

# MATCH DAY

Match Day is no ordinary soccer game.

Bristling with action and total immersion, the thrills and spills of football life through your Amstrad. You will marvel at the depth of play and ball control developing your skills and techniques playing by yourself or in knock-out competition. MATCH DAY... Shoot to win!

Ocean Software

Ocean House · 6 Central Street · Manchester M2 5NS · Tel: 061 832 6633

# MATCH DAY

## MATCH DAY

Der Programmcode, graphische Darstellung und Druckvorlagen sind Copyright von Ocean Software Limited und dürfen ohne schriftliche Genehmigung von O.C.L. nicht vervielfältigt, gespeichert, ausgeliehen oder über Rundschreibereinrichtungen verbreitet werden. Alle Rechte sind weltweit vorbehalten. Das Programm läuft auf SCHNEIDER Amstrand ab.

Legen Sie die Kassette mit der bedruckten Seite nach oben in Ihren Kassettenrekorder ein und überzeugen Sie sich, ob sie ganz zurückgespielt ist. Kontrollieren Sie, ob das Verbindungsstück zwischen dem EAR-Anschluß am Rekorder und dem EAR-Anschluß unterbrochen ist. Das Spiel wird wie von einer Kamera betrachtet. Die Kamera übersieht das Spielfeld automatisch. Jedes Team trägt deren eigenen Farben (im normalen Spiel sind dies rote Leibchen und blaue Hosen für Team 1, blaue Leibchen und blaue Hosen für Team 2) und besteht aus einem Torhüter, Verteidiger, Mittelfeldspieler und Stürmer. Während des Spiels geht jeder Spieler in die Fußbalträge entsprechende Stellung (d.h. dies hängt davon ab, welche Seite am Spiel ist, wo der Ball ist und in welcher Position der Spieler ist usw.).

Sie können den Spieler, der im Besitz des Balls ist, oder jenen, der sich an der besten Stelle befindet, um den Ball zu bekommen, kontrollieren. Dieser Spieler wird am Schirm durch seine Schuhe hervorgehoben, deren Farbe sich auf Orange ändert. Mit diesem Spieler können Sie den Ball dribbeln, Angriffe durchführen, den Ball zu passen, mit dem Kopf stoßen, decken, Cornerstöße, Osteinwürfe und praktisch alle möglichen Fußballtricks ausführen.

## LADEN

### SCHNEIDER CPC 464

Die zurückgespielte Kassette in das Kassettendeck stecken, RUN" eingeben und dann die ENTER-Taste drücken. Den Anweisungen auf dem Bildschirm folgen. Ist eine Diskette angeschlossen, ITAPE eingeben, dann die ENTER-Taste drücken, RUN" eingeben und ENTER-Taste drücken. Sollten Schwierigkeiten auftreten, die Anweisungen in Kapitel zwei befolgen.

### SCHNEIDER CPC 664 & 6128

Gesetztes Kassettenspieler anschließen und darauf achten, dass die richtigen Kabel gemäß den Anweisungen angeschlossen wurden. Das zurückgespielte Band in den Kassettenspieler stecken und ITAPE tippen, dann die ENTER-Taste drücken, RUN" eingeben und ENTER-Taste drücken. Anweisungen gemäß dem Bildschirm folgen.

## TRICKS UND ÜBUNG

### Dribbeln

Während der Spieler im Besitz des Balls ist, ist das Dribbeln automatisch. Der Ball ist immer ein kurzes Stück vor Ihrem Spieler, unabhängig von der Richtung (acht mögliche Richtungen), in der Sie ihn bewegen.

Es ist wichtig darauf zu achten, daß der Spieler mit dem Ball nicht so schnell laufen kann als ohne Ball. Es ist daher wichtig zu erlernen, wie man den Ball schnell hin- und herpassen kann.

### Passen

Um den Ball zu passen, müssen Sie die Kickkontrolltaste verwenden. Der Ball wird sich in die Richtung bewegen, die Sie zugewandt sind. Es gibt zwei verschiedene Passarten: Entlang des Spielbodens und durch die Luft. Um den Spielboden entlang zu passen, müssen Sie stillstehen, wenn Sie den Ball kicken. Wenn Sie den Spieler bewegen, wird der Ball in die Luft fliegen und den Spielboden entlang auf- und abprallen. Dieser Pass ist der längste von den beiden Passarten.

### Stoppen

Um erfolgreich in den Besitz des Balls zu kommen, müssen Sie seine Richtung abschätzen und Ihren Eingriff richtig planen, so daß der Ball zu Ihren Füßen landet. Dies ist besonders wichtig, wenn Sie einen Ball stoppen wollen. Es ist auch wichtig den Schatten, der direkt unter dem Ball ist, immer im Auge zu haben. Achten Sie darauf, daß der Schatten größer wird, wenn der Ball steigt, und kleiner wird, wenn der Ball fällt. Wenn Sie einen Ball zu früh stoppen, wird er entweder von Ihren Beinen, Ihrem Körper oder Ihrem Kopf abprallen. Die Richtung, wohin der Ball danach springt, ist abhängig von der relativen Geschwindigkeit und der Richtung, aus der der Ball kommt und der Stellung des betreffenden Spielers.

### Torhüter

Der Torhüter läßt sich im entsprechenden Augenblick automatisch steuern — dies läßt sich an den Schuhen erkennen, die die Farbe wechseln. Sie haben dann die Wahl, einen Sprung nach links oder nach rechts zu machen, indem Sie die entsprechende Richtungssteuerung gemeinsam mit 'Kick-fire' verwenden.

### Eingestellte Spielfunktionen

Diese umfassen Cornerstöße, Zuspielen zur Mitte und Torschüsse. Es ist möglich, diese Einstellungen durch richtige Verwendung der Steuerungen sehr genau zu kontrollieren. Zusätzlich zur Fähigkeit, den Ball zu kicken und zu werfen, stehen Ihnen auch noch drei Kraftstufen zur Auswahl: schwach, normal, hart.

Um die Schußstärke von schwach auf hart zu ändern, müssen Sie folgende Regel befolgen: Drücken der Tasten/des Joysticks, um den Spieler vorwärts zu bewegen, ergibt einen harten Schuß/längen Wurf usw.

Drücken der Tasten/des Joysticks, um den Spieler rückwärts zu bewegen, ergibt einen schwachen Schuß/kurzen Wurf usw.

Die Richtung des Schusses/Wurfs kann geändert werden, indem die Steuerungen, die gewöhnlich den Spieler in diese Richtung bewegen, beim Drücken des Schuß-/Feuertasters verwendet werden. Um die Steuerbarkeit des Balls richtig zu verstehen, ist sehr viel Übung erforderlich.

### Einwurf

Wenn der Ball aus dem Spielfeld geht und die Seitenlinie überquert, wird ein Mitglied des entsprechenden Teams automatisch den Einwurf ausführen. Wenn der Wurf Ihrem Team zugekehrt wurde, werden Sie den Spieler, der den Einwurf machen wird, steuern können, indem Sie den Schüßknopf drücken. Sie können den Ball auf neue mögliche Positionen zuwerfen.

### Cornerstöße

Cornerstöße funktionieren ähnlich wie Einwürfe. Der Ball kann in neun mögliche Richtungen gehen. Achten Sie darauf, daß bei den drei 'weichen' Schüssen der Ball am Spielboden entlang rollt.

### Torschuß

Torschüsse funktionieren ähnlich wie Cornerstöße, wobei die drei 'weichen' Schüsse den Ball am Spielboden entlangtreiben.

### Anstoß

Wie nach den Regeln des Fußballverbandes, muß der Ball von der

Mitte vorwärts die Linie überqueren. Ein 'weicher' Mittelstoß nach links bzw. rechts, wird deshalb den Ball etwas über die Mittellinie nach vorne bewegen.

### OPTIONEN

Nachdem das Programm erfolgreich geladen wurde, werden Sie das Hauptmenü (MAIN MENU) zu sehen bekommen, das wie folgt aussieht:

**PLAY 1 PLAYER GAME**

**PLAY 2 PLAYER GAME**

**PLAY MATCH DAY SPECIAL**

**CHANGE MATCH DETAILS**

**CHANGE TEAM NAMES**

Beachten Sie, daß die erste Zeile weiß hervorgehoben ist und eine SPACE-Taste daneben hat. Wenn Sie die Schirmleitung "Press ENTER to select" befolgen und jetzt ENTER drücken, werden Sie das Spiel normal mit einem Spieler gegen den Computer beginnen.

Match Day bietet drei Spieloptionen:

**PLAY 1 PLAYER GAME (1-Spieler-Spiel)**

**PLAY 2 PLAYER GAME (2-Spieler-Spiel)**

**PLAY MATCH DAY SPECIAL (Match Day Spezial)**

Bei Match Day Special können Sie gegen Ihre Freunde und mit oder ohne Computer in einen 3-stufigen Cupwettbewerb spielen. Bevor Sie ein Match beginnen, werden Sie wahrscheinlich die einzelnen Spieloptionen einstellen müssen. Unter anderen ermöglichen Ihnen diese Optionen die Länge jedes Spieles, die Teamfarben und die Steuertasten zu ändern und das Spiel so einzustellen, daß Sie und Ihre Freunde im Cupwettbewerb gegeneinander spielen können. Diese Optionen können durch das folgende Menü geändert werden:

**CHANGE MATCH DETAILS**

(Ändern der Spielenzelheiten)

**CHANGE TEAM NAMES**

(Ändern der Teamnamen)

**CHANGE TEAM COLOURS**

(Ändern der Teamfarben)

**CHANGE GAME CONTROLS**

(Ändern der Spielsteuerungen)

Bei jedem Menü können die Optionen mittels folgender Tasten geändert werden:

**[SP]** SPACE (LEERTASTE)

nach 'unten' bewegen.

**[ENT]** ENTER (EINGABE)

s. Schirmleitungen

hinsichtlich Verwendung

**[ESC]** ESCAPE (UMSCHALTEN)

Verlassen des Menüs.

Diese drei Tasten werden durchgehend verwendet und mit einer Übung ist es möglich die Tasten schnell und einfach zu ändern.

### Change Match Details

(Ändern der Spielenzelheiten)

Um diese Option zu erobern, müssen Sie die Leertaste so oft drücken, bis diese Option hervorgehoben wird. Beachten Sie, daß die SP-Marke am Schirm die entsprechende Auswahlausstellung anzeigt: Wenn Sie 'Change Match Details' hervorgehoben haben, müssen Sie ENTER drücken, um dieses Menü zu öffnen. Sie werden drei Optionen zu sehen bekommen:

# MATCHPOINT

# MATCHPOINT

**Length of each half**

(Länge jeder Spielhälfte)

**Difficulty Level**

(Schwierigkeitsgrad)

**Number of Players**

(Spieleranzahl) (nur beim Cup)

**Computer Opponent**

(Computergegner) (nur beim Cup)

**Length of each Half**

(Länge jeder Spielhälfte)

Bei einem normalen Fußballmatch dauert ein Spiel 45 Minuten pro Hälfte. Bei MATCH DAY können Sie die eigentliche Zeit für jede Hälfte zwischen 5, 15 oder 45 Minuten einstellen. Beachten Sie, daß während des Spiels die Schirmuhr immer von 0-45 und 45-90 Minuten gehen wird. Wenn es in einem Matchspiel nach 90 Minuten zu einem Unentschieden kommt, werden zwei 15 Minuten lange Nachspielperioden gegeben. Die eigentliche Länge jeder Nachspielperiode ist proportional zur gewählten Dauer jeder Spielhälfte.

**Schwierigkeitsgrad**

Wenn Sie in einem 1-Spieler-Spiel gegen den Computer spielen, können Sie für Ihren Gegner eine von drei Leistungsstufen wählen:

Amateur

Professional

International

Im Cupbewerb beginnt der Computer die Viertelfinalspiele mit diesen eingestellten Stufen. Die Computerleistungsstufe steigt im Halbfinale um eine Stufe und im Finale nochmals um eine Stufe. Dies bedeutet, daß ein Cupfinale gegen den Computer immer auf internationalem Niveau gespielt wird.

**Number of Players**

(Spieleranzahl) (nur beim Cup)

Im Cupbewerb können bis zu acht Personen teilnehmen. Eine willkürliche Auswahl entscheidet die Viertelfinalstufe und Spiele werden gespielt und wiederholt, falls notwendig, um die vier Semifinalmannschaften zu finden. Diese werden dann willkürlich ausgelost und die zwei Spiele werden ausgetragen, um die Finalmannschaften zu ermitteln.

**Computer opponent**

(Computergegner) (nur beim Cup)

Falls im Cup weniger als acht Spieler teilnehmen, haben Sie die Auswahl den Computer für die restliche Anzahl einzusetzen. Wenn 'Computer Opponent' auf 'YES' gestellt wird, wird die Cupauslösung, wenn möglich, einen Spieler mit einem computergesteuerten Gegner paaren. Wenn die Auswahl auf 'NO' gestellt wird, werden Spieler mit Spieler gepaart und restliche Spieler erhalten ein 'bye' für die nächste Runde. Verwenden Sie SP, um die Spieldaten zu ändern, die Sie verändern wollen, hervorzuheben. Danach verwenden Sie ENTER um die Optionen den Anforderungen entsprechend durchzugehen. Nachdem Sie d. Spieldaten eingestellt haben, müssen Sie ESC drücken, um zum Hauptmenü zurück zu gelangen.

**Change Team Names**

(Ändern der Teamnamen)

Sie können für die acht Spieler jeden beliebigen Namen eintippen, indem Sie das 'Change Name Menu' verwenden. Sie müssen dazu in das Hauptmenü gehen und mit SP die 'Change Team Names' — Option hervorheben. Drücken Sie danach ENTER. Verwenden Sie dann SP, um den Teamnamen hervorzuheben, den Sie ändern wollen. Verwenden Sie DELETE, um den gegebenen Namen zu löschen und tippen Sie den Namen Ihrer Auswahl ein. Drücken Sie abschließend ENTER und ESC, um zum Hauptmenü zurückzukehren.

