Side Panel Option Kit

Second Edition (December 1999)  
Part Number 142558-022

Compaq Computer Corporation

142558-022

## About This Device

This installation card shows how to attach and remove side panels from the Compaq 9000 Series 42U or 36U rack products.

## Kit Contents

- Side panel (2)
- Hangers (4)
- T-30 screws (12)
- T-30 driver

## Rack Considerations

Before beginning these procedures, make sure you understand and follow these precautions:

**WARNING:** To reduce the risk of personal injury or damage to the equipment, be sure that:

The leveling jacks are extended to the floor.

The full weight of the rack rests on the leveling jacks.

The stabilizing feet are attached to the rack if it is a single rack installation.

The racks are coupled together in multiple rack installations.

Only one component is extended at a time. (A rack may become unstable if more than one component is extended for any reason).

### Step 1

If necessary, remove front and rear doors.

### Step 2

Attach two hangers to each side of the rack, approximately 4 inches (10.16 cm) from the edge, then hook the top of each side panel to the hangers.

### Step 3

Secure each panel with T-30 screws.

### Step 4

Replace the front and rear doors.

**Installation is complete.**
