For information about product availability, configuration, and connectivity, consult your HP account representative.

For additional information on Fabric Manager, refer to *HP StorageWorks Fabric Manager Version 3.0 User Guide*, part number AA-RTSKB-TE.

Fabric Manager Overview

Fabric Manager provides a graphical interface that allows the administrator to monitor and manage an entire fabric from a standard workstation. Fabric Manager can be used to manage fabrics containing integrated fabrics, in addition to individual switches.

Fabric Manager provides high-level information about all switches in the fabric, launching the Web Tools application when more detailed information is required. The launching of Web Tools is transparent, providing a seamless user interface. In addition to the ability to view the switches as a group, Fabric Manager provides improved efficiencies in the management of SANs over Web Tools alone.

Limitations

None

Known Issues

None