**ANM 1:** Wenn ein Einzelspiel gespielt wird, stehen die Teamnamen in der 'Change Team Names' — Menüliste ganz oben.

**Change Team Colours**

(Ändern der Teamfarben)

Dieses Menü und das nächste ('Change Game Controls') ist am Beginn jedes Spiels erhältlich. Um es zu überprüfen, können Sie ein Einzelspieler-Spiel beginnen, indem Sie die obere Auswahl 'PLAY 1 PLAYER GAME' vom Hauptmenü wählen.

Die Anzeige wird jetzt das sekundäre Menü zeigen:

**PLAY ?? HALF**

**CHANGE TEAM COLOURS**

**CHANGE GAME CONTROLS**

**SWAP CONTROLS**

Um die Teamfarben zu ändern, müssen Sie zuerst diese Option hervorheben (durch Drücken von SP — SPACE) und dann ENTER drücken. Sie können SP verwenden, um die farben der beiden angezeigten Spieler zu ändern.

Wenn Sie die Farben gewechselt haben, müssen Sie ENT drücken, um wieder zum sekundären Menü zurückzukehren. Sie werden feststellen daß SP-Marke jetzt bei der Kick-off-Option (Anstoß) ist. Wenn Sie die Spieldaten ändern wollen, müssen Sie SP so lange drücken, bis die Auswahl hervorgehoben wird. Drücken Sie jetzt ENTER.

**Change Game Controls**

(Ändern der Spieldatensteuerungen)

Um Ihren Teamspieler zu steuern, können Sie jede Taste der Tastatur oder jeden Joystick oder eine Kombination der beiden verwenden.

**ANM:** Wenn Sie den Amstrad-Joystick verwenden, dann kann das Spiel mit zwei Joysticks gespielt werden.

Es gibt fünf Spielerkontrollen: UP, DOWN, LEFT, RIGHT und KICK (auch für DIVE (Sprung) des Torhüters und für THROW-INS (Einwürfe)).

Es gibt auch zwei PAUSE GAME Tasten (Pausetasten) — [CTRL + ENT] (Beachten Sie, daß dies das Entfernen bei der Funktionstastengruppe ist).

Das gleichzeitige Drücken dieser Tasten ergibt eine Spielpause. Sie können dann entweder CTRL noch einmal drücken, um das Spiel zu beenden oder irgendeine andere Taste, um das Spiel wieder zu beginnen. Wenn das Spiel ein Cupspiel ist, treffen folgende Regeln zu:

1. Wenn das Spiel gegen den Computer geführt wird, wird der Computer in die nächste Runde weitergehen (es wird angenommen, daß die Person aus dem Wettbewerb ausscheiden will, wenn sie das Spiel beendet).

**ANM:** Sie müssen jene Tasten wählen, die mit den PAUSE-Tasten nicht in Konflikt geraten.

Um eine bestimmte Steuerung zu ändern, müssen Sie die entsprechende Taste (oder Richtung am Joystick) nach den Bildschirminweisen drücken.

Die letzte Option auf dem sekundären Menü ermöglicht Ihnen, Steuerungen für jeden Spieler zu vertauschen. Dies ist vor allen nützlich, wenn ein 2-Spieler-Spiel gespielt wird und nur ein Joystick zur Verfügung steht.

Wie bereits erwähnt, wird dieses Menü am Ende jeder Spielzeit angezeigt. Um das Spiel zu beginnen, müssen Sie ENT drücken, die 'Start Game' Option hervorgehoben wird.

**Normaltasten**

Falls die untenen Tasten nicht neu definiert wurden, werden Sie folgende Spieldatensteuerungen durchführen:

**Spieler 1**

Links [F] [Q]

Rechts [E] [ENTER]

Aufwärts [TAB]

Ahawards [SHIFT]

Stoppen [SPACE]

**Spieler 2**

Vier [Cursor-Tasten]

[Copy-Tasten]

Once you have mastered the skills and strategy of MATCH POINT all that remains is to take a deep breath and step out onto the Centre Court in front of the waiting crowd.

## THE CHAMPIONSHIP

You are in the singles competition of the world's most famous tennis championship and have the option of picking up your racket at any of the following stages:

Or Finials

Or all levels of experience.

Finials

Or all levels of experience.

Finals

Or all levels of experience.

### MACADAM BUMPER COMPETITION

Ever wanted a real Pinball machine?

Now is your chance to own one. All you have to do is design a pinball table layout using this program, and send a copy saved on tape to us at PSS with this section of the inlay card. The winner will become the proud owner of a very valuable electronic pinball table. In addition 10 runners up will each receive £25 worth of vouchers redeemable against any PSS products. The competition closes on 31 January 1986 and entries must be accompanied by this section of the inlay card.

(fill in this section)

THE PINBALL CONSTRUCTION KIT  
COMPETITION WIN A PINBALL MACHINE DETAILS INSIDE

- b. Pressing R allows you to redefine the keys as you wish.

- c. Pressing M allows you to modify the existing Pinball table layout.

The first screen you see allows you to change all the scoring, speed of play etc. Simply move the flashing cursor around the board and input your chosen values. Move the cursor using the arrow keys on the Amstrad and CAPS SHIFT & CURSOR KEYS on Spectrum followed by enter.

Inputting Y to modify the layout will allow you to alter the actual design of the pinball table. On the left of this screen you will see a selection of components indicated by a letter or number. Move the cross hair cursor to the desired point on the table, press a letter and that component will be positioned there.

There are two ways to erase any component: (i) If you have just positioned a piece and immediately want to remove it (you haven't moved the cursor), press SYMBOL SHIFT & the component letter for the Spectrum version, or CTRL & letter for Amstrad. If you have moved the cursor, however, press CAPS SHIFT/DELETE on the Spectrum or DEL on Amstrad, and the cursor will become a hashing square. To move this cursor use the arrow keys; to erase something use the following keys - LEFT = G UP = Y RIGHT = H DOWN = B

Pressing Enter will exit the robust mode.

To change the colours press O on the Amstrad and follow the prompts. On the Spectrum use the following keys:-

CAPS SHIFT + B = BORDER COLOUR  
CAPS SHIFT + C = PAPER COLOUR  
CAPS SHIFT + X = INK COLOUR

CAPS SHIFT + SYMBOL SHIFT gives you a paint brush which can move using the following keys - LEFT = G UP = Y RIGHT + H DOWN = B

d. C = Create a new layout. This option gives you a completely blank table on which to start work.

e. Once you have completed a design, you can use S to save it to tape (or disk on Amstrad) and L to reload a saved design.

#### Playing the game.

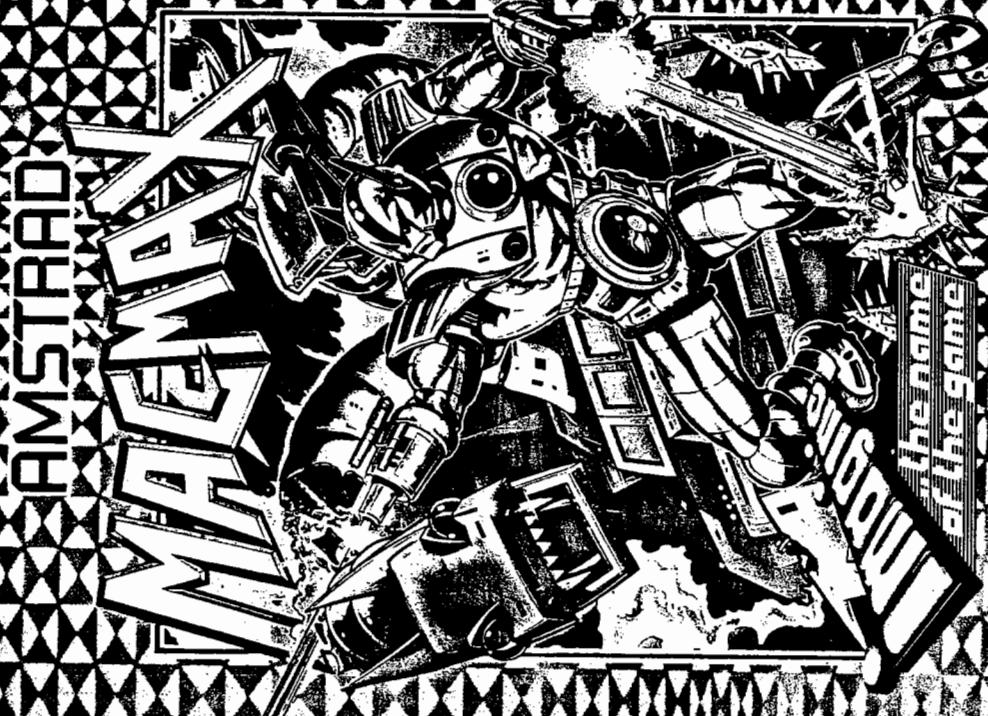

First press C to put a coin in the machine. Each coin gives you 5 balls. Now press N up to 4 times to give up to 4 players. A ball will now appear on the launcher. Pressing both flipper keys together will pull the launcher back and releasing the keys will eject the ball and you're playing Macadam Bumper!

## AMSTRAD **MAG MAX**

Its program code, graphic representation and artwork are the copyright of Imagine Software (1984) Limited and may not be reproduced, stored, hired or broadcast in any form whatsoever without the written permission of Imagine Software (1984) Limited. All rights reserved worldwide. Mag Max runs on the Amstrad CPC 464, 664 and 6128 micro computers. Mag the Max, a secret robot project is all that remains of the Galaxy's civilisation: Component parts are scattered around the planet - assemble our hero and engage the mechanised invaders.

## LOADING

CPC 464

Place the rewound cassette in the cassette deck type RUN" and then press ENTER key. Follow the instructions as they appear on screen. If there is a disk drive attached then type |TAPE then press ENTER key. Then type RUN" and press ENTER Key. (The | symbol is obtained by holding shift and pressing the @ key).

CPC 664 and 6128

Connect a suitable cassette tape recorder ensuring that the correct leads are attached as defined in the User Instruction Booklet. Place the rewound tape in the cassette recorder and type |TAPE then press ENTER key. Then type RUN" and press ENTER key follow the instructions as they appear on screen.

## THE GAME

In the last days before the great collapse, the remnants of humanity realised that their demise was inevitable. Mechanoid hordes from a distant and undiscovered galaxy had laid waste to civilisation in a series of brutal attacks, leaving only death and destruction in their wake. But as reports of the first assault rang through the known worlds, Sci-corps were putting the finishing touches to a prototype robo-centurion; Mag Max. The last defender of mankind was barely completed before Sci-corps too were reduced to dust in a withering hail of

laser death. The invaders however

prove to be their downfall; for deep closed and Mag Max lives! Seeking across the continents he gains strength to fight the invaders! Programme: Death to the Invaders!

Begin by guiding Max along the underground caverns. Take control component parts. As the assembly will increase. You will also discover some of the underground levels where many Armaments consist of a Super-Laser aliens and their structures, however vanquished with the special lance lance!

At the end of each stage you will be completely overcon which must be controlled by either keyboard compatible.

MAX

The larger packaging has been introduced as a standard cassette tape.

Du wirst auch spezielle Kräter finden, die Max in den Untergrund und zu neuen Gefahren transportieren. Die Bewaffnung besteht aus einem Super-Laser, womit Du alle Außerirdischen und deren Strukturen eliminieren mußt. Einige können allerdings nur mit der Speziallance besiegt werden, welche ein Teil Deines Waffensystems ist. Am Ende jeder Stufe siehst Du dem Führer der Invasionen gegenüber, den Du ganz bezwingen mußt, um auf die nächste Stufe vorzustoßen.

## STEUERUNGEN

Max kann entweder von der Tastatur oder vom Joystick kontrolliert werden, und die meisten Interfaces sind kompatibel.

## MÄG MAX

Programmcode, grafische Darstellung und Druckvorlagen sind Copyright der Imagine Software (1984) Limited und dürfen ohne schriftliche Genehmigung der vorgenannten Firma nicht vervielfältigt, gespeichert, ausgeliehen oder in irgendeiner Form über Rundfunk gesendet werden. Alle Rechte sind weltweit vorbehalten. Mag Max kann an den Amstrad CPC 464, 664 und 6128 Microcomputern abgespielt werden.

Mag der Max, ein geheimes Roboterprojekt, ist alles was von der Zivilisation der Milchstraße übrigbleibt; die Bestandteile sind überall auf dem Planeten verteilt – setze unseren Helden zusammen und bekämpfe die mechanisierten Invasionen.

## LÄDEN

### CPC 464

Lege die zurückgespülte Kassette in das Kassetten teil, tippe RUN" und danach drücke die ENTER Taste. Folge den Anweisungen, wie sie auf dem Bildschirm erscheinen. Falls ein Diskettenlaufwerk angeschlossen ist, tippe TAPE und danach drücke die ENTER Taste. Anschließend tippe RUN" und drücke die ENTER Taste (Das Symbol erhaltest Du, indem Du die Umschalter Taste festhältst und @ drückst.)

### CPC 664 und 6128

Schließe einen geeigneten Kassettenrekorder an und versichere Dich, daß die

korrekten Kabel angeschlossen sind, wie es in der Anleitung für Benutzer

beschrieben ist. Leg die zurückgespülte Kassette in den Rekorder und tippe TAPE

und danach drücke die ENTER Taste. Anschließend tippe RUN" und drücke die

ENTER Taste. Folge den Anweisungen, wie sie auf dem Bildschirm erscheinen.

## DAS SPIEL

In den letzten Tagen vor dem grossen Zusammenbruch realisierten die Überlebenden der Menschheit, daß ihr Ende unabwendbar war. Mechanoiden Horden von einer fernen, unbekannten Milchstraße hatten die Zivilisation mit brutalen Angriffen verwüstet und nur Tod und Zerstörung hinterlassen. Aber als Berichte von den ersten Angriffen überall in den bekannten Welten gehört wurden, stellten Sci-Corps gerade dem Prototypen eines Robo-Zenturons fertig: Mag Max. Der letzte Verteidiger der Menschheit war kaum fertiggestellt, als auch Sci-Corps in einem vernichtenden Laserhaag untergingen. Die Invasionen jedoch wissen nichts von diesem Projekt, welches zu Ihrem Untergang führen könnte, denn in den Tiefen des Planeten hat sich ein Kreislauf geschlossen, und Mag Max lebt! Während er seine über die Kontinente verteilten Bestandteile zusammensucht, gewinnt er an Stärke und Feuerkraft, um sein Programm zu erfüllen: Tod den Invasionen!

