¹ MHz and GHz only measures internal clock speed (or bus speed where indicated), not application performance. Many factors affect application performance.

² When referring to a hard drive capacity, GB equals one billion bytes, and TB equals one trillion bytes. Total user-accessible capacity depends on operating environment.

³ For terms and conditions or copies of IBM's limited warranty, call 1 800 772-2227 in the U.S. Limited warranty includes International Warranty Service in those countries where this product is offered. Telephone support may be subject to additional charges.

⁴ A single "U", or rack unit, is 1.75" or 44.45mm.

⁵ S.M.A.R.T. stands for Self-Monitoring, Analysis and Reporting Technology.

⁶ Variable read rate. Actual playback speed will vary and is often less than the maximum possible.

⁷ Service levels are response time objectives and are not guarantees.

⁸ Subject to conditions.

⁹ Applications may vary from retail version and may not include all documentation or functions. Not all applications available separately. Titles subject to change without notice.

¹⁰ Updated drivers and hot-swap services for certain operating systems may be required to support PCI hot-swap functions.

¹¹ Available only on select Netfinity servers meeting predefined criteria, to include Netfinity 5500, 5500 M10, 5500 M20, 5600, 7000 M10 and 8500R only, having completed Microsoft Cluster Server certification as listed on ServerProven web site; IBM reserves the right to change the terms and conditions of the program at any time, without notice. For more details, refer to www.pc.ibm.com/us/solutions/netfinity/999guarantee.html or see your IBM PSG sales representative.
