support matrices for supported application and operating system version compatibility.
- 3) Refer to [EBS Design Guide](#) for configuration rules and guidelines.

- 4) EBS is not dependent on specific kernel errata levels. For required/supported kernel errata, refer to your online storage array and backup application support documentation.
- 5) 3rd Party adapters require HP drivers and firmware.
- 6) Due to tape device discovery issues, SP2 for SLES 9 is not supported.

- 1) Other Operating Systems may be supported within EBS by the respective ISVs as LAN clients.
- 2) Please reference your ISV support matrices for supported application and operating system version compatibility.
- 3) NetWare is supported with ESL libraries in a homogeneous environment only.
- 4) Refer to the [EBS Design Guide](#) for details on failover configurations. For Operating Systems not listed, please refer to the ISV's web page for supported High Availability configurations.
- 5) Refer to [EBS Design Guide](#) for configuration rules and guidelines.

- 6) COMPAQ HBAs
- 7) NetWare 5.1 and 6.0 support only.
- 8) Heterogeneous Windows and NetWare configurations require FCA-2210 HBA for access to shared tape.
- 9) MSA1000 and EVA require FCA-2210 HBA with a minimum Secure Path version of 3.0c. HSG80 arrays with FCA-2210 HBA require a minimum Secure Path version of 3.0c SP2.

**NOTES:**

- 1) Consult with your hp solutions provider for disk array SAN compatibility information
- 2) For compatibility information about the optional MSA SAN Switch, refer to the [Infrastructure](#) page within this document for support details
- 3) Supported with Fibre Channel and FATA disk drives.

- 4) LINUX and Windows support only
- 5) Windows support only
- 6) VA7xxx arrays require separate HBA's for disk and tape.
- 7) Supported with VCS 3.X and 4.X.