Zuerst führst Du Max über die Oberfläche des Planeten und durch die Untergrundkanälen. Übernimmt seine Kontrolle und durchsuche den Planeten nach den Bestandteilen; durch sie vergrößern sich seine Stärke und Abwehrkräfte.

Commencez par guider Max le long de la ligne souterraines. Prenez contrôle de lui à planète. Au fur et à mesure que ces armes déclenchent. Vous devrez éliminer l'ennemi. L'armement dont vous avez lequel vous devez éliminer tous les armes. Il est possible d'éliminer certains que grâce à soi grâce au levier et la plupart des armes au niveau suivant.

MANIC MINER

### MANIC MINER

Miner Willy, while prospecting down Sunblon way, stumbles upon an ancient long forgotten mine-shaft. On further exploration, he finds evidence of a lost civilisation far superior to our own, which used automata to dig deep into the earth's core to supply the essential raw materials for their advanced industry. After centuries of peace and prosperity, the civilisation was torn apart by war, and lapsed into a long dark age, abandoning their industry and machines. Nobody, however, thought to tell the mine robots to stop working, and through countless aeons they had steadily accumulated a huge stockpile of valuable metals and minerals, and Miner Willy realises that he now has the opportunity to make his fortune by finding the underground store.

In order to move to the next chamber, you must collect all the flashing keys in the room while avoiding nasties like poisonous spiders and slime and worst of all, manic mining robots. When you have all the keys, you can enter the portal which will now be flashing. The game ends when you have been 'got' or fallen heavily three times.

### LOADING INSTRUCTIONS

### PROGRAMS WANTED

# MARAUDER

48K ZX Spectrum, ZX Spectrum Plus, ZX Spectrum 128, ZX Spectrum +2 and ZX Spectrum +3  
Amstrad CPC 464, CPC 664 and CPC 6128      Commodore 64 and 128

## SCENARIO

In aeons past a cruel and despotic civilisation stole the Jewels of Ozymandias and buried them deep beneath the multiple defences on the planet Mergatron where they have remained pulsating strangely to the present day.

Now with the crude civilisation long decayed and cracked the creaking auto-defences of Mergatron swept low with the sands of time wind thunderously into action at any hint of intrusion. And you, Captain C. T. Cobra with your lone Marauder Battlecar are determined to retrieve the Jewels from eternity's remorseless grip.

Airborne drones scream low overhead, their bouncing bombs pitching and blasting. The desert sand kicks in your face as your Marauder skids squat and ugly, its massive laser cannon crash-firing the defences to oblivion. Spinning eyepods close you down and electro-hovers spit fire as seeker missiles shudder over the horizon. Wheels spin and screech as your Battlecar heaves to confront the pursuers.

With energy levels dropping you scan desperately beyond the aliens. You spot a distant weapon beacon. Can you battle to the beacon to recharge your besieged craft?

## LOADING INSTRUCTIONS

### Spectrum Cassette

48K ZX Spectrum, ZX Spectrum Plus or ZX Spectrum 128 with cassette player, ZX Spectrum +2

You are advised to disconnect all hardware from the rear edge connector with the exception of your joystick interface (if any). When using a Sinclair Interface 2 or the ZX Spectrum +2 plug the appropriate joystick into port 1. Unless using a ZX Spectrum +2 connect a cassette player to the computer in the usual manner. Rewind the cassette if necessary, enter LOAD "" on the computer keyboard and press the ENTER key. Press the Play key on the cassette player. The game takes a few minutes to load.

### Spectrum Disc

ZX Spectrum +3

You are advised to disconnect all hardware from the rear edge connector with the exception of your joystick interface (if any). Place the disc in the drive and press the ENTER key.

### Amstrad Cassette

Amstrad CPC 464

Amstrad CPC 664 or Amstrad CPC 6128 with cassette player and suitable leads.

Amstrad CPC 664 and CPC 6128 users should connect a cassette player to the computer and enter |tape and press the ENTER key. Place the cassette in the player, rewind if necessary and press the CTRL and ENTER keys. Press the Play key on the cassette player and then any key on the computer keyboard. The game takes a few minutes to load.

### Amstrad Disc

Amstrad CPC 6128 or Amstrad CPC 664

Amstrad CPC 464 with disc drive

Amstrad CPC 464 users should connect a disc drive to the computer and enter |disc and press the ENTER key. Place the disc in the drive and enter run "disc and press the ENTER or RETURN key. The game takes a few seconds to load.

### Commodore Cassette

Commodore 64 or Commodore 128 with suitable cassette player.

You are advised to disconnect all hardware from your computer. Connect the cassette player to the computer, place the cassette in the player and rewind if necessary. Press the SHIFT and RUN/STOP keys on the computer keyboard and press the Play key on the cassette player. The game takes a few minutes to load.

## Commodore Disc

Commodore 64 or Commodore 128 with disc drive.

You are advised to disconnect all hardware from your computer. Connect the disc drive to the computer and place the disc in the drive Enter LOAD "", 8, 1 and press the RETURN key. The game takes a few seconds to load.

## CONTROLS

Commodore:	Joystick only	
Spectrum:	Keyboard or Kempston, Sinclair or Cursor joystick (auto detected when FIRE pressed).	
Amstrad:	Use either keys or joystick.	
Title page:	Select music or sound FX - F1 (Commodore and Amstrad) or 1 (Spectrum)	
During Game:	Joystick                    Keys                    Action	
	Left                        O                        Move left	
	Right                      P                        Move right	
	Up                          Q                        Move up	
	Down                      A                        Move down	
	Fire                        M                        Fire laser cannon	
	Space                     Space                    Activate smart bomb	
To pause:	RUN/STOP (Commodore) or ENTER (Spectrum and Amstrad)	
To quit game:	Q (Commodore) or 0 (Spectrum and Amstrad)	

## GAMEPLAY

Manoeuvre your Battlecar through each zone destroying as many of the defence systems as you can while avoiding the flak from the Atomic disruptors and Molotov cocktails and dodging deadly winder missiles and other destructive devices. You start the game with 3 smart bombs which are activated by pressing the space bar.

Along the way you will come across the glowing defence beacons which when shot will either help or hinder your progress depending on the colour they are when hit. The colours are:

RED: Extra smart bomb - destroys all ships on the screen

YELLOW: Shields - your ship is invincible for 10 seconds

CYAN: Win a life

BLUE: Control reversal

PURPLE: Lose a life

GREEN: Laser jammed - you are defenceless for 10 seconds

At the end of each level the defences throw everything they've got at you. If you survive you are transported to the next zone.

## CREDITS

Game designed and programmed by Arcanum Software Developments. Spectrum and Amstrad versions by Keith Burkhill, Graphics by Steve Crow (Commodore) and Rory Green (Spectrum and Amstrad). Music by Barry Leitch (Commodore) and Dave Rodgers (Spectrum and Amstrad)

Abingdon

Oxon

OX14 4RX

The year is 2494. For seventy years, the Earth has been under siege by the Sept, a hive-culture race from the Galactic centre. Since the siege began, the Sept have been kept at bay by a huge sphere of force, which surrounds both the Earth and the Moon. Following the loss of Calcutta, it is obvious that the Sept will shortly have the capability to breach the sphere unless the force field can be strengthened according to the instructions contained in the original plans.

Unfortunately, these plans are thought to be hidden somewhere amongst the City Computers of Marsport, beneath the great Elysium Dome on Mars. Evacuated shortly before the start of the Siege, it is now occupied by Sept of the Warrior and the Warlord castes as a command post. It is also known that the main control computer of Marsport, M-Central, has spent the last seventy years incorporating its own deterrents into the city architecture, making the recovery of the sphere plans highly improbable. However, to this end, Commander John Marsh, of the underground Terran Liberation organisation, HASP, now stands in Marsport, on Level C, at the exit of the access tube to the Space Field, in the belief that a determined man can sometimes achieve more than an army...

#### How Marsport Works

The Option Screen is presented at the start of the game or when Commander Marsh is unfortunate enough to be killed; it can also be accessed during the game via a keyboard request. The screen offers the following choices:

1. Enter the Game
2. Save the current Game
3. Restore the Game
4. Demo Mode

Note that returning to the option screen from a current game will leave the game-world intact - upon re-entry, nothing will have changed unless a previously saved game has been restored. This allows a game to be saved at a critical point without destroying it. If you wish the option of restarting the game with all the objects in their original positions, save a version immediately after loading the game.

When saving or restoring a game a version number will be asked for - this is to ensure that the right game is restored, so keep a note of version numbers.

The Keyboard controls the actions of the main character.

The following actions may be performed:

- walk left or right
- change camera angle 90 degrees left or right; this is necessary if you wish to turn a corner or view the other side of the road
- enter a doorway; to achieve this on any computer, position Commander Marsh in front of the door and press the enter button
- pick up or drop a specific object; note that objects may only be dropped in certain places - i.e. Lockers, Factor Units, Key Stations, etc.
- select an object being carried for dropping, etc. - the currently selected object is indicated by an asterisk

Note that Commander Marsh can only carry 3 separate objects at any one time.

- fire a Power Weapon, if one is being carried and it is charged

In addition, there are some special function keys available while in the game:

- enter/exit Autorun mode
- freeze/unfreeze frame
- return to Option screen

#### How to play Marsport

Although Marsport is a real-time adventure, it can be considered as consisting of three distinct objectives:

- locate the M-Central computer; Marsport is a 3-dimensional city, where levels are connected by express tube, which will take you up or down, but probably not both. In addition, many sections of the city cannot be reached until specific problems have been solved

- gain access to Muller's original Sphere plans, held in M-Central's inner sanctum. This will require exploration of Marsport for you find many parts of the city unreachable now open to you

- leave the city of Marsport with the plans intact, which may prove the hardest task of all...

There follows a list of some of the beings and city elements you will encounter as you explore Marsport:

**ALIENS** are all hostile and deadly to Mankind; you can fight them or run away from them, but you can't ignore them!

**ROBOTS** have been deployed by M-Central to assist it in guarding the plans - some are harmless information gatherers, some are warden robots that may mistake you for the Sept...

**SUPPLY** units are the prime source of objects in the game and are continuously replenished.

**LOCKERS** can be used for storing objects once they are gained. **REFUSE** units can be used to dispose of unwanted objects.

**CHARGE** units are a source of power.

**FACTOR** units will assemble two or more objects to manufacture a new object.

Note that components of a factoring process are all logically linked so that random attempts at manufacturing objects should be unnecessary; note also that an assembly will not complete while there is an irrelevant object present in the factor unit.

**KEY** stations will normally require the insertion of a key object to release a nearby wall unit or door. However, note that not all locked doors and units can be opened in this manner - some may require a more active or remote solution...

**VIDTEX** units provide 'useful' information which is displayed on the large video screen in the status area.

Other wall units are the resting place of M-Central's remote Servorobots and should be approached with care.

#### Playing Suggestions

1. Map the game carefully - the playing area is vast and the 3-dimensional nature of the city will quickly disorient you.
2. Get a weapon - combat can be avoided but a little aggression will make progress easier, and reduce tension!
3. Examine problem situations carefully; often what is required for a solution will need to be assembled from other objects. All problem situations contain clues to the solution - trial and error methods will normally be fatal!
4. Save the Game regularly - the Save and Restore features take less than a minute!

#### Keyboard Assignments.

Walk Left/Right - Alternate keys on the bottom row, Z to /

Enter a Door - The ENTER key.

Camera Left/Right - Alternate keys on the second row, A to ]

Pick Up/Drop - Alternate keys on the third row, Q to [

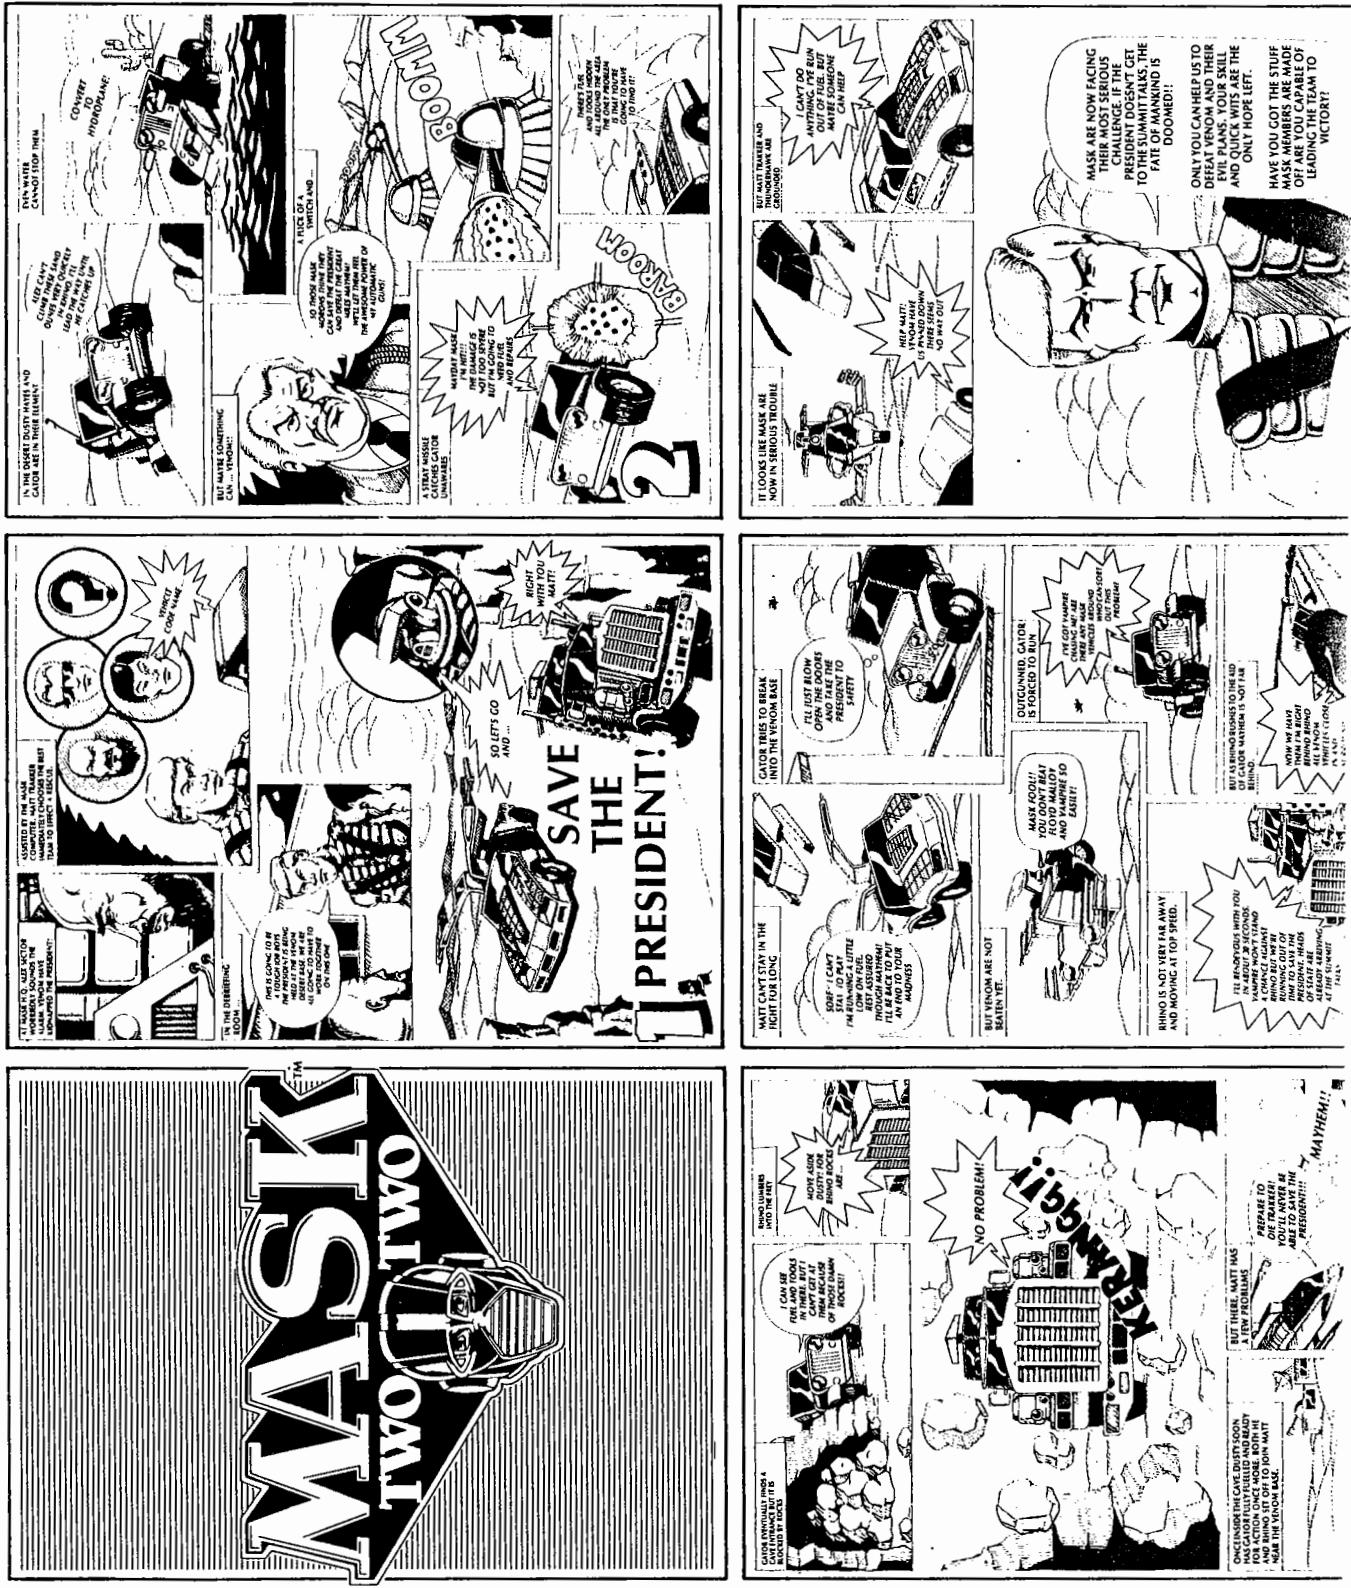

Select Object - Top Row, 1-to CLR...

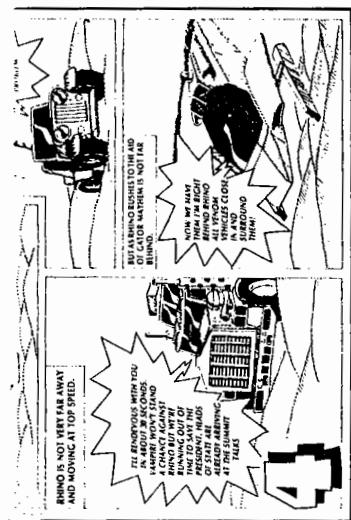

Fire - The SPACE bar.

Autorun on/off - The 4 key, on the separate Numeric/Function Block.

Freeze/Unfreeze - The 5 key, on the separate Numeric/Function Block.

Return to Options - The 6 key, on the separate numeric/Function Block.

## LOADING INSTRUCTIONS

**CBM 64/128**  
CASSETTE: Insert cassette into cassette unit. Press SHIFT and RUN/STOP simultaneously. Press PLAY on the cassette unit. The program will load and run automatically.

**DISK:** Insert disk into drive. Type LOAD "", B, 1 and press RETURN. The program will load and run automatically.

**SPECTRUM 48K**

Type LOAD... and press ENTER. Press PLAY on the cassette recorder. The program will load and run automatically.

**SPECTRUM 128K/+2**

Use the TAPE LOADER as normal.

**AMSTRAD**

CASSETTE: Insert cassette into cassette unit. Press CONTROL (CTRL) and the small ENTER keys simultaneously. Press PLAY on the cassette unit and then any key. The program will load and run automatically.

DISK: Insert the disk into the drive, label side up. Type LOAD and press ENTER. The program will load and run automatically.

## MASK II INSTRUCTIONS

"Who knows when or where VENOM will strike..."

An alert sounds in MASK H.Q. - VENOM IS ON THE MOVE. Your task is to take a team of three MASK agents to overcome VENOM, choosing the most suitable personnel for each mission, basing your selection on their individual abilities and vehicles.

MASK II is a game in four parts ...

## PART 1 - BOULDER HILL

When the first part has loaded, stop the tape and you will receive one of the three mission alerts. Your team selection is made at Boulder Hill in the ENERGIZER ROOM with the aid of the MASK computer. Move the MASK iron around the screen over each agent's seat position and from the agent profiles displayed by the MASK computer, decide which are to be your agents by pressing FIRE. If you change your mind you may clear the team by moving to the top right hand icon. To select a different mission move to the top left icon and press FIRE. It is vital that you study the mission description in order to select the best MASK team.

When you are happy with your team selection, move to the LOAD icon and press FIRE. to load the next part of the game.

## PART 2 - THE DESERT MISSION

The President of the P.N.A. (Peaceful Nations Alliance), is to sign a treaty ensuring World Peace for decades to come. VENOM, in a desperate attempt to create total World Anarchy, have kidnapped the President and are holding him to ransom. You must rescue the President and convey him to the helipad from where he will be taken to the Summit Talks.

## PART 3 - THE VENOM BASE MISSION

Reports have been received of a large and heavily fortified VENOM base which is being used to co-ordinate their activities in the Middle East. The VENOM base is now almost operational and would give

## MASK II CONTROLS

**SPECTRUM 48/128K:**

Compatible with Kempston/Cursor/Interface II/+2 joysticks.

**LEFT - Z**

**RIGHT - X**

**UP - O**

**DOWN - K**

**FIRE - @**

**Keys 1, 2, 3 to select MASK Agent/Vehicle**

**SPACE - To restart**

**PAUSE - CAPS SHIFT**

**CBM 64/128:**

**Joystick in Port 2.**

**LEFT - Z**

**RIGHT - X**

**UP - I**

## MASK VEHICLES

### THUNDERHAWK (SPORTS CAR/JET)

Gull-wing doors convert to wings for jet flight.  
Fires lasers both on the ground and in the air.  
Drops magnetic bombs when in flight.

### RHINO (ARMED DEFENCE UNIT)

Front grille converts to a powerful ram bumper - useful for smashing through walls etc.. smokestacks convert to forward cannons.  
Multi-warhead missile launcher in sleeper cab.

### RHINO ATV (ALL TERRAIN VEHICLE)

Amphibious vehicle.

Front mounted cannons.

### CONDOR (MOTORCYCLE/HELICOPTER)

Nose cannon fires antimatter ray.

Belly cannons fire lasers.

Converts into helicopter with same weaponry.

### GATOR (OFF ROAD VEHICLE/HYDROPLANE)

Cannon on roll bar fires energy balls.

Converts into jet boat.

When afloat, fires a powerful water cannon.  
Drops depth charges to destroy underwater targets.

**Masterchess** has been designed to be a no-fuss chess playing program of advanced ability which is easy to use. Special emphasis has been placed on providing facilities useful to those wishing to improve their game as well as just pass a pleasant hour or three. To this end it is possible to review an entire game, step-by-step, or rearrange the pieces to make a point, or even build up a position, starting with a blank board. This facility is very useful for solving chess problems, or for improving your chess by studying the moves of a master player.

Early in the development of Masterchess, the 3-D perspective view of the chess board was abandoned in favour of a more conventional 2-D view. The reason for this was that the 3-D view was difficult to use and did not provide any significant improvement in the graphics.

The savings in memory space were considerable.

#### CONTROLS

Joystick or

Key are re-

quired to re-

move the

chess piece you

wish to move,

or to position the piece using the arrows and

ENTER key.

Press a

key to

cancel a

move.

UPON THE PAGE

Upon loading, the game will ask you which colour you wish to play, Black or White. You then set the opponent's level of play, by deciding how long you wish to allow him to think over each move. Type in a number of seconds and RETURN. Although just about any whole number will be accepted, we would suggest that you start with a level around 30 seconds and raise it from there. At 60 seconds Masterchess will beat most average players most of the time. If you fancy your chances move up to 180 seconds and then beyond 600 (or a good 30 minutes) should you get fed up waiting - or just wish to

pressure the computer a little, hit RETURN whilst it's thinking. This forces it to play its best move so far, at the moment you push the button.

Also while the machine is considering, you can view which pieces have been taken by hitting the space bar. Hit it again to resume normally. (This does not affect the machine's thinking.)

The score display can be obtained during your turn by holding down the space-bar.

Pressing RETURN during your turn brings up the option menu:-

1. RETURN (from menu)
2. SET LEVEL
3. RE-ARRANGE
4. SET UP
5. REPLAY
6. LOAD GAME
7. SAVE GAME
8. NEW GAME

Press the number key corresponding to the option you wish to call up. Taking each in turn:-

1. Returns you to the game.
2. Enter the number of seconds, then RETURN.
3. Allows you to put pieces onto any square, or take them off, WITHOUT RESTRICTION. Careful! Works from the current game position. You will be asked which square you want to move onto. Move the cursor onto the square you require, and press fire to select it. Press return to get out of the option.
4. Works as above, but starts with a blank board. Once complete press RETURN to begin play and RETURN again to get back to the menu.
5. Plays through the game from the start, or from the last use of (4) or (3), to the current position; hit any key to carry on one move or hold down the space-bar for continuous action.
6. Loads in previously saved position. Follow on-screen instructions.
7. Saves current position onto a (blank!) tape. Again, follow prompts.
8. Restarts from scratch, with its colour choice and level setting

#### LOADING INSTRUCTIONS

depth, the book extends twenty nine ply on certain openings.

A fully automatic chess clock is displayed above the chess board, indicating the time taken by the player and computer.

The program offers numerous features and facilities. These are readily understood and remembered as all options are listed on the screen when they are valid. Only single keys are needed to select any option (the first letter of the option word), and the program will accept only those entries which are valid at that time. Any further input required will be prompted by the program.

**THE MAIN MENU**

PLAY - to start a new game. You will first be asked to choose white or black and then the level of play. The board will be set up with your selected colour playing from the bottom of the board. See the Play menu description for details of the subsequent options. RESUME - allows you to continue your game at the current position after having returned to the main menu for any reason. You will be asked which colour you wish to play and which colour is to have the next move. COLOUR - this option allows you to alter the colours of the board and pieces if you do not like the standard settings. Answer each of the four colour questions with a number from 0 to 26. SAVE - to save a game on tape. You will be asked to press RECORD and PLAY and then to press any key. Please ensure that a cassette is in place and correctly positioned before you do so and don't forget to press STOP when it has finished.

**MASTERCHESS**

**LOADING INSTRUCTIONS**

Reset the computer by holding down the CTRL, SHIFT and ESC keys together in that order. Place the cassette into the Dataorder. Rewind the tape to the beginning, then press STOP/EJECT once. Press the CTRL and small ENTER keys simultaneously, then press PLAY followed by any key. The program will take about 5 minutes to load. Playing instructions will then appear on the screen.

Masterches is an advanced chess program written entirely in Z80 machine code. A graphic display of the chessboard and pieces is presented on the screen, together with an indication of the current level of play and a history of the thirteen most recent pairs of moves for reference. While calculating a move, the program indicates the total number of legal moves it has found and how many it has already evaluated. This gives the player an indication of how long the program will take to finish its evaluation. At any time during the evaluation, the player can instruct the computer to stop and play its current best move. The colours of the display can be easily altered to suit the player.

Ten levels of play are available, the lowest offering almost immediate response and the highest searching up to eight moves ahead. All legal moves are recognised, including castling and en-passant; illegal moves such as castling through check will be rejected.

An opening book of some six thousand moves is contained in the program, providing both width and

**LOAD** - reloads a previously saved game. You will be prompted to press play, then any key. When the tape has finished loading, the board and move history will automatically be set up exactly as it was when the game was saved. You can now use the Resume option to continue your game.

**MODIFY** - this option allows you to alter the board, either to correct a wrong move or to set up a chess problem. See the Modify menu description for details of how to carry this out.

#### THE PLAY MENU

The following keys are applicable when the program is waiting for you to move:

A.H.1-B - Your moves should be entered by specifying the column first (row 1 is your King) from and the column and row you wish to move to. You will see that the columns (or files) are clearly marked with the letters A-H and that the rows (or ranks) are labelled with numbers 1-8. As an example, to move the white King's pawn forward 2 squares to start a queen, enter E2E4. The program will inform you if you are making an illegal move, and you should then make a different move.

(D.F) - If at any time halton enquires the last colour; or you realise that a mistake has been made, pressing the DEL key will allow you to re-enter the move.

L.V.I.L - pressing L informs you to alter the level of play; you will be prompted for the new level.

RUCCOMMEND - The program will recommend the move it would have made had it been in your position and at the current level of play.

XIT - exit to the main menu to save a game, set up the board, restart etc. The current game can be re-entered with the Resume command

In addition, the key M for Move is recognised by the

computer while it is evaluating its own move. Pressing this key will force the computer to stop its evaluation and play the best move it has found so far.

#### THE MODIFY MENU

When you enter the modify mode, you will soon one of the squares in the centre of the chessboard flash briefly. This is the 'active' square.

Use the cursor keys to move the active square position to wherever you like on the chessboard.

The new active square will flash briefly.

DEL - Delete the piece at the current active square.

Has no effect if there is no piece on that square.

CLR - Clear the entire chessboard of pieces. This is primarily of use when setting up a chess problem, as it saves having to individually remove each piece in its original position.

LEVEL - exactly as the same option in the Play menu: allows you to alter the level of play before you resume play.

K.Q.R.B.N.P - Allows you to place a King, Queen, Rook, Bishop, Knight or Pawn respectively at the current active square. You will be prompted for the colour of the piece and asked if it has moved yet. Please answer this and quantum correctly as it is used to determine the legality of certain moves and the desirability of some others.

XIT - exit to play again, using the current position. Before you play, you will be asked for your colour and which colour is in move next.

#### NOTES

The time taken by the computer to calculate its move increases with the level it is playing at. Approximate times for each level are:-

Level 0	- 5 sets	Level 1	- 10 secs
Level 2	- 30 secs	Level 3	- 1 min

Level 4	- 3 mins	Level 5	- 5 mins
Level 6	- 15 mins	Level 7	- 2 hours
Level 8	- 15 hours	Level 9	- 2 days

These times will vary considerably depending on the complexity of the position, being generally longer during mid game play and shorter in the end game. If you accidentally choose a level which takes too long, the M key can be used to force the computer to move. However, if you use this facility, the computer will not have made the best use of its computing time. You should therefore try to avoid using it on a regular basis by selecting a level appropriate to the time you wish to spend.

The computer holds a large library of opening moves. As long as play remains within the book the computer's memory will be prioritised very rapidly. The higher levels are intended mainly for problem solving. The best levels to use for this purpose are:-

Mate in 2 - Level 4

Mate in 3 - Level 9

Mate in 4 - Level 9

## EXECUTION

Pour commencer, appuyez sur le bouton Tir. Avancez jusqu'à votre Tapis Magique en plaçant la manette et regardez le tapis se er.

Volez dans le tunnel en direction de l'antre génie. Si vous vous écrazez ou tombez du ois, vous devrez repartir au début de ce nnel.

Arrivé à l'antre du génie, entraînez-vous à us déplacer et à frapper sur les gongs. Vous uvez sauter rapidement d'un gong à l'autre appuyant sur le bouton de Tir et en plaçant la manette dans la direction désirée. ur passer d'un gong à l'autre, déplacez la anette vers la gauche ou la droite. Pour ipper sur le gong, poussez la manette en ant.

Lorsque vous serez prêt à appeler un génie, ippez trois fois sur n'importe quel gong. Le nie se matérialisera et soufflera des tonalités couleur dans l'air. Lorsqu'il aura terminé, la emière note se déplacera vers le haut de cran et commencera à tomber. A ce oment-là, frappez les gongs correspondants ns la séquence donnée par le génie. NE APPEZ PAS SUR LE GONG AVANT QUE LA EMIERE NOTE NE SOIT PARVENUE EN HAUT L'E! N. Mais ensuite, agissez vite. Si vous artez avânt le départ ou si vous n'accordez s les tonalités à temps, vous vous trouverez expulsé de l'antre et replacé à l'entrée du tunnel qu'il vous faudra traverser à uveau.

Si vous arrivez à accorder toutes les nalités d'un antre, vous passerez aux tunnel antre suivants, jusqu'à ce que les Lampes ient assemblées.

## Herr der Lampen (Master of the Lamps)

Für 1 Spieler

Dies war einmal ein friedliches Land. ber jetzt wo der König nicht mehr da ist, ist eine Bande mutwilliger Bösewichte ausgebrochen, die sich wild herumtreibt. hilf dem jungen Prinzen dabei, seine geistigen und körperlichen Werte unl. Beweis zu stellen - treibe die Bösewichte in ihre Lampen zurück, damit er seinen rechtmässigen Platz auf dem Thron einnehmen kann.

## ANWEISUNGEN ZUM AUFLADEN

Schalte deinen Computer ein oder bringe in die Grundstellung zurück, indem du auf ie Tasten **CTRL**, **SHIFT** und **ESC** in er angegebenen Reihenfolge drückst und sie isthältst.

Spule die Kassette ganz zurück. Halte die **CTRL** - Taste nach unten drückt fest und drücke auf die kleine blaue **ENTER** - Taste auf der Zahlen-Tastatur. auf dem Bildschirm sollte jetzt "Press **PLAY** then any key" erscheinen. Drücke auf die **PLAY** - Taste Deines onbandgerätes, anschliessend auf die Taste **ENTER**.

Kurz darauf sollte der Programmtitel rscheinen, anschliessend sollte das olständige Titelbild angezeigt werden; dann dt sich das Spiel auf. Nach ungefähr 4 minuten sollte der Bildschirm frei werden - das piel beginnt. Wenn das nicht der Fall ist, musst u den ganzen Vorgang von 1.an riederholen.

## STEUERUNG

Das Spiel kann entweder durch Einsatz des Steuerknüppels, den man in dem üblichen Anschluss auf der rückwärtigen Verkleidungsplatte anschliesst oder die Betätigung der Positionsanzeigen tasten auf der Tastatur gespielt werden. In diesem Fall dient die Taste **COPY** als Feuerknopf.

## WAHL DES SPIELES

Auf dem Auswahlbild werden die Spiele SEVEN TRIALS, THRONE QUEST und MAGIC CARPET gezeigt - unter denen du wählen kannst. Die Wahl erfolgt durch Vor- oder Rückwärtsbewegen des Steuerknüppels. Wir empfehlen, dass Anfänger mit den SEVEN TRIALS beginnen: Nachdem du deine Wahl getroffen hast, drückst du auf den Feuerknopf (oder die **COPY** - Taste), um mit dem Spiel zu beginnen.

SEVEN TRIALS (Sieben Versuche): Es ist leichter, durch die Tunnels zu steuem und in den Höhlen der Bösewichte helfen dir sowohl Farben als auch Töne. Du hast gewonnen, wenn du eine der in sieben Teile zerlegten Lampen zusammengefäßt hast.

THRONE QUEST (Trachten nach dem Thron): Du hast gewonnen, wenn du drei der in sieben Teile zerlegten Lampen zusammengefäßt hast. Farben und Töne wechseln sich ab.

- In den sieben Höhlen des ersten Bösewichtes: Man kann Farben sehen und Töne hören, die Farben verschwinden jedoch schnell.
- In den sieben Höhlen des zweiten Bösewichtes: Man kann keine Töne hören und die Farben verschwinden genau so schnell wie oben.
- In den sieben Höhlen des dritten Bösewichtes: Man kann keine Farben sehen, es gibt nur Töne. Spiele nach dem Gehör.

Wenn schliesslich drei Lampen zusammengefäßt sind, fliegst du durch einen letzten Tunnel zum Palast zurück. Schlage den Gong drei Mal an und man wird dich auf deinen rechtmässigen Thron setzen. Man spielt ein Krönungslied! Wie es heisst? "Herr der Lampen" - selbstverständlich.

MAGIC CARPET (Zauberteppich): Nur um das Fliegen zu üben. Wähle irgendeines der 21 Tunnels aus, die du beim THRONE QUEST benutzt hast (sie tragen die Nummern 1 bis 41 - verwende nur ungerade Zahlen). Wenn du den Anzeiger auf dem Auswahlbild bis zur Flughöhe nach unten bewegst, dann bewege den Steuerknüppel so lange weiter nach unten bis die Nummer des gewünschten Tunnels erscheint. Wenn man einmal geflogen ist, dann kann man es mit demselben Tunnel nochmals tun. ANMERKUNG: Der Feuerknopf kann auf dieser Höhe zum nochmaligen Spielen oder zum Wählen eines neuen Tunnels verwendet werden. Drücke auf die **ESC** - Taste, damit das Auswahlbild wieder erscheint.

## MACHE DICH AUF DEN WEG

Um das Spiel zu beginnen, drückst du auf den Feuerknopf. Gehe zu deinem Zauberterppich, indem du den Steuerknüppel bewegst, dann schaue zu, wie der Teppich nach oben geht.

Fliege auf dem Weg zur Höhle des Bösewichtes durch den Tunnel. Wenn du einen Zusammenstoss hast und vom Teppich fällst, musst du bei diesem Tunnel nochmals anfangen.

Wenn du in der Höhle des Bösewichtes angekommen bist, musst du dich darin üben, die Gongs zu bewegen und anzuschlagen. Du kannst schnell von einem Gong zum anderen hüpfen, indem du auf den Feuerknopf

NAME	ADDRESS
POSTCODE	UOK116
Please print in BLOCK CAPITALS	

~~X~~  
drückst und den Steuerknüppel in die gewünschte Richtung bewegst. Um von einem Gong zum anderen zu marschieren, bewegst du den Steuerknüppel nach links oder rechts. Um einen Gong anzuschlagen, stösst du den Steuerknüppel nach vorne.

Wenn du einen Bösewicht vorladen willst, schlage irgendeinen Gong drei Mal an. Er wird erscheinen und farbige Töne in die Luft blasen. Wenn er damit fertig ist, bewegt sich die erste Note nach ganz oben auf den Bildschirm und beginnt dann herunterzufallen. Wenn das eintritt, schlage die entsprechenden Gongs in derselben Reihenfolge wie der Bösewicht an. SCHLAGE DEN GONG NICHT AN, BEVOR DIE ERSTE NOTE DEN OBEREN RAND DES BILDSCHIRMES ERREICHT HAT. Wenn dies aber eintritt, dann musst du dich schnell bewegen. Wenn du "aufgibst" oder wenn du die Töne nicht rechtzeitig koordinierst, wirst du aus der Höhle heraus zum Anfang des Tunnels befördert und du musst nochmals durch den Tunnel fliegen.

Wenn du alle Töne in einer Höhle koordinierst, gehst du weiter zum nächsten Tunnel und zur nächsten Höhle bis die Lampen zusammengebaut sind.

## MEGABUCKS

© IVAN HORN

**THE GAME**  
Maximillion III, the eccentric professor has passed away and his American nephew Rock Carrington is set to gain his billion dollar inheritance. The Old Professor was, however, extremely mean and shrewd, so much so that even after his death he made it as difficult as possible for his fortune to be handed down. Rock Carrington needs your help to overcome the obstacles left by Maximillion, and gain access to the Professor's video tape, the key, to the inheritance. Good luck!

### LOADING

- AMSTRAD 464 OWNERS
1. Place the rewound cassette into the cassette unit and press PLAY.
  2. Hold down CTRL and press the SMALL ENTER key.
  - AMSTRAD 664, 6128 and 464+DISK OWNERS
  1. Hold down SHIFT and press the £ key. Type TAPE and press RETURN.
  2. Connect a suitable cassette player to your computer, according to the User Manual, and insert the rewound cassette.
  3. Hold down CONTROL and press the ENTER key.
  4. Press PLAY on the cassette player.

*NOTE: Full loading instructions can be found in your Amstrad Manual.*

### PLAYING THE GAME

MEGABUCKS can be played using either a joystick or the keyboard. The aim of the game is to explore the mansion of the late Maximillion III, and its grounds to gain your inheritance. To do this you must use the objects you find to overcome various obstacles left by Maximillion. The controls when the game has loaded are as follows:

Up = K Left = Z Right = X Down = M Fire = ENTER

Pressing FIRE will access an icon window, from which you

## The Game

The nuclear power source for STAR WARS H.Q. on the moon has become unstable. This has seriously affected the main computer system. Only you can reach the control room and avert disaster. H.Q. is a three storey office complex connected by computer controlled lift. Each level has 64 different offices some of which have different types of control terminals and outsmart the computer at a game or puzzle. If you are successful a code will be revealed on screen. When all 6 codes are in place proceed to the lift terminal where access to the second level is obtained. Before entering the second level a Mini Game "The President's Brain is Missing" will be presented. Collect the various parts of the brain scattered around the screens for final access. Level 2 follows similar pattern to level 1 with different graphic designs and a new Mini Game SHORT CIRCUIT. Level 3 has yet another new range of office designs and after collecting the 6 codewords you may think you are nearly there. - Save the game and take a deep breath before entering the final mind blowing stage.

This is a simple matter of learning a new computer language S.C.U.B.A. - simple code understandable by anyone by hacking into the mainframe. When you feel competent, write a program and run it. If you are successful you guide your character to various control rods and fuel rods and the reactor will be stabilised. If you fail it could be fatal, and it is a long way back to the beginning.

All successful participants are awarded a compilation certificate - If printer is connected.

**AMSTRAD/SCHNEIDER DISC:-**

CASSETTE BASED COMPUTER WITH ADDITIONAL DISC DRIVE (ie CPC-464)

- Type 'DISC' and press 'RETURN' then type RUN"DISC and press 'RETURN'.

**DISC BASED COMPUTER (ie CPC-6128)**

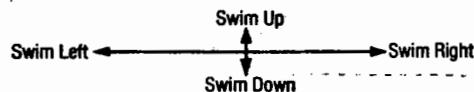

- Type RUN"DISC and press 'RETURN'.

All programs will RUN automatically after LOADING is complete.

In case of LOADING difficulties please refer to the chapter on LOADING and SAVING programs in your computer's User Manual.

### CONTROLS

Use a joystick

Fire: Collect or Drop Objects. Drink Bottles of Stout.

### GAMEPLAY

Swim Myrtle down to rescue Gormless Gordon. You will need to avoid sea creatures that attack you if you touch them. You will need to drink stout to keep up your energy. There are also some useful objects which will need to be collected and used.

At the top of the screen going from left to right there are:

- 1) Score and High Score. Beneath these the object you are currently carrying is listed.
- 2) Gordons air bottles. The meter is slowly ticking down. You have to rescue Gordon before the needle reaches the red zone.
- 3) Myrtles heart which pulses faster the closer she is to Gordon.
- 4) A bottle of stout which shows how much energy Myrtle has.

### SEA DREAMS

"I want a man," cries Myrtle, "a husband, a fellah; someone to eat oysters with while the sun sinks down over the heaving sea." Myrtle watches from the Candy Stall on the pier and consumes another two sticks of rock (simultaneously), she burps and the echoes shake the counter as a wet flip flapping sound flops up to her stall.

The flip flapping is Gormless Gordon, a diver of little repute and even littler brain (you could count his active brain cells on your fingers and toes). Gordons vacant stare washes across the toothless grin of the ancient Myrtle (112 years old to be exact).

"Good God," shouts Gordon in shocked surprise, for Myrtles comely features (as comely as any 112 year old who spent half her life soaking in salt water and the other half pulling ugly faces in a side show for a living) have struck him to the core and now he is going to be sick. "Oooaaahh, help urgule urgule," gurgles Gordon as he tumbles over the end of the pier and into the briny deep.

Myrtles heart swells on seeing Gordon and beats with a ferocity unequalled since the home coming of the troops in 1918 when she wooed the gallant lads with a belly dance she had learned from a squid.

"My love, my dear, my darling," she coos with a voice like a fog horn, you must be mine to have, to hold, to hold and to have until the end of our days. Wait, wait don't be coy I'm coming," and with a whoop she leaps over the Candy counter throwing off her clothes with gay abandon as she charges after Gordon like a romantic hippo after a mate; her golden locks streaming out behind her as she plummets towards the sea, which seems to cringe away from the imminent impact.

On entering the water Myrtles legs metamorphose into a handy fish tail which she uses to propel herself into the rippling depths in search of her hearts desire (the rest of her body is pretty keen on Gordon too). Meanwhile Gordon has remembered that he has to breath bottled air when he is under water and is now secreting himself in a tangle of metal within a wreck.

"Mmmmmnnnnnnnnnnnn," he sings to himself to calm his nerves (the mouth piece inhibiting his pronunciation a little). Calmer now he looks around and finds he cannot move for he has corkscrewed himself clockwise into an anticlockwise tangle and is well and truly trapped.

Fortunately Gormless Gordon forgets that he cannot breath under water and settles down for a snooze, waiting for Myrtle to go away, oblivious of the danger he is in. His air supply starts to slip down, bubble by bubble by bubble, Gordons in serious trouble.

Myrtle heads for the rescue powered by bottles of stout fortuitously scattered about the sea bed during an ocean liner wreck (women, children and stout first over the side). With the stout coursing round her blood stream she swims to the bottom and as she nears her man that undefinable magic that is love causes her heart to beat faster.

"I'm coming my dear, do not fear, do not be afraid, I'm not in the tragical history trade. We'll have a happy ending quite soon, if I can get you before I swoon." She swings at another bottle of the brown nectar while dodging a rock lobster...

In the unlikely event of a faulty product, please return it to the original place of purchase.

**ARE YOU THE BRIGHT SPARK WE ARE LOOKING FOR?**

**THE STORY**

There are many criminal and terrorist groups known to be operating in our solar system: The Multifaceted Brigadiers of Scrim, Jaba McGuff with his alien syndicate 'DENIZE' and of course Crax Bloodfinger and his evil followers. However, all of these despicable characters fade into obscurity when compared to General Ironside and his Metal Army.

Question: What do you do when a horde of Ironsides heavy metal henchmen storm Slough nuclear power station, threatening to blow it up?

Answer: You send in Joe Blade. However, when you find out that Joe is busy evicting an evil dictator from an unspecified Latin American country, you have to do the next best thing.

The mayor of Slough was forced to take the only course of action left open to him: Harry Chainsaw, freelance bounty-hunter, ex-

marine and part-time window cleaner from Oslo.

Transcript of headengines last transmitted message:

THIS IS AN EMERGENCY ... THERE IS AN EMERGENCY GOING ON... DON'T PANIC... THE TIME BOMB IS SET... ARRGGHH... MISSION BRIEFING

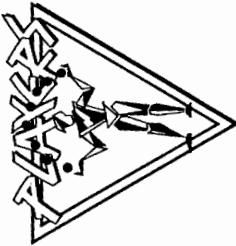

The Metal Army have infiltrated the power station, planting a small explosive device just above the main reactor housing. Your mission is to find and deactivate that bomb. Metal Army automated combat units will kill you on contact, luckily the mayors office have issued you with a large, short-range plasma servo-blaster, which will restrain and eventually destroy the enemy mechs. Your blasters energy level may be recharged from a flashing power point. To access certain parts of the massive complex you will need to collect the green security passes. To use a lift stand on it and push up.

**WARNING:** To compensate for damage caused by the Metal Army,

the reactors automated ventilation system will systematically

discharge coolant gasses, built up electric charge and fuel rods,

these will also prove fatal if touched.

# METROCROSS

AMSTRAD

**METROCROSS**

namco

Are you the  
one in a million who can  
think in microseconds not minutes?

If you are, Metrocross is the challenge that's been designed to inspire you, if you're not then you'd better fast improve your skill and co-ordination. A chequered floor riddled with potholes, a barrage of obstacles that hinder your progress and no go areas that bring you to a standstill make this race against time increasingly impossible. But not everything is against you. Springboards are primed to catapult you forward and a speeding skateboard waits ready to hurtle you along that desperate rush to the finish line. If you beat the clock the first time there's no guarantee you'll not be flattened at the next level.

Screenshots are from original Arcade game.

**METRO CROSS**  
**LOADING:** **DISK/CASSETTE**  
DISK: Type RUN "METRO" and press **ENTER**.  
CASS: Press **CTRL** and **SMALL ENTER** then press **PLAY** on cassette recorder.

**KEYBOARD CONTROLS:**

Keys are redefinable by user.

**JOYSTICK OPTION:**  
**RATS:**

If they bite your shoulders you slow down so you need to shake them off.

**HURDLES:**

Jump all of those in your path.

**COKE CANS:**

You need to jump over them.

**BLUE CANS:**

Kick them and you score points 100, 500, 1000, 2000, 5000. Jump on them, and the timer stops for two seconds.

**GREEN CANS:**

Speed cans which double your speed.

**SPRING BOARDS:**

Increase your speed, strategically placed to enable faster completion of a level. Metro Cross comprises 24 levels which increase in difficulty.

**SCORING:**

You gain 50 points for every 3 squares completed.  
2,000 points for swopping skateboards.  
1,000 points for skating through the bridge.

If you run on the green tiles your speed decreases to  $\frac{1}{4}$ .

The timer at the bottom indicates time left available.

**TASTIERA:** Giocabile anche da tastiera con possibilità di definire i tasti per giocare.

**JOYSTICK**

**TOP!**

Se li mordono le spalle rallenti l'andatura, quindi cerca di scrollateli di dosso.

**OSTACOLI**

Cerca di saltare tutti quelli sul tuo cammino.

**LATTINE DI COCA-COLA**

Devi salirci sopra.

**LATTINE BLU**

Se dai loro un calcio realizzi seguenti punteggi: 100, 500, 1000, 2000, 5000. Saltaci sopra el il timer si ferma per due secondi.

**LATTINE VERDI**

Lattine da "velocità". Possono raddoppiare la tua velocità.

**SKATE CON MOLLE**

Aumentano la tua velocità. Situate strategicamente per permettere un completamento più rapido di ciascun livello. Metro Cross comprende 24 livelli di difficoltà crescente.

**PUNTEGGIO**

Guadagni 50 punti completando 3 quadrati.  
2000 punti per ogni cambio di skateboard.  
1000 punti se pattini lungo il ponte.

Se corsi sulle piastrelle verdi la tua velocità diminuisce di  $\frac{1}{4}$ .  
Il timer in basso sullo schermo indica il tempo a disposizione.  
Tutti i diritti riservati.

## TEXT COMMANDS.

**THINK COMMAND:** When a clue of any kind presents itself or if you want to know more about the nature of a character or object type 'THINK', filling in the name of what you'd like to think about. If you haven't "thought" about enough clues during the game, you may get to the end of the adventure and not know your true identity.

**KEY COMMANDS:** A partial but important listing. Use these as a quick reference. Several can be abbreviated as noted.

PUSH	TAKE
(N)ORTH	(S)OUTH
(E)AST	(W)EST
(F)ORWARD	(B)ACKWARD
(U)P	(D)OWN
(L)eft	(R)ight
(C)LOSE	(T)URN
(I)NVENTORY	(G)O
EXAMINE	

continue. When you press 'any key', the program will start to load your game. After the game has been loaded, the screen will prompt you to replace the Mindshadow cassette.

**NOTE:** There are two parts to the Mindshadow game. Game positions saved while playing 'MIND1' will not be accepted by 'MIND2', and vice versa. The screen will give an error message. The only exception to this is when you have completed 'MIND1', as described earlier. A game save must be made at this point, in order to let you start playing 'MIND2'.

**QUICKSAVE:** This is another feature of Mindshadow, it enables you to save a game, without using a tape. So if you are about to make a move you are not sure about, you should QUICKSAVE first. Each time you use QUICKSAVE the position last stored is lost. Lastly remember that if you have decided to stop playing for now, you should save the game onto cassette, as when you turn off your computer ALL information is lost!

**QUICKLOAD:** If you have QUICKSAVED a game then QUICKLOAD will restore the game, as you left off when you QUICKSAVED.

## GETTING STARTED

If you load the TUTORIAL section, you will be taught the basics of how to play a graphic adventure.

Now and then, in the thick of Mindshadow, you may feel baffled. To assist you in these circumstances, you may type HELP. The computer will respond to your need for help. But it may or may not offer advice!

## MINDSHADOW FEATURES

**SAVE GAME:** Please follow the instructions that appear on the game screen. You will need a blank tape ready to save your game onto. (It is not possible to save onto the Mindshadow cassette.) The screen will instruct you to insert the game save cassette. Then it will ask you to press any key to continue. When you press 'any key', the program will start saving your game. After the game has been saved, the screen will prompt you to replace the Mindshadow cassette. Remember to note down what is saved on a tape, otherwise you will lose track of your saved games.

If you do not want the tutorial to load, and want to play the main game then type the following:  
RUN "MIND1" followed by 'ENTER'.  
If you want to play the second part of Mindshadow, type the following: RUN "MIND2" followed by 'ENTER'. Note that you will only be allowed to play 'MIND2' if you have previously completed 'MIND1' and saved that position onto cassette. You cannot complete 'MIND2' without have saved game ready.

**NOTE:** On the reverse side of the tape, 'MIND2' is the first file followed by 'MIND1'. This is done so that if you have completed the first part of the game it will be easier for

## AMSTRAD 464/664/6128<sup>TM+</sup> LOADING INSTRUCTIONS

Owners of the 664/6128 machines should first type the following: !ITAPE, then 'ENTER'. Insert the 'MINDSHADOW' cassette in your cassette recorder. Make sure the cassette is fully rewound. To load the tutorial hold down 'CTRL' and press the small ENTER key on the numeric keypad. Then follow the instructions on the screen. The tutorial section will now load automatically.

If you do not want the tutorial to load, and want to play the main game then type the following:  
RUN "MIND1" followed by 'ENTER'. If you want to play the second part of Mindshadow, type the following: RUN "MIND2" followed by 'ENTER'. Note that you will only be allowed to play 'MIND2' if you have previously completed 'MIND1' and saved that position onto cassette. You cannot complete 'MIND2' without have saved game ready.

**NOTE:** On the reverse side of the tape, 'MIND2' is the first file followed by 'MIND1'. This is done so that if you have completed the first part of the game it will be easier for

You? We'd love to fill out the reverse side, it, in a stamped envelope dress below. Feel free to letter describing your interests as well. In sp, we'll keep you up to date with news from the Activision s.

**SION (U.K.) LTD.,**  
**Harley House,**  
**rylebone Road,**  
**Regents Park,**

CTRL niederdrücken und die kleine ENTER Taste drücken. PLAY Taste auf Ihrem Recorder drücken.

##### DISKETTE

RUN "ELEVATOR" eingeben. RETURN drücken.

Anschlag auf eine Einsatzzentrale des FBI!  
Ein feindlicher Geheimdienst hat diese strategisch wichtige Zentrale besetzt, um so die Freilassung mehrerer festgehaltener Spione zu erreichen. In einem Ultimatum wird mit der Sprengung der als Hotel getarnten Zentrale gedroht, falls den Forderungen nicht nachgekommen wird.

Dem Hauptquartier des FBI ist es aber gelungen, für kurze Zeit Kontakt mit einem ihrer in der Einsatzzentrale stationierten Computerspezialisten aufzunehmen. Dieser konnte zunächst unerkannt den elektronischen Timer der Bombe im 62. Stockwerk des Hotels ausfindig machen. Ermittelt auch den Stopcode des Timers, wird jedoch beim Eintippen plötzlich entdeckt. Die Gegner verschleppen ihn in den Keller des Hotels. Auf dem Weg dorthin versteckt er kleine Zeichen, die zusammengesetzt den Stopcode ergeben. Das Hauptquartier setzt nun den Superagenten Trevor ein, der die Codeteile suchen und damit den Timer stoppen soll. Es ist jetzt Ihre verantwortungsvolle Aufgabe, Trevors Rolle zu übernehmen und in einen dramatischen Kampf gegen die Zeit und die Übermacht des Gegners in den 62. Stock des Hotels vorzudringen, um das Hotel vor der Vernichtung zu bewahren.

##### SPIELANLEITUNG

Sie müssen Agent Trevor helfen, bis in das 62. Stockwerk zu gelangen. Das Hauptquartier hat aus sicherer Quelle in Erfahrung gebracht, daß sich dort die Steuerungselektronik der Zeitbombe befindet. Nur hier kann der Countdown gestoppt und somit die Bombe entschärft werden!

Folgende Angaben über das Hotel sind dem Hauptquartier bekannt:

- Man kann sich jeweils innerhalb von acht Stockwerken mittels der Fahrstühle frei bewegen, in die darüberliegenden Stockwerke gelangt man nur über eine Nottür.

Den Schlüssel zu dieser Nottür besitzt nur der

Portier, der sich allerdings aus Angst vor den Gegnern in einem der Hotelzimmer versteckt hält. Um den Portier zu suchen, benötigt man also zunächst einen Schlüssel für die Hotelzimmer! ABER: In einigen Zimmern lauern Gefahren...

- Um den Countdown zu stoppen, muß man im Besitz eines 16-teiligen Codes sein. Die einzelnen Teile dieses Codes sind im ganzen Hotel versteckt, in jeweils acht Stockwerken liegen immer zwei Teile. Jedes Code Teil besteht aus einer Richtungsangabe. Die so erhaltenen 16 Richtungen werden zur Entschärfung der Zeitbombe benötigt, müssen also unbedingt in ihrer Reihenfolge gemerkt werden!

- Agent Trevor kann jede Hoteleinrichtung untersuchen und benutzen, einige können nützlich sein, andere weniger, aber hinter jeder Einrichtung könnte ein Teil des Codes liegen...

##### HINWEISE ZUR ERLEICHTERUNG DER MISSION

- Die Gegner kennen die Verstecke des Codes, nur muß man die zum Reden bringen!

- Bei einem Glas Bier oder Whisky wird der Barkeeper redselig, aber auch bei Agent Trevor wirkt Alkohol!

- systematische Benutzung der Fahrstühle kann viel Zeit sparen.

##### DAS ANZEIGENFELD (Unterer Bildschirmteil):

Das Anzeigenfeld besteht aus sechs Teilen:

1. Punktteststand

2. Anzahl der Leben

3. Schlüsselanzeige bedeutet: Kein Schlüssel in Trevors Besitz.

K1 bedeutet: Trevor besitzt den Universal.

Schlüssel für alle Zimmertüren!

ED bedeutet: Trevor besitzt den Schlüssel für die Nottüren!

4. Stockwerk: Nummer des mittleren Stockwerkes.

5. Kommunikationsfeld: Hier werden alle Untersuchungsergebnisse angezeigt!

6. Countdown: Die Mission muß beendet werden, bevor der Countdown bei 000 angelangt ist.

##### DIE STEUERUNG

Agent Trevor läßt sich über Joystick oder Tastatur steuern. Die Tasten sind wie folgt belegt:

OBEN - (Cursor oben) oder Q

UNTEN - (Cursor unten) oder A

LINKS - (Cursor links) oder O

RECHTS - (Cursor rechts) oder P

FEUER - LEERTASTE

##### RICHTUNG - AKTION

OBEN - SPRUNG

OBEN und links/rechts (diagonal) - KAMPFSPRUNG in jeweilige Richtung.

UNTEN - DUCKEN

UNTEN und links/rechts (diagonal) - UNTERSUCHUNG der vor Trevor liegenden Hoteleinrichtung.

LINKS - LAUF nach links

RECHTS - LAUF nach rechts

FEUER - SCHUSS (stehend)

Feuer und Joystick unten - SCHUSS (gedrückt)

##### HINWEISE

• Befindet sich Agent Trevor im Fahrstuhl, so werden die Richtungen OBEN/UNTEN zur STEUERUNG DES FAHRSTUHLS benutzt.

Um die Türen zu öffnen, bewegen Sie den Agenten an den rechten Türpfosten und schauen Sie nach links. Dann muß der Joystick diagonal nach unten

gedrückt werden und, sofern Sie den Schlüssel besitzen, die Tür öffnet sich. Die Buchstabenwahl in der Namenseingabe erfolgt über Joystick oder Cursor-Tasten.

One of the Central Intelligence Units of the FBI has been attacked! Agents of a hostile Secret Service hold this important Unit under siege, to blackmail the US. government to release a number of spies presently imprisoned. If the demands of the agents are not met by a given deadline, the hotel which is the cover for the Central Intelligence Units offices will be blown up.

However, FBI Headquarters managed to get in touch with a computer-specialist working at the Central Intelligence Units very briefly. The specialist was able to locate the electronic timer of the bomb on the 62nd floor of the hotel. He even manages to find the stop code of the timer before he is finally discovered by his enemies. His opponents deposit him in the basement of the hotel. On the way the FBI man is able to hide various little signs which, if put together, give you the stopcode.

Headquarters decide to put their superagent Trevor on the job. You are Trevor and it is your task against all odds to find the code and make your way to the 62nd floor to defuse the bomb and save the hotel.

#### INSTRUCTIONS

Trevor must somehow reach the 62nd floor, but headquarters could only brief him with the following:

- The hotel is split up in units of 8 floors each. Within each unit, you can move up or down by using any of the lifts. The emergency exit leads to the next eight floors.

- You need a key to open the emergency exit which is at present in the porter's back trouser pocket which together with its owner has gone into hiding in one of the hotel rooms. But to find the porter you need the master key to open the room doors. But beware, danger lurks behind every door.....

- To stop the countdown, you need the code consisting of 16 parts. You will find 2 parts of the code per 8 floors. Each part of the code will specify a direction. All 16 directions are needed to defuse the bomb. Take care to remember the order in which you found the directions.

- The hotel furniture should be carefully examined and, if possible, used. Behind every piece of

furniture a piece of the code may be hidden.

#### HINTS

- Your opponents know the hiding places of the codes and will tell you about them, provided you can get them to talk!

- Alcohol will get the barkeeper talking, but remember, that you are equally likely to get drunk in the process.

- Use the lifts systematically to save time.

#### INFORMATION ON SCREEN

You are supplied with 6 different types of information:

1. Your score
2. No. of lives
3. "Key" indicators—means : You do not have any keys  
K1 means : You are in possession of the masterkey  
ED means : You are in the possession of the key for the emergency exits.
4. Floor No. of floor you are on
5. Information screen
6. Timer Your mission has to be completed before the timer has counted down to zero.

#### CONTROLS

Joystick or keyboard controlled.

Use the following keys to:

Go up - Cursor up or Q  
Go down - Cursor down or A  
Go left - Cursor left or O  
Go right - Cursor right or P  
Fire - Spacebar

Agent Trevor can do the following movements:

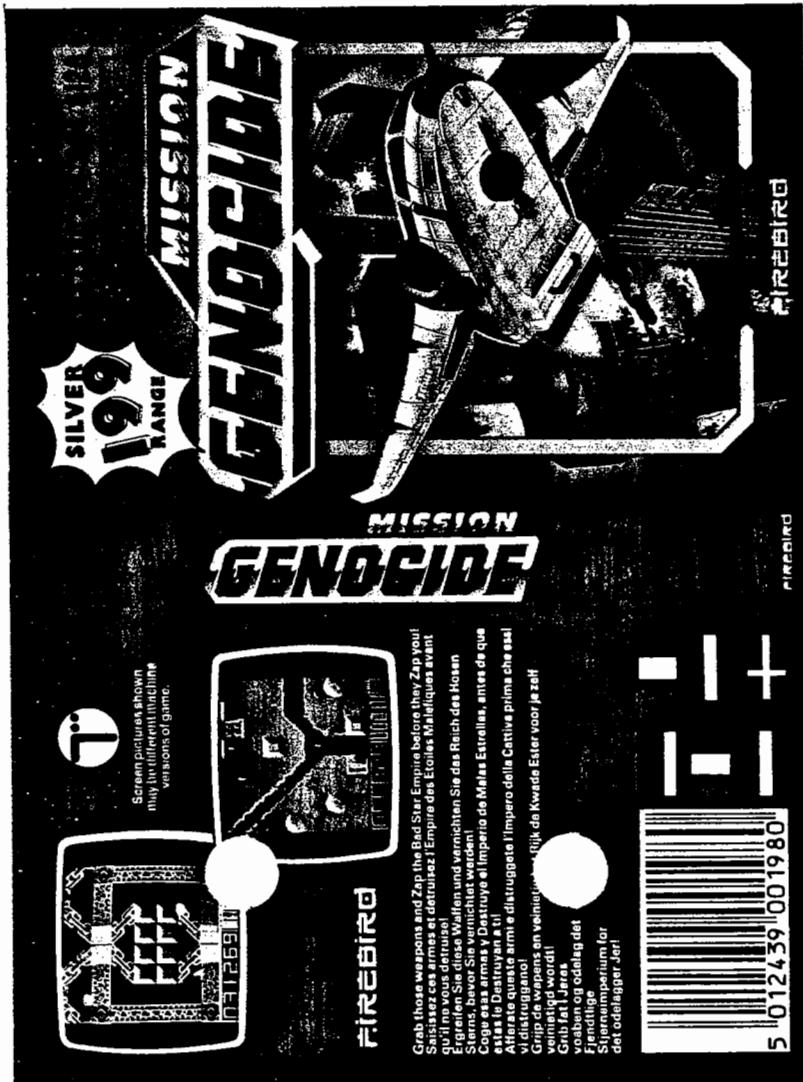

Direction	Action
Up	Jump
Up left or right	Attack left or right
Down	Duck
Down left/right	Examine object(s) in front of Trevor
Left	Run to the left
Right	Run to the right
Fire	Shoot (whilst standing up)
Fire down	Shoot (whilst ducking)

#### TIPS

If you are inside one of this lifts, use "UP/DOWN" to move the lift in the right direction.

To open a door, move to the right doopost and look to the left. Then move the joystick diagonally down. If you have the key, the door will now open.

At the start of the game, use joystick or cursorkeys to enter your name.

MAIL ORDER

If you are having problems obtaining any of our other games from the exciting Silver Range you can order them directly from our Mail Order department. Please state the name of the game, machine and quantity required. All enclosed crossed cheques/P.O.s should be made payable to FIREBIRD SOFTWARE. All orders are subject to availability. Games will be despatched promptly. All prices are inclusive of VAT and postage.

Mission One

1210001/12866

# **MISSION - 1**

**FROM: MISSION H.Q.  
TO: SECRET AGENT  
CONTENT: PROJECT VOLCANO**

## **BRIEFING**

You have been selected for this Mission because of your specialist skills in computer operations. The Aim of your Mission is to gain entry to the hidden Command complex, once there you must locate the main computer room and delete the command program by entering the Distruct Code. Intelligence informs us that this code is hidden within the complex.

If you succeed in your Mission a reward of 5000 score credits will be given. We will also be willing to reward you for discovering anything that is of value to us with score credits up to a maximum of 20,000. Allied powers have also asked if we can discover the name or names of possible double agents.

High level intelligence contacts have supplied the following information which may be of some use to you: –

- 1) Outline brief from Allied Command H.Q.
- 2) Information from one of our agents who managed to gain access to the centre.
- 3) Copy of basic blueprint to centre.
- 4) Names of centre's main personnel.
- 5) Swiss bank account numbers for several of centre's main personnel.

You will be taken to, and collected at, the drop off point by Mission's own personnel and a cover will be arranged for your absence.

You are now on your own ..... GOOD LUCK.

## OUTLINE BRIEF FROM ALLIED COMMAND H.Q.

### RED.

Classification ..... RED.  
From ..... Commander Smith-Green.  
To ..... Special Operations Group.  
Authorization ..... P.M.  
Content ..... Project Volcano.

### Background

A top secret missile command centre has been discovered hidden beneath an extinct volcano on the Yugoslavian and Rumanian border. The command centre we now know is the heart of a missile network which covers the whole of the Soviet Block. The centre is fully self-contained and automated.

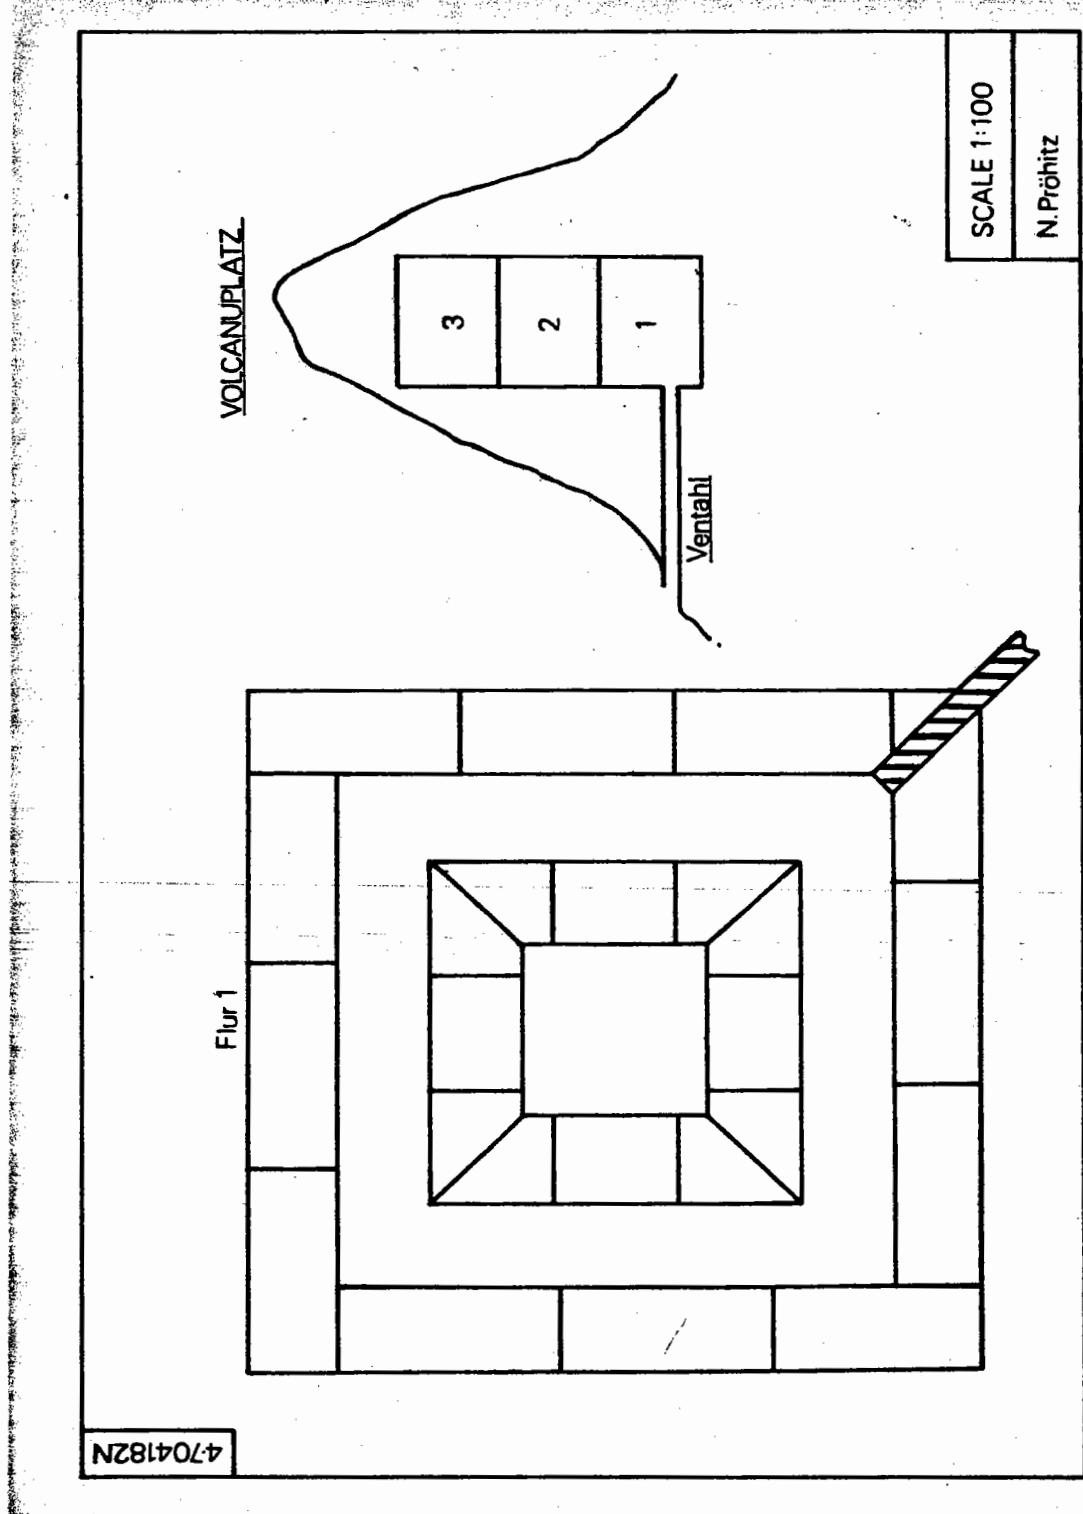

### Recommendations

After top level discussions it has been decided that the centre must be put out of operation for four weeks, but the total destruction of the centre would have too many repercussions for stable relationships. It is felt by the P.M. that a delay of four weeks would allow Allied Forces sufficient time to equalize the power balance and allow our own command centre to start functional operations.

### Action

It is felt desirable that a Secret Agent be used to destroy the master program and no link be established with Allied Command.

CONTACT MISSION H.Q.

## **PLAYING THE GAME - AMSTRAD CPC 464**

- 1. Place cassette in datacorder and rewind to start.**
- 2. Press CTRL and small enter keys at same time.**
- 3. Run" and press play, then any key will appear on screen.**
- 4. Press play on datacorder and any key on main keyboard and the game will now load.**

Once loaded the program will prompt you 'RESTORE A PREVIOUS GAME Y/N', answer N if this is the first playing or if you wish to start from the beginning.

You can command the computer by typing in simple English commands, usually verb and noun. Some of the most commonly used commands can be abbreviated, e.g. F is the same as FORWARD, T FIS can be substituted for TAKE FISHINGROD. These commands can be listed during the course of the game by typing HELP. Various objects will be encountered as the game progresses, the name that they are recognised by will be shown in capitals, e.g. to TAKE a green HAT you would type T HAT.

At any time during the Mission you may withdraw by typing QUIT. Any rewards due to you at this stage are now shown. You will then be given the option of playing again - answering 'Y' restarts the Mission from the beginning - answering 'N' gives you the option to save your present position. If you wish to do so, answer 'Y' AFTER having made ready a spare cassette. Now press the play and record buttons on your cassette player and press any key on your computer. It will take approximately 10 seconds to save.

In order to restore a position answer 'Y' to 'RESTORE A PREVIOUS GAME Y/N', after first having made ready your saved cassette. Now press the play button on your cassette recorder. The previous position you were at is automatically loaded and you can continue your Mission.

## **TIPS ON PLAY**

**Keep track of where you are and where you have been.**

**If the program does not understand, try and rephrase your command**

**The solution to individual problems is usually quite simple in nature, so if you find yourself typing long sentences you are probably on the wrong track.**

**If you get stuck, put it away and play again tomorrow, often the solution can strike you suddenly. Remember there could be something more interesting in the next room.  
If you search hard enough.**

**Not everything you find will be useful, some things may be a positive disadvantage if carried.**

**Descriptions given by the program may hold a clue so study them carefully.**

**You are in enemy territory, the good agent will think before he acts when his life may be at stake.**

## MONTY ON THE RUN

(Monty s'évade.)

### Pour Jouer

#### Plan du Jeu

Monty, qui s'est échappé de prison, se trouve maintenant tellement en forme qu'il peut même faire le saut périlleux. Pour retrouver la liberté totale, il doit passer tout d'abord par de nombreuses cachettes et "planques". Pour l'aider à réussir son évasion, on lui a remis un kit de 21 objets, dont cinq dont vont lui être utiles. En outre, il doit récolter des pièces d'or en chemin, ainsi que d'autres objets qui pourront soit l'aider, soit l'encombrer (vous ne saurez quoi sont les objets corrects qu'en les essayant).

#### Le "Kit-Liberté"

1. Compas	2. Jet Pack	3. Déguisement
4. Corde	5. Groupe électrogène	6. Pistolet laser
7. Montre	8. Échelle	9. Grenade
10. Revolver	11. Disquette	12. Passeport
13. Masque à gaz	14. Télescope	15. Char
16. Barillet de rhum	17. Hache	18. Sac marin
19. Carte	20. Marteau	21. Lampe de poche

## MONTY ON THE RUN

(Monty auf der flucht)

### Spielanleitung

#### Spielverlauf

Monty, der aus dem Gefängnis entwichen und jetzt superstarke, Salto machende Flüchtling, muß sich durch verschiedene Versteckplätze und geheime Orte hindurch in die Freiheit retten. Um diese Reise erfolgreich zu überstehen, besitzt er eine Rettungsausrüstung mit 21 verschiedenen Gegenständen, wovon ihm aber nur fünf befindlich sind. Daneben darf er auf der Reise Goldmünzen sammeln; verschiedene andere Gegenstände, die ihm auf der Reise begegnen, können ihm helfen, können ihn aber auch behindern (ob Hilfe oder Hindernis wird sich erst nach Versuch herausstellen!).

#### Rettungsausrüstung:

1. Kompas	2. Düsenantrieb	3. Verkleidung
4. Seil	5. Generator	6. Lasergewehr
7. Uhr	8. Leiter	9. Handgranate
10. Gewehr	11. Floppy Disk	12. Reisepaß
13. Gasmaske	14. Teleskop	15. Panzer
16. Rumpfdecken	17. Axt	18. Kleidersack
19. Karte	20. Hammer	21. Taschenlampe

## MONTY ON THE RUN

(La huida de Monty.)

### Instrucciones para jugar

#### Plan de Juego

Monty, habiéndose escapado de la prisión y ahora en un estado físico excepcional que le permite dar saltos mortales, precisa abrirse camino hacia la libertad a través de muchos escondites y lugares secretos. Para poder completar su viaje felizmente ha recibido un "kit" de libertad que contiene 21 objetos, pero sólo cinco de ellos le permitirán llegar a la meta. Además, hay monedas de oro que puede recoger en el camino, junto con otros objetos que le servirán de ayuda o de estorbo (usted sólo lo averiguará probándolos).

#### Kit. de Libertad

4. Brújula	2. Motor de chorro	3. Disfraz
4. Cuerda	5. Generador	6. Pistola de Láser
7. Reloj	8. Escalera	9. Granada de mano
10. Pistola	11. Disco flexible	12. Pasaporte
13. Careta antigás	14. Telescopio	15. Tanque
16. Barillet de rhum	17. Hacha	18. Bolsa del kit.
19. Mapa	20. Martillo	21. linterna

### Quelques conseils pour choisir les objets

Pour ce qui est du choix de votre Kit-Liberté, ne vous en faites pas trop. Pendant le jeu, vous allez arriver à un point où vous ne pouvez plus continuer, mais où il vous semble que vous devriez poursuivre. A ce moment-là, relevez soigneusement l'endroit où vous en êtes et sélectionnez l'objet du Kit-Liberté qui va vous aider à reprendre la route!

### Spectrum 48K 49 Ecrans- Tableaux

#### Selection du Kit-Liberté

Utilisez les commandes de gauche et de droite pour déplacer la flèche et appuyez sur JUMP/FIRE pour sélectionner un objet. Les numéros des objets vont correspondre à ceux de la liste du Kit-Liberté qui figure sur l'encart de la cassette.

#### Selection des options initiales

Utilisez "vers le haut" et "vers le bas" pour placer les étoiles en regard de l'option choisie, puis appuyez sur JUMP/FIRE pour la sélection.

#### Pour les déplacements

Clavier:  
Q vers la gauche W vers la droite Y-P vers le haut  
Enter-H vers le bas B-SPACE Jump/Fire (Sauter/Tirez)

Joystick: compatible avec le Kempston et l'Interface II, qui seront sélectionnés automatiquement si présents.

#### Pour charger:

Load - Appuyez sur Enter

Appuyez sur Break pour relancer le jeu.

### Commodore 64/128 & AMSTRAD 49 Ecrans- Tableaux

#### Selection du Kit-Liberté

Sur le premier écran, utilisez les touches de marche à gauche et à droite pour placer l'objet qu'il vous faut au milieu (l'objet va clignoter) et appuyez sur la touche DOWN pour sélectionner. Après avoir choisi cinq objets, appuyez sur FIRE pour commencer. Les numéros des objets correspondent à ceux qui figurent sur l'encart de la cassette.

#### Pour les déplacements

Clavier:  
Z gauche X droite J; vers le haut  
7/ vers le bas SPACE saut

Joystick - Porte II

Sur l'écran initial, appuyez sur R pour redéfinir les touches.

#### Pour charger (Bande)

Appuyez sur SHIFT & RUN/STOP

Pour relancer le jeu, appuyez sur RESTORE

#### Pour charger (Disque)

Tapez: L O A D \* . S . 1 Appuyez sur RETURN

### Sugerencias para seleccionar objetos

No se preocupe demasiado a la hora de seleccionar objetos del kit de libertad. Llegará el momento en el juego en que no podrá continuar, aunque le parezca que debe hacerlo. En ese momento, tome buena nota de donde se encuentra, vuelva a comenzar el juego y seleccione del kit de libertad el objeto que le ayudará a continuar en su camino.

### Spectrum 48K 49 Pantallas

#### Selección de objetos del kit

Utilice las teclas "Izquierda" y "Derecha" para mover la flecha y pulse Jump/Fire (Salto/Fuego) para seleccionar un objeto. Los números de los objetos corresponden con la lista del kit de libertad en la tarjeta.

#### Selección de las opciones iniciales

Utilice las teclas "Arriba" y "Abajo" para posicionar las estrellas al lado de la opción deseada y pulse Jump/Fire (Salto/Fuego) para seleccionarla.

#### Instrucciones para mover

moon buggy

## MOON BUGGY

### MOON BUGGY

Patrol craft latest in a series of A.T.M. (ALL TERRAIN MOON BUGGY) out on a routine patrol is heavily attacked by fighters operating from a star-cruiser. You must skillfully manoeuvre your A.T.M.B. over the lunar rocks, across the craters and destroy the alien attackers.

This all machine code program provides thrilling experience of driving across a constantly changing landscape combined with fast and furious arcade action. Enormous fun for the whole family!

Moon Buggy has five stages requiring increasing skill and presenting increasing challenge.

#### Controls

Use joystick or keyboard.

Keyboard controls:

- |   |                |
|---|----------------|
| X | Increase Speed |
| Z | Decrease Speed |
| ● | Jump           |
| ? | Fire           |
| H | Pause          |

Press Space Bar to restore the game.

**Loading** - Press CTRL key and small ENTER key.  
Press PLAY and then any key.

Program by M. Fox

AMSTRAD

# MOON BUGGY

## Instructions

As sector commander of the moon base defences, you are on routine patrol duty. Your patrol craft, a highly manoeuvrable A.T.M.B. (ALL TERRAIN MOON BUGGY) is capable of accelerating and de-accelerating rapidly. It can also jump over the moon rocks and across the craters. The craft is fitted with high speed laser missiles. The moon surface is full of big and small craters, some of them can only be jumped at max. speed. The surface is also littered with rocks of all shapes and sizes. The real big ones require more than one shot to destroy. There are also some little rocks that can't be blasted out of the way and must be jumped.

There are two types of attack used by the alien forces:

1. Low Level Aerial Attack  
The high speed fighters drop their photon bombs which will destroy your craft on impact. The bombs also sometimes create an extra crater for you to jump over. You may need an extra spurt of speed to jump over big craters.
2. Surface Attack  
Alien tanks mount surface attack with laser bolts. You must either jump over them or die instantly.

## Playing

Craft Control - Joystick - Move Joystick Right - Accelerate Move Joystick Left - Decelerate Fire Button - Launch Laser Bolts and Torpedos or use keyboard.  
This is a high scoring game in which you have four lives to achieve the highest score. There is a high score table.

## Scoring

Rocks	300 points
Large Rocks	500 points
Rolling Rocks	500 points
Alien Craft	1000 points
Tanks	2000 points
